1	our questions for now. 09:04:18	1	a very precise answer, we would appreciate if you 09:05:48
2	PRESIDENT: Thank you, Ms. Seers. And 09:04:22	2	would do that. 09:05:51
3	Mr. Neufeld. 09:04:24	3	If you need a break at any time this 09:05:52
4	CROSS-EXAMINATION BY MR. NEUFELD: 09:04:26	4	morning let me know, I'll take a pause at 09:05:53
5	Q. Good morning, Mr. Roeper. 09:04:50	5	an appropriate time and we can have a break. 09:05:55
6	A. Good morning. 09:04:51	6	So I'll be referring to a number of 09:05:58
7	Q. My name is Rodney Neufeld, and I'm 09:04:52	7	exhibits in my questions, and you will see those in 09:06:01
8	counsel for Canada in this matter. I'll make 09:04:54	8	the binder in front of you. 09:06:04
9	a couple of preliminary remarks. I also want to 09:04:57	9	I'll be saying, C- and R-numbers, 09:06:06
10	raise the expert reports that you assisted with in 09:05:00	10	which you don't have to concern yourself with, 09:06:10
11	this hearing, so that we're aware that it's not just 09:05:02	11	that's for the record. 09:06:12
12	the two witness statements, but also the ORTECH 09:05:05	12	I'll be pointing you to the tab 09:06:14
13	expert report, and the report that's appended to the 09:05:08	13	numbers in the binders so you can follow along just 09:06:15
14	Sgurr Report as well that you assisted with, as 09:05:12	14	by the tab. 09:06:19
15	well, correct? So it's very important that we 09:05:17	15	The expert reports, as well, we'll 09:06:19
16	understand each other today, and if you don't hear 09:05:19	16	have a look at the ORTECH report and the two Sgurr 09:06:22
17	my question or need me to repeat it, please ask me, 09:05:22	17	reports as well. 09:06:29
18	please stop me and get me to do that. 09:05:26	18	And finally, we have the ability to 09:06:30
19 20	It is important as well that you 09:05:28	19 20	call up all this information on the screen, so if 09:06:32
21	answer audibly because this is all being recorded, 09:05:30	21	you prefer not flipping and you just want to read it 09:06:35
22	so we need a "yes" or "no" and preferably if you 09:05:32 could be directed in giving a "yes" or "no," of 09:05:36	22	off the screen, Donnie here can enlarge things on 09:06:39
23	course you're welcome to provide the context that 09:05:38	23	the screen and make it easy to follow, so that's 09:06:45 an option as well. 09:06:46
24	you need to provide for questions, but if the 09:05:42	24	an option as well. 09:06:46 So you are the president of ORTECH 09:06:47
25	question is very specific and only wants or needs 09:05:45	25	Consulting we just heard; correct? 09:06:48
	question is very specific and only mand of needs of specific		Consulting we just heard, correct.
	Page 10		Page 11
1	A. That's correct. 09:06:50	1	with as you come to speak with us today. 09:07:54
2	Q. And professional engineer having 09:06:51	2	Let me start about asking about your 09:08:02
3	graduated from the U of M? 09:06:52	3	experience and your knowledge about the permitting 09:08:04
4	A. University of Manitoba with 09:06:55	4	process in Ontario. 09:08:07
5	a Bachelor of Science and a Masters in Science and 09:06:57	5	Paragraph 18 of your first witness 09:08:09
6	Engineering. 09:07:00	6	statement you say that you began working with 09:08:10
7 8	Q. I like to say U of M, because if I 09:07:01	7 8	Windstream to develop renewable energy projects in 09:08:13
9	say that everybody thinks Montreal, and we can't 09:07:04	9	2009, and it specifically said "based on the 09:08:17
10	understand. Only people who have graduated from the 09:07:08	10	strength of the regulatory system" 09:08:21 Do you recall that? 09:08:28
11	University of Manitoba would be able to get that, as 09:07:11 I did. 09:07:14	11	Do you recall that? 09:08:28 A. You are referring to point 19 in 09:08:31
12	So you were retained by Windstream in 09:07:15	12	my witness statement? 09:08:34
13	2009 to assist with its 11 FIT applications; is that 09:07:18	13	Q. I was in paragraph 18, I think, 09:08:36
14	right? 09:07:22	14	but where you use the word "strength of the 09:08:37
15	A. That's correct. 09:07:22	15	regulatory system." 09:08:41
16	Q. And one of those was for 09:07:23	16	A. May I just read this? 09:08:43
17	Windstream Wolfe Island Shoals? 09:07:24	17	Q. Oh, for sure, yeah. 09:08:44
18	A. That's also correct. 09:07:29	18	A. Okay. 09:09:04
19	Q. Not to put any pressure on you, 09:07:30	19	Q. And that regulatory system 09:09:04
20		20	included the REA; you would agree? 09:09:06
20	but we spoke to Mr. Ziegler and Mr. Mars yesterday 09:07:32		
21	who said they hire only the best of the best, and 09:07:35	21	A. That included the entire 09:09:09
		21 22	A. That included the entire 09:09:09 regulatory framework, including the REA, the site 09:09:12
21	who said they hire only the best of the best, and 09:07:35		
21 22	who said they hire only the best of the best, and 09:07:35 Mr. Baines said to us yesterday that I think his 09:07:38	22	regulatory framework, including the REA, the site 09:09:12

	Page 12		Page 13
1	Q. Okay, and the idea of the REA, you 09:09:23	1	itself. 09:10:29
2	wouldn't disagree, is to create transparency through 09:09:25	2	Q. And those are the rules that you 09:10:30
3	clear upfront rules for renewable energy projects? 09:09:31	3	cite to as the rules within the REA pertaining to 09:10:32
4	A. That's I don't disagree with 09:09:34	4	offshore wind? 09:10:35
5	that. 09:09:35	5	A. That's part of the rules 09:10:38
6	Q. According to your second witness 09:09:38	6	pertaining to offshore wind. 09:10:39
7	statement, the REA regulation did contain the 09:09:40	7	Q. Are there other rules in the REA 09:10:41
8	necessary rules to approve offshore wind projects; 09:09:42	8	that relate to offshore wind? 09:10:43
9	correct? 09:09:45	9	A. Well, the REA is made up of 09:10:45
10	A. Yes, I believe so. 09:09:48	10	a framework, and the framework consists of the 09:10:46
11	Q. And these requirements are 09:09:49	11	Environmental Protection Act, which we've used for 09:10:49
12	contained in specifically in the offshore wind 09:09:51	12	a long time to permit projects in Ontario, and it's 09:10:51
13	facility report ? 09:09:53	13	made up of the regulation. 09:10:54
14	A. The offshore wind facility report 09:09:57	14	There are a number of regulations 09:10:56
15	was only outlined in the guidance documentation. 09:09:59	15	under the Environmental Protection Act of which REA 09:10:57
16	Q. Can you explain that? 09:10:05	16	was the latest and newest specifically designed to 09:11:00
17	A. There was no wind facility report 09:10:06	17	facilitate permitting of renewable energy projects, 09:11:04
18	produced. 09:10:09	18	which were previously permitted under the 09:11:06
19	Q. In the REA itself though, I'll 09:10:14	19	Environmental Protection Act. 09:11:08
20	take you to the document in a second, but do you 09:10:16	20	And the wind facilities report was 09:11:12
21	mean that there was no so the REA contains a wind 09:10:18	21	a specific piece of guidance documentation that was 09:11:14
22	facility report, correct, an offshore wind facility 09:10:20	22	published related to that REA Regulation 359/09. 09:11:17
23	report? 09:10:22	23	Q. And specifically the rules that 09:11:23
24	A. The REA contains provisions for 09:10:24	24	you find in the REA itself, the precise rules of 09:11:26

8	starting at Section 53? 09:14:49	8	A. Yes, it does apply to offshore 09:15:39
9	A. That's let me just double-check 09:14:51	9	wind facilities. It is not relevant to offshore 09:15:42
10	the facility. That's right, for Class 3, 4 and 5 09:14:57	10	wind facilities, but it applies to offshore wind 09:15:44

6	a turbine away from receptors, from residences. 09:23:17	6	have standards, we would still have to meet the 09:24:27
7	Before this came out, when we were 09:23:21	7	40-dB guideline. We would then do a detailed noise 09:24:30
8	still doing wind approvals under the environmental 09:23:23	8	model and establish what the setback has to be. 09:24:33
9	screening report process, which was the predecessor 09:23:26	9	That, I believe, is actually 09:24:35
10	process to this, we would model individual wind 09:23:29	10	consistent with that Section 12 that outlines the 09:24:36
11	turbines and wind facilities, calculate the setback 09:23:31	11	process for how we do that. So it says we're 09:24:39
12	distance to meet the Ontario Regulation for 09:23:34	12	supposed to assess the environmental effects and 09:24:42
13	40-decibel noise criteria. 09:23:35	13	then mitigate them. 09:24:44
14	When we did those for single turbines, 09:23:40	14	So, in my mind, the lack of a specific 09:24:45
15	like the 550 metres, we would get results in 09:23:42	15	setback here tells us what approach to use to solve 09:24:51
16	a typical setting, in rural Ontario, using the 09:23:45	16	this issue, and the approach is detailed noise 09:24:55
17	typical models, of somewhere in the 400+ metre 09:23:48	17	modelling as opposed to following a standard 09:24:58
18	range. 09:23:51	18	setback. 09:25:00
19	When this regulation came out, it set 09:23:51	19	Q. But it also indicates that they 09:25:01
20	a specific guideline of 550. 09:23:54	20	were working on a coordinated approach, so you are 09:25:02
21	That 550 was actually really helpful 09:23:57	21	expecting a setback in the future? 09:25:05
22	to us, because it allowed us to follow prescribed 09:24:00	22	A. Absolutely. And I think there was 09:25:06
23	standards instead of necessarily doing detailed 09:24:04	23	lots of communication in the summer of 2010 on 09:25:08
24	modelling on every single turbine. 09:24:06	24	building and creating such a setback. 09:25:12
25	And but where those guidelines aren't 09:24:09	25	Q. We'll come to some of that. It 09:25:14

We look at the location of the project, we 09:26:36 look at the location of the drinking water intake, 09:26:38 and then we run models that determine if impact 09:26:40 might occur. And there indeed are some setback 09:26:45 guidelines related to drinking water, so, 09:26:49 absolutely, could mean plausible and reasonable 09:26:51 things that could be impacted by the project. 09:26:56 you just applied to on-shore wind with the 550 09:26:58 setback, which you found to be very, very helpful, 09:27:01
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	also says "including noise setback." So you're not 09:25:16 suggesting that that paragraph is limited to noise 09:25:19 and only noise, are you? Because it says very 09:25:23 specifically: 09:25:26 " would include 09:25:26 province-wide minimum 09:25:27 separation distance standards 09:25:29 for noise" 09:25:30 But, you know, it's "would include" 09:25:31 province-wide, so it's entirely possible that 09:25:34 they're working on setbacks for other things; isn't 09:25:38 that right? 09:25:45 A. I don't know what those would be 09:25:46 because as for on-shore wind facilities, the 09:25:47 established practice for on-shore wind facility has 09:25:51 been noise. There have been others. One is 09:25:53 mentioned in the text you just read about blade 09:25:56 distances from roads, that has to do with ice throw 09:25:57 from the end of blade, because we get icing here in 09:26:03 Ontario, and blades have to be far enough away from 09:26:06	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	very plausible, and noise is obviously one of them 09:26:17 for offshore. But you're speaking of the 09:30:03 April 27th document? 09:30:04 Q. I believe it's April 27th, yes. 09:30:06 Again, it is listed as a confidential document, and 09:30:20 you don't and you have everything before you, but 09:30:23 as long as you don't read what's in the little red 09:30:25 box there on the other page, then we're fine to keep 09:30:27 this in public session, keep the feed on. 09:30:31 So this is a proposal to undertake 09:30:34 work for, it says, Mrs. Baines based on the meeting 09:30:36 that you had with officials on the 19th; is that 09:30:39 right? 09:30:43 A. Yes. 09:30:43 A. Yes. 09:30:45 "As discussed during the 09:30:46 initial meeting with 09:30:47 regulatory agencies on 09:30:48 April 19th, offshore 09:30:49 permitting is a new area and 09:30:50 lacks well-defined study 09:30:52 criteria. 9	requirements." [As read] 09:31:53	9	assessment, an approach that is we were very 09:32:55
10	Do you see all that? 09:31:53	10	familiar with and is very consistent with the way we 09:32:58
11	A. Uh-hmm. 09:31:54	11	normally do environmental assessment, which really 09:33:00
12	Q. Okay. So what ORTECH was 09:31:55	12	starts with defining the scope in terms of reference 09:33:04
13	proposing here was to study the requirements for 09:31:58	13	of the assessment. 09:33:06
14	offshore wind, including in other jurisdictions, 09:32:01	14	So when we do that, we start with what 09:33:08
15	right, so possibly Europe, in order to come up with 09:32:04	15	is at hand. What is at hand in that's helpful is 09:33:10
16	the requirements for what Ontario needed to adopt; 09:32:08	16	precedents in Ontario. So where we have done 09:33:14
17	is that right? 09:32:11	17	similar projects in Ontario, we look at what was 09:33:18
18	A. That's correct. And I believe 09:32:12	18	included in the environmental assessment, how it was 09:33:20
19	that to be very consistent with that Section 12 that 09:32:15	19	undertaken and how it was done. And we then use 09:33:23
20	you referred to earlier. 09:32:17	20	that as a starting point. 09:33:25
21	Q. Okay. 09:32:19	21	We then take that scope of framework 09:33:27
22	A. Section 12 of REA that outlines 09:32:20	22	that we believe is a reasonable study undertaken for 09:33:29
23	the process for a wind facilities report. 09:32:23	23	an environmental assessment, we take that to the 09:33:32
24	Q. So that Section 12 needed the 09:32:25	24	regulators, and we usually have meetings with them 09:33:34
25	technical guidance or study requirements to direct 09:32:28	25	to discuss the scope that we are proposing, and to 09:33:37

2 3 4 5 6 7 8 9 10 11 12 13 14	get their validation or input to see if it's 09:33:41 reasonable. 09:33:44 So I believe the context of this 09:33:45 document, this is right after the FIT contract was 09:33:47 awarded, we'd just been sort of reengaged, because 09:33:49 it was fairly quiet between the time Windstream 09:33:53 submitted the FIT contract and Windstream waited for 09:33:56 the contract results, so this is shortly after we've 09:34:00 reengaged Windstream, just received the contract 09:34:02 offer, we are reengaging in the regulatory process. 09:34:05 One of the items we identified, and that Leah, who 09:34:08 was a mid-level scientist with us at the time, 09:34:10 identified is that for the REA process, we need to 09:34:13 define the study scope for that section on the Wind 09:34:18 Facilities Report, although she doesn't mention it 09:34:22	2 3 4 5 6 7 8 9 10 11 12 13 14 15	And the reason that's important is so 09:34:46 for the setback, for example, that you mentioned. 09:34:50 We know that in the absence of a setback 09:34:52 requirement, we need to run a model. 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	get their validation or input to see if it's 09:33:41 reasonable. 09:33:44 So I believe the context of this 09:33:45 document, this is right after the FIT contract was 09:33:47 awarded, we'd just been sort of reengaged, because 09:33:49 it was fairly quiet between the time Windstream 09:33:53 submitted the FIT contract and Windstream waited for 09:33:56 the contract results, so this is shortly after we've 09:34:00 reengaged Windstream, just received the contract 09:34:02 offer, we are reengaging in the regulatory process. 09:34:05 One of the items we identified, and that Leah, who 09:34:08 was a mid-level scientist with us at the time, 09:34:10 identified is that for the REA process, we need to 09:34:13 define the study scope for that section on the Wind 09:34:18 Facilities Report, although she doesn't mention it 09:34:24 Q. Section 12 of Table 1. I keep 09:34:27	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	And the reason that's important is so 09:34:46 for the setback, for example, that you mentioned. 09:34:50 We know that in the absence of a setback 09:34:52 requirement, we need to run a model. Which assumptions would you like us 09:35:02 to use?" 09:35:05 So we talk about the approach, and we 09:35:06 lay out the scope and say the issues at hand for 09:35:10 things, noise, possibly drinking water intake, so 09:35:13 other features that are in the area, setbacks from 09:35:17 wetlands and habitat areas, and we set that out in 09:35:21 the scope, in the kind of scope that she's proposing 09:35:24 here, which is sort of a high-level scope of what 09:35:27
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	get their validation or input to see if it's 09:33:41 reasonable. 09:33:44 So I believe the context of this 09:33:45 document, this is right after the FIT contract was 09:33:47 awarded, we'd just been sort of reengaged, because 09:33:49 it was fairly quiet between the time Windstream 09:33:53 submitted the FIT contract and Windstream waited for 09:33:56 the contract results, so this is shortly after we've 09:34:00 reengaged Windstream, just received the contract 09:34:02 offer, we are reengaging in the regulatory process. 09:34:05 One of the items we identified, and that Leah, who 09:34:08 was a mid-level scientist with us at the time, 09:34:10 identified is that for the REA process, we need to 09:34:13 define the study scope for that section on the Wind 09:34:18 Facilities Report, although she doesn't mention it 09:34:22 directly, I think that's what she's talking about. 09:34:27 calling it Table 12, and I don't mean to be. It's 09:34:29	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	And the reason that's important is so 09:34:45 And the reason that's important is so 09:34:46 for the setback, for example, that you mentioned. 09:34:50 We know that in the absence of a setback 09:34:52 requirement, we need to run a model. Scientific 09:34:54 models have assumptions, so what we typically do is 09:34:56 meet with regulators and say "which model would you 09:35:00 like us to use? Which assumptions would you like us 09:35:02 to use?" 09:35:05 So we talk about the approach, and we 09:35:06 lay out the scope and say the issues at hand for 09:35:08 an offshore wind facilities include, among other 09:35:10 things, noise, possibly drinking water intake, so 09:35:13 other features that are in the area, setbacks from 09:35:21 the scope, in the kind of scope that she's proposing 09:35:24 here, which is sort of a high-level scope of what 09:35:29
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	get their validation or input to see if it's 09:33:41 reasonable. 09:33:44 So I believe the context of this 09:33:45 document, this is right after the FIT contract was 09:33:47 awarded, we'd just been sort of reengaged, because 09:33:49 it was fairly quiet between the time Windstream 09:33:53 submitted the FIT contract and Windstream waited for 09:33:56 the contract results, so this is shortly after we've 09:34:00 reengaged Windstream, just received the contract 09:34:02 offer, we are reengaging in the regulatory process. 09:34:05 One of the items we identified, and that Leah, who 09:34:08 was a mid-level scientist with us at the time, 09:34:10 identified is that for the REA process, we need to 09:34:13 define the study scope for that section on the Wind 09:34:18 Facilities Report, although she doesn't mention it 09:34:22 directly, I think that's what she's talking about. 09:34:27 calling it Table 12, and I don't mean to be. It's 09:34:29 my mistake. 09:34:32	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	And the reason that's important is so 09:34:45 And the reason that's important is so 09:34:46 for the setback, for example, that you mentioned. 09:34:50 We know that in the absence of a setback 09:34:52 requirement, we need to run a model. 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	get their validation or input to see if it's 09:33:41 reasonable. 09:33:44 So I believe the context of this 09:33:45 document, this is right after the FIT contract was 09:33:47 awarded, we'd just been sort of reengaged, because 09:33:49 it was fairly quiet between the time Windstream 09:33:53 submitted the FIT contract and Windstream waited for 09:33:56 the contract results, so this is shortly after we've 09:34:00 reengaged Windstream, just received the contract 09:34:02 offer, we are reengaging in the regulatory process. 09:34:05 One of the items we identified, and that Leah, who 09:34:08 was a mid-level scientist with us at the time, 09:34:10 identified is that for the REA process, we need to 09:34:13 define the study scope for that section on the Wind 09:34:18 Facilities Report, although she doesn't mention it 09:34:22 directly, I think that's what she's talking about. 09:34:27 calling it Table 12, and I don't mean to be. It's 09:34:29 my mistake. 09:34:32 A. Yes. 09:34:32	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	And the reason that's important is so 09:34:45 And the reason that's important is so 09:34:46 for the setback, for example, that you mentioned. 09:34:50 We know that in the absence of a setback 09:34:52 requirement, we need to run a model. 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	get their validation or input to see if it's 09:33:41 reasonable. 09:33:44 So I believe the context of this 09:33:45 document, this is right after the FIT contract was 09:33:47 awarded, we'd just been sort of reengaged, because 09:33:49 it was fairly quiet between the time Windstream 09:33:53 submitted the FIT contract and Windstream waited for 09:33:56 the contract results, so this is shortly after we've 09:34:00 reengaged Windstream, just received the contract 09:34:02 offer, we are reengaging in the regulatory process. 09:34:05 One of the items we identified, and that Leah, who 09:34:08 was a mid-level scientist with us at the time, 09:34:10 identified is that for the REA process, we need to 09:34:13 define the study scope for that section on the Wind 09:34:18 Facilities Report, although she doesn't mention it 09:34:22 directly, I think that's what she's talking about. 09:34:24 Q. 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	get their validation or input to see if it's 09:33:41 reasonable. 09:33:44 So I believe the context of this 09:33:45 document, this is right after the FIT contract was 09:33:47 awarded, we'd just been sort of reengaged, because 09:33:49 it was fairly quiet between the time Windstream 09:33:53 submitted the FIT contract and Windstream waited for 09:33:56 the contract results, so this is shortly after we've 09:34:00 reengaged Windstream, just received the contract 09:34:02 offer, we are reengaging in the regulatory process. 09:34:05 One of the items we identified, and that Leah, who 09:34:08 was a mid-level scientist with us at the time, 09:34:10 identified is that for the REA process, we need to 09:34:13 define the study scope for that section on the Wind 09:34:18 Facilities Report, although she doesn't mention it 09:34:22 directly, I think that's what she's talking about. 09:34:24 Q. But Section 12 of Table 1, right, 09:34:33 so the record is clear? 09:34:34	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	And the reason that's important is so 09:34:45 And the reason that's important is so 09:34:46 for the setback, for example, that you mentioned. 09:34:50 We know that in the absence of a setback 09:34:52 requirement, we need to run a model. But Section 12 of Table 1, right, 09:34:33 so the record is clear? 09:34:34 A. Right. And so what she's using 09:34:37	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	And the reason that's important is so 09:34:45 And the reason that's important is so 09:34:46 for the setback, for example, that you mentioned. 09:34:50 We know that in the absence of a setback 09:34:52 requirement, we need to run a model. 13 14 15	framework is firmly established. I think it was 09:38:11 established that, although traditionally permitting 09:38:13 was done on the Environmental Assessment Act, 09:38:16 permitting would not be done as approvals under the 09:38:18	12 13 14 15	everything with a lot of respect, so whether it's 09:39:15 published as a regulation or published as something 09:39:19 else, we know that's where everybody wants to go, so 09:39:21 we try to accommodate that. 09:39:26
13 14 15 16	framework is firmly established. I think it was 09:38:11 established that, although traditionally permitting 09:38:13 was done on the Environmental Assessment Act, 09:38:16 permitting would not be done as approvals under the 09:38:18 Approval Act, but under that Act, the regulations 09:38:21	12 13 14 15 16	everything with a lot of respect, so whether it's 09:39:15 published as a regulation or published as something 09:39:19 else, we know that's where everybody wants to go, so 09:39:21 we try to accommodate that. 09:39:26 So if somebody says in a guidance 09:39:27
13 14 15 16 17	framework is firmly established. I think it was 09:38:11 established that, although traditionally permitting 09:38:13 was done on the Environmental Assessment Act, 09:38:16 permitting would not be done as approvals under the 09:38:18 Approval Act, but under that Act, the regulations 09:38:21 have been put out, which are the REA regulations. 09:38:23	12 13 14 15 16 17	everything with a lot of respect, so whether it's 09:39:15 published as a regulation or published as something 09:39:19 else, we know that's where everybody wants to go, so 09:39:21 we try to accommodate that. 09:39:26 So if somebody says in a guidance 09:39:27 document "the preferred model is," or "acceptable 09:39:29
13 14 15 16 17	framework is firmly established. I think it was 09:38:11 established that, although traditionally permitting 09:38:13 was done on the Environmental Assessment Act, 09:38:16 permitting would not be done as approvals under the 09:38:18 Approval Act, but under that Act, the regulations 09:38:21 have been put out, which are the REA regulations. 09:38:23 Q. Uh-hmm. 09:38:26	12 13 14 15 16 17 18	everything with a lot of respect, so whether it's 09:39:15 published as a regulation or published as something 09:39:19 else, we know that's where everybody wants to go, so 09:39:21 we try to accommodate that. 09:39:26 So if somebody says in a guidance 09:39:27 document "the preferred model is," or "acceptable 09:39:29 models are" or the consultant may use this or that, 09:39:32
13 14 15 16 17 18	framework is firmly established. I think it was 09:38:11 established that, although traditionally permitting 09:38:13 was done on the Environmental Assessment Act, 09:38:16 permitting would not be done as approvals under the 09:38:18 Approval Act, but under that Act, the regulations 09:38:21 have been put out, which are the REA regulations. 09:38:23 Q. 2	minister. 09:40:05	2	Historically, new projects have, and 09:41:03
3	Some of the guidance documents 09:40:06	3	except for renewable facilities, continue to be 09:41:10
4	technically are not rules, they are guidance 09:40:07	4	permitted under the Environmental Assessment Act. 09:41:11
5	Q. I see. 09:40:10	5	The Environment Assessment act is 09:41:14
6	A but in a broad sense of the 09:40:10	6	a very open-ended process. It essentially sets out 09:41:16
7	word, it is all part of the framework that we try to 09:40:11	7	a framework for how to do consultation, how to 09:41:20
8	do the permitting under. 09:40:14	8	do environmental assessment, and how to arrive at 09:41:23
9	Q. And it's these rules not being 09:40:15	9	conclusions as to whether a project has significant 09:41:26
10	written that create the uncertainty, as you are 09:40:17	10	or does not have significant impact, and allows you 09:41:29
11	advising Windstream? 09:40:22	11	mitigation approaches for mitigating impacts such 09:41:32
12	A. Yes. As I outlined, it requires 09:40:27	12	that the project might have. 09:41:34
13	us to consult with government where otherwise we 09:40:29	13	Q. Is it fair that it is very 09:41:36
14	would simply go by the book. So for an on-shore 09:40:32	14	proponent-driven, is that 09:41:38
15	wind facility, we would not consult on that aspect. 09:40:35	15	A. It can be, not necessarily. It 09:41:40
16	We would look at the standard setback of 550 metres 09:40:37	16	depends how the environment assessment it 09:41:42
17	and proceed with the work. 09:40:40	17	depends whether you are under Class EA or under 09:41:44
18	Here there is some uncertainty with 09:40:42	18	the overall Act, but, yes, it can be very proponent 09:41:47
19	respect to exactly what the government is looking 09:40:43	19	driven. But most processes these days are very 09:41:50
20	for, and how we're supposed to do that work, and so 09:40:46	20	proponent-driven. 09:41:53
21	consultation would be required, and that's what this 09:40:50	21	But the point I'm trying to make is 09:41:54
22	refers to. 09:40:52	22	that we shifted from the Environmental Assessment 09:41:55
23	I wonder if I could just make 09:40:53	23	Act in 2009 to the Environmental Protection Act. 09:41:58
24	a comment about the transition from the 09:40:54	24	The Protection Act has been in place 09:42:00
25	Environmental Assessment Act to the 09:40:56	25	for a very long time. We've used it for many, many 09:42:02

3	not about whether a facility should be built, it is 09:42:10	3	Facilities Report. 09:43:23
4	how a facility should be built, and how the 09:42:17	4	Q. Okay. If I could get you to turn 09:43:25
5	permitting should be done. 09:42:19	5	to Tab 24, please. This is an email that you sent 09:43:27
6	So what we have typically seen 09:42:20	6	to Mr. Baines on May 13th, and for the record, it's 09:43:36
7	historically in the Environmental Protection Act is 09:42:21	7	C-0270. 09:43:40
8	a combination of the Environmental Protection Act, 09:42:23	8	A. Email on April 21st? 09:43:45
9	relevant regulations and specific standards, such as 09:42:26	9	Q. It's actually the so the next 09:43:54
10	the setbacks you are referring to. 09:42:29	10	email down from that is May 25th; do you see that? 09:44:10
11	So, in my view, the 09:42:31	11	And the next email down from that is May 21st; do 09:44:17
12	Environmental Protection Act can be very helpful 09:42:33	12	you see that? 09:44:22
13	because it provides it doesn't really ask the 09:42:37	13	A. So these are sort of out of date 09:44:35
14	question: Should a facility be built? It pretty 09:42:40	14	order, are they? 09:44:37
15	much takes for granted it will be built. It says if 09:42:44	15	Q. Yes, it doesn't follow the 09:44:38
16	we build it, what are the reasonable things that we 09:42:47	16	normal usually email chains run chronologically 09:44:39
17	can do to protect the environment? Including 09:42:51	17	back to front, but this certainly doesn't so 09:44:47
18	setback distances, including emission limits, 09:42:53	18	A. So the one we are talking about is 09:44:48

3	[As read] 09:45:07	3	are we with this?" And she wasn't getting 09:46:30
4	Do you remember saying that? 09:45:07	4	responses. 09:46:32
5	A. Yes. Yeah, I see this email. 09:45:11	5	I believe the reason she wasn't 09:46:34
6	Yes, I did say that. If I can just reconstruct the 09:45:13	6	getting the responses at that level is because that 09:46:38
7	context here a little bit for myself. 09:45:19	7	level didn't know what the answer was. And we get 09:46:40
8	Q. Yes. 09:45:31	8	that a lot if we talk to regulators and they don't 09:46:41
9	A. So this was specifically related 09:45:32	9	know what the answer is, rather than getting 09:46:44
10	to another email from Leah that is also in this set. 09:45:34	10	themselves in hot water, they don't respond. So she 09:46:46
11	Q. Right. And I think that one is 09:45:37	11	had unfortunately the experience that she wasn't 09:46:49
12	actually behind, so now you can keep flipping 09:45:38	12	getting the answers to her questions, which then led 09:46:49
13	forwards, but you will see the email this same 09:45:43	13	to the email from Paul to me saying or from Leah 09:46:52
14	email goes on, if you turn the next page, it begins 09:45:47	14	to from Leah saying that she was having trouble 09:46:56
15 16	"Paul called," this is your colleague, Paul? 09:45:49	15 16	making contact. 09:46:59
17	A. So, Paul is one of our senior 09:45:52	17	And then we took that up the chain and 09:47:00
18	engineers, and Leah was a mid-level engineer working 09:45:54 on this. 09:45:58	18	brought it to the project team and said "we need 09:47:03 some answers on some of these issues," but at the 09:47:07
19	Q. Okay. 09:45:59	19	same time we had other stuff going on. 09:47:10
20	A. Leah had made several attempts to 09:45:59	20	So if you look at that other email 09:47:12
21	contact regulatory agency folks kind of at the 09:46:02	21	that I wrote to Pearl Ing right around that time on 09:47:14
22	mid-level. That process was not working as well as 09:46:06	22	May 25th, so the fact that Leah wasn't responses 09:47:18
23	we wanted it to, and I believe the context to that 09:46:08	23	from the mid-level bureaucracy prompted me to write 09:47:21
24	was, as you'd pointed out, we didn't have a Wind 09:46:13	24	an email on May 25th to one of the director at MEI 09:47:25
25	Facilities Report documentation issued. So Leah was 09:46:18	25	saying we need attention on this. 09:47:28

	Page 46		Page 47
1	And what my sort of take-back from 09:47:31	1	to me that Doris had been briefed on the issues 09:48:38
2	that was is that when I spoke to Pearl Ing, we were 09:47:33	2	around the signing of the WI Shoals OPG contract. 09:48:40
3	getting a lot of attention, and she was being very 09:47:38	3	Q. And then you write; 09:48:48
4	helpful, but maybe because at a Director's level she 09:47:43	4	"I have learnt that we have 09:48:49

1 Q. And as you said, it was the REA 09:55:30 2 that was underway? 09:55:32 3 A. It was the – well, the REA was 09:55:33 4 underway, yes. 09:55:35 5 Q. Right. 09:55:39 6 A. But the whole emphasis was trying 09:55:39 7 to get this project done. The drive was to get all 09:55:40 8 the documentation on the table, so of course we're 09:55:43 9 concerned about issues that they may be working on 09:55:49 10 that they haven't put on the table yet, and we're 09:55:48 11 concerned about not having dialogue, as I said in 09:55:51 12 that email. 09:55:53 13 Q. Okay, thank you. Now, Id also 09:55:53 14 just like to come back for a second to the way you 09:56:04 15 had – you helpfully sort of described the context 09:56:08 16 around the EA and the REA, and I was left with the 09:56:08 17 impression that the REA — 09:56:20 18 stamp, that you would get it? 09:56:21 29 Q. That REA. 09:56:21 20 What I am saying is that the 09:56:30 21 Environmental Protection Act is mostly about 09:56:31 22 What I am saying is that the 09:56:30 23 Environmental Protection Act is mostly about 09:56:31 24 regulating how a facilities operated and built, and 09:56:34 25 that was under the oprisons that the standards, it is very 09:56:46 26 closely related to a pragmatic way of doing things. 09:56:49 27 closely related to a pragmatic way of doing things. 09:56:49 28 over the years hundreds of approvals under the 09:56:55 29 covers hundreds of approvals under the 09:56:55 20 Environmental Protection Act, and I was of approval for granted. 09:57:20 20 Mr Chamberlain, and Mr. – or Ian and Nancy Baines. 09:57:32 21 Have a look at the third paragraph on 09:57:53 22 What I am saying is that the 09:56:31 23 Environmental Protection Act is mostly about 09:56:31 24 regulating how a facilities operated and built, and 09:56:34 25 descent paragraph on 09:57:54 26 discely related to a pragmatic way of doing things. 09:56:49 27 over the years hundreds of approvals under the 09:56:49 28 care have done literally in our shop 09:56:49 29 concerned about insended and	25	under the REA wouldn't apply to your project, would 09:54:11	25	rules, so there was a lot going on obviously 09:55:28
that was underway? A. It was the well, the REA was 09:55:33 A. It was the well, the REA was 09:55:33 We are have done literally in our shop 09:56:49 over the years hundreds of approvals under the 09:56:52 Environmental Protection Act. And I would never say 09:56:55 that an approval is a done deal, but the success 09:56:58 rate is very high. 09:57:02 8 the documentation on the table, so of course we're 09:55:43 oconcerned about issues that they may be working on 09:55:45 that they haven'p put on the table yet, and we're 09:55:48 concerned about not having dialogue, as I said in 09:55:51 that email. 09:55:53 Q. Okay, thank you. Now, I'd also 09:55:53 Q. Okay, thank you. Now, I'd also 09:56:04 impression that the REA is nothing but a rubber 09:56:19 A. Sorry, that the REA — 09:56:20 Q. That REA. 09:56:21 A. 1	Do you see that? 09:58:03	1	five years, which allowed us to do the fieldwork 09:59:16
2	A. Yes, I see that. 09:58:12	2	that was contemplated here in this email. 09:59:19
3	Q. And do you recall writing that you 09:58:13	3	We ended up planning for 2011, taking 09:59:21
4	desperately need input from the scientists at MNR, 09:58:16	4	the pressure off the issues that we were desperate 09:59:25
5	that you may need to bring in an REA consultant; 09:58:19	5	about in June 7th, 2010. 09:59:30
6	i.e., to award a contract? 09:58:21	6	Q. Okay, we'll come back to the 2011. 09:59:32
7	A. Yeah, I think I very much said 09:58:25	7	We will just sort of proceed chronologically I think 09:59:35
8	that. I just want to give a little bit of context. 09:58:28	8	is the probably I think the easiest way for 09:59:39
9	So this is June 7th of 2010. At that 09:58:30	9	everybody to follow. 09:59:40
10	time the FIT contract had been offered with 09:58:33	10	At Tab 23, you will find document 09:59:41
11	a 48-month timeline. The project plan you referred 09:58:35	11	number R-0118, and this is the June 25, 2010 policy 09:59:44
12	to earlier, which is in this documentation, outlined 09:58:39	12	notice that MOE publishes. I have no doubt you 09:59:54
13	that 48-months plan, and we said that's a tight 09:58:42	13	recognize this document. 09:59:58
14	timeline. 09:58:45	14	MS. SEERS: Pardon me, Mr. Neufeld. 10:00:18
15	To meet that 4-year timeline that was 09:58:49	15	If you would repeat the tab number you are referring 10:00:20
16	in place prior to it being extended to five years 09:58:52	16	to. 10:00:22
17	meant it was really important to get fieldwork off 09:58:56	17	BY MR. NEUFELD: 10:00:22
18	the ground in the summer of 2010. So it is June; 09:58:58	18	Q. Twenty-three. I think we've all 10:00:23
19	it's prime time for fieldwork. We are sitting there 09:59:02	19	got this one memorized by now - 10:00:23
20	saying we need to get crews out in the field to do 09:59:04	20	A. So this, I believe, was the 10:00:26
21	fieldwork, we have only got four years to complete 09:59:06	21	document that came out at the same time as the 10:00:27
22	the project. 09:59:08	22	consultation posting on the EBR for the proposed 10:00:29
23	The way this played out in the end was 09:59:08	23	five-kilometre setback. 10:00:33
24	that when the contract was signed later in August, 09:59:10	24	Q. Right. If you look at the second 10:00:34
25	a couple of months later, it was actually amended to 09:59:14	25	full paragraph there, please, it reads: 10:00:38

14	offshore wind specific 10:01:01	13	A. Well, I would define that my 10:01:49
15	requirements under the REA 10:01:03	14	interpretation of what was going on June 25th, so 10:01:52
16	Regulation. This approach 10:01:04 will also be supplemented by 10:01:07	15	on prior to June 25th, if you follow some of the 10:01:56
17	the outcome of the research 10:01:09	16	emails that were going back and forth among the 10:02:00
18	underway by MOE, MNR, Tourism 10:01:10	17	project team, we often referred to it that the we 10:02:02
19	and Culture. It will be 10:01:15	18	had been told that the government on June 25th was 10:02:07
20	subject to the subsequent 10:01:17	19	coming out with rules. 10:02:09
21	environmental registry 10:01:19	20	When June 25th actually arrived, and 10:02:14
22	postings that will outline 10:01:21	21	we saw these documents, what the government actually 10:02:17
23	requirements for offshore 10:01:23	22	came out with was a consultation process, which 10:02:19
24	wind development as proposed 10:01:24	23	actually gave me significant amount of comfort, 10:02:22
25	amendments to the 10:01:27	24	because what I was afraid of prior to June 25th was 10:02:24
		25	that the government would make some set out some 10:02:28

Page 60 Page 61 1 1 technical specifications or set out requirements 10:02:32 MOE was looking at specifically issues relevant to 10:03:40 2 2 without getting industry input, without knowing if 10:02:34 MOE, including a noise setback of the 10:03:43 3 3 that the things they were asking for were doable or 10:02:36 five kilometres, which I thought was overkill, but 10:03:45 4 4 10:02:39 a five-kilometre noise setback. And MNR was looking 10:03:48 not doable. 5 5 What they finally did come out with on 10:02:40 at other requirements. MNR is responsible for 6 6 June 25th was actually very reasonable; they came 10:02:43 certain aspects of the Natural Heritage, and MOE is 10:03:56 7 7 out with a consultation process. They also came out 10:02:45 responsible for other pieces. MOE is responsible 10:03:59 8 with communication at the time saying -- I'd have to 10:02:48 8 for noise, MNR is responsible for the fish, and, to 10:04:01 9 9 go back and look at more documentation, but it was 10:02:50 me, this was MNR's working on specific research and 10:04:03 10 10 there was a timeframe to this consultation process, 10:02:52 guidance related to the stuff that's of interest to 10:04:08 11 there was a timeframe that I think by September of 10:02:55 11 MNR --10:04:12 12 12 2010 they will conclude this consultation process. 10:02:58 Q. Not an amendment to the regulation 10:04:13 13 10:03:01 13 10:04:16 Q. Right. or ... 14 14 A. So I actually viewed this 10:03:01 A. I can't tell you at the time if 10:04:20 15 15 consultation process as fairly positively. I think 10:03:03 I would have interpreted it as being an amendment. 10:04:21 16 this word "approach" is not -- not really -- doesn't 10:03:05 16 I'd have to speculate sort of how I would have 10:04:24 17 mean high-level approach, I don't believe that. 17 thought they would have implemented it. 10:04:28 18 To me, the site release policy was in 10:03:16 18 Q. Yes, and you'd be speculating. 10:04:30 19 place. We had the REA regulation in place. What 10:03:18 19 A. Remember, under REA, which was the 10:04:31 20 20 was missing at the time was technical guidance. So, 10:03:25 one that we were most concerned about, they were 10:04:33 21 21 you'd have to ask whoever wrote this what they meant 10:03:29 talking about the Wind Facilities Report. 10:04:35 22 22 10:03:31 Q. Uh-hmm. to say. 10.04.37 23 23 To me, this read as we're working on 10:03:32 A. And, in my mind, it was all about 10:04:38 24 24 the technical guidance both at MNR, and that's what 10:03:35 providing more meat and more clarification on that 10:04:39 25 the MNR posting was about, as well as at MOE, and 10:03:37 25 Section 12 related to the Wind Facilities Report. 10:04:42 Page 62 Page 63 1 1 Q. So, this is how laws are made, 10:04:46 an opportunity to contribute, and it also allows the 10:05:53 2 2 through this process of consultation in our province 10:04:49 regulatory staff themselves to work on it and listen 10:05:56 3 3 in particular, correct? You've seen this before 10:04:53 to what people have to say, and that's what the 10:06:00 4 this? 10:04:54 4 context of this document was. 10:06:03 5 A. This is our process. 10:04:55 5 Q. So, again, just to go back to that 10:06:14 6 Q. And consulting truly means 10:04:57 6 paragraph, where it says that "It will outline 10:06:16 7 consulting, does it not? I mean you're not -- they 10:05:00 7 requirements for offshore wind development," you 10:06:18 8 weren't simply putting up a rule that, irrespective 10:05:04 8 just viewed that as the technical studies and 10:06:21 9 of what people said, they were going to adopt? 9 guidelines, you didn't -- even though it says "as 10:06:24 1.0 Wouldn't that -- wouldn't you agree 10:05:12 10 proposed amendments to the regulations"? 10:06:29 11 with that? 10:05:13 11 A. I think, as I was trying to say 10:06:32 12 A. I'm no environmental lawyer. I'm 10:05:17 12 before, as a practitioner, I'm not as a lawyer, 10:06:33 13 an environmental practitioner from an engineering 10:05:19 13 I don't try to distinguish necessarily between the 10:06:36 14 side, so pardon my simplistic views of the world, 10:05:22 14 legal enforceability of the Act versus a regulation, 10:06:39 15 but I believe the government has certain authority 10:05:27 15 versus a standard, but if MNR were to come back and 10:06:42 16 to put certain rules on the EBR if it chooses to. 10:05:29 16 tell me that they want to see a 120-metre setback 10:06:44 17 The more common approach that we 10:05:35 17 from wetlands, which they did for the on-shore wind, 10:06:47 18 follow in Ontario is that the government does 10:05:36 18 I would respect that as a rule. 10:06:50 19 a consultation process just like this prior to 10:05:38 19 10:06:52 Q. Okay. 20 rolling out the rules, and it affords everybody 10:05:40 20 A. And, similarly, if MOE were to 10:06:54 21 input and so --10:05:46 21 come back after consultation process and say we want 10:06:55 22 Q. Including all the NIMBYs? 10:05:48 22 an X-kilometre setback from noise receptors, we 10:07:00 23 A. And industry, yeah. 10:05:50 23 would respect that. 24 Q. And industry? 10:05:51 24 Q. And the consultation process here 10:07:08 25 A. It affords everybody 10:05:52 25 was much broader than noise, right? I mean if you 10:07:09

	Page 64		Page 65

2	accompanies this EBR posting. Have you found that 10:07:15	2	a lawyer, but this is a pretty clear sign, isn't it? 10:08:13
3	there? 10:07:39	3	A. Yeah, and we would have respected 10:08:17
4	A. Uh-hmm. 10:07:39	4	them whether they came out as standards or as an 10:08:18
5	Q. And if you could look at the third 10:07:40	5	amendment to the regulation. It wouldn't have 10:08:20
6	paragraph on the first page it notes that: 10:07:40	6	really I don't think it would have mattered to 10:08:22
7	"Feedback will inform our 10:07:44	7	us. 10:08:23
8	work to more fully develop 10:07:46	8	Q. And chief among them was this 10:08:23
9	the approach and offshore 10:07:48	9	proposal for this minimum shoreline exclusion of 10:08:25
10	wind specific-requirements 10:07:49	10	five kilometres, correct? 10:08:27
11	that will be articulated as 10:07:52	11	A. That was the that was the core 10:08:28
12	amendments to the REA. Once 10:07:54	12	of that consultation on the 25th, yes. 10:08:31
13	fully developed, the proposed 10:07:54	13	Q. Okay. Was it clear what that 10:08:33
14	policy and associated 10:07:54	14	meant, as proposed? I mean it wasn't finalized, 10:08:42
15	regulatory amendments will be 10:07:54	15	but 10:08:43
16	the subject of a future 10:07:54	16	A. No, it was not clear because the 10:08:44
17	environmental registry 10:07:54	17	five-kilometre setback wasn't defined, what was 10:08:45
18	posting that will outline 10:07:54	18	meant by "shoreline." 10:08:47
19	requirements for offshore 10:07:54	19	Q. But it doesn't use the word 10:08:48
20	wind developments as proposed 10:07:54	20	"shoreline" there, it uses "from the water's 10:08:50

22	regulation." [as read] 10:07:56	22	A. Right. 10:08:55
23	You see all that? 10:08:09	23	Q right? Isn't that pretty 10:08:55
24	A. Yes. 10:08:09	24	clear? 10:08:57
25	Q. So wasn't this an indication that 10:08:10	25	A. Do you see a difference between 10:08:57
	Page 66		Page 67
1	shoreline and water's edge? May you can 10:09:00	1	in REA's industry would have had input to that 10:09:57
2	Q. I don't want to get wet when 10:09:01	2	process and pointed out issues that we saw with the 10:10:00
3	I walk in the water. 10:09:03	3	application of that. 10:10:04
4	A. Okay, water's edge. 10:09:04	4	And I think the important part is it 10:10:07
5	Q. At the top of page 2, you will see 10:09:06	5	was a consultation, and that's how we treated it. 10:10:10
6	those exact words, right? That's where it says: 10:09:07	6	Q. Okay, thank you. Now, if I could 10:10:12
7	"The proposed shoreline 10:09:11	7	take you to Tab 17, this is document C-0324, and 10:10:17

5	obtuse than that, and the position we were taking is 10:22:12	5	edge? It's funny because all of your reports say 10:23:22
6	the Environmental Protection Act is about impacts on 10:22:15	6	that 10:23:27
7	receptors. There is a lot of guidance literature on 10:22:20	7	A. I read it as shoreline, and maybe 10:23:27
8	impacts and receptors under the 10:22:25	8	that's because we have other shoreline stuff in 10:23:29
9	Environmental Protection Act. And our 10:22:29	9	other parts of the regulatory system. 10:23:31
10	recommendation in the consultation process is get in 10:22:29	10	Q. Right. But all of your reports 10:23:32
11	that direction, which is if you have an uninhabited 10:22:33	11	through 2010 maybe just walk through every single 10:23:33
12	island, why are we doing a five-kilometre setback 10:22:36	12	of them the project layout that you use respects 10:23:35
13	when we are talking about the 10:22:40	13	a five kilometres, so you seem to up to until then? 10:23:38
14	Environmental Protection Act, and we are talking 10:22:43	14	A. We tried to so in that context 10:23:41
15	about impacts on receptors and we are talking about, 10:22:44	15	we knew the stuff was coming in the summer of 2010. 10:23:43
16	you know, setting standards? 10:22:46	16	We knew something was coming. We didn't know what 10:23:46
17	Q. Uh-hmm. 10:22:48	17	the outcome of the consultation process would be. 10:23:48
18	A. And so our comment here in this 10:22:48	18	We didn't know to what extent or how it would apply, 10:23:51
19	context is there are, and there were present in this 10:22:51	19	but we're trying to look at the project and say if 10:23:55
20	project, features in the natural environment that 10:22:54	20	there really is a five-kilometre setback, how do we 10:23:57
21	don't contain receptors that could get caught up in 10:22:58	21	meet it, if it does apply to the project? 10:24:00
22	a broad and not well-thought-out definition. 10:23:02	22	Q. Okay. 10:24:02
23	Q. Uh-hmm. 10:23:08	23	A. So the project team obviously was 10:24:02
24	A. I read the definition of 10:23:08	24	working on solutions to overcome potential guidance 10:24:04
25	shorelines from the Great Lakes as a pretty loose 10:23:09	25	documentation, whether it's a rule or standard. 10:24:09

Then on page 12, you have 10:26:24 Figure 3, which illustrates the new layout that 10:26:27

	Page 80		Page 81
1	And you see there, according to the 10:26:40	1	uninhabited and uninhabitable points, which you had 10:27:52
2	legend, the thick yellow line it represents 10:26:42	2	had in your proposal, right? So that's one reason 10:27:56
3	a five-kilometre line as well, but there it's 10:26:46	3	that the shoreline edge suddenly changes. And the 10:27:59
4	a shoreline buffer in the figure, right, which is 10:26:50	4	other reason is because you're using a mean 10:28:01
5	different than a hard five kilometres from the 10:26:53	5	five-kilometre setback, right, as opposed to a hard 10:28:04
6	shore; isn't that right? 10:26:55	6	five-kilometre setback? 10:28:08
7	A. Yes. So we you have to 10:26:57	7	A. I believe so, yes. 10:28:10
8	understand the context that on June 25th we got 10:26:59	8	Q. So on that logic 10:28:11
9	a consultation on a setback, which is supposed to 10:27:04	9	A. So these particular drawings are 10:28:13
10	end in September some time. It was our expectation 10:27:08	10	done by our GIS staff, but, yes, that's roughly how 10:28:15
11	that that issue would be clarified. Two years - 10:27:13	11	they're done. 10:28:18
12	what is it three, four years later, that still 10:27:17	12	Q. But a mean, just to sort of 10:28:18
13	hasn't been rolled out, so we still don't know what 10:27:20	13	verbalize this, a mean setback would mean if you had 10:28:23
14	that requirement is. 10:27:23	14	one on the shore and one turbine on the shore and 10:28:27
15	So I think all these layouts that we 10:27:24	15	one turbine at ten kilometres, you would reach 10:28:30
16	did, we had to do speculating on what the 10:27:27	16	a mean of five-kilometre setback; is that right? 10:28:32
17	requirement might or might not be. 10:27:30	17	I didn't hear a "yes" or "no," I just saw you nod. 10:28:38
18	At the time the process was going on 10:27:32	18	Is that what you were about to say? 10:28:42
19	in 2010, we thought it was going to be made very 10:27:33	19	You said "Yes"? 10:28:44
20	clear what it would be and whether it would apply to 10:27:36	20	A. Yes, I believe so. 10:28:46
21	this project and how we would apply it. But because 10:27:40	21	Q. Okay. And there is only one 10:28:49
22	it was never rolled out, I don't think that it's 10:27:42	22	reason for making that change to the 2015 layout, 10:28:51
23	been rolled out to this date 10:27:45	23	isn't there? It's that you wouldn't have been able 10:28:55
24	Q. And the two changes, in 10:27:47	24	to fit all the turbines on the project site; isn't 10:28:57
25	particular, to this; one is to respect this idea of 10:27:49	25	that right? 10:29:00

So we worked on various iterations of the 10:29:06 layout, and we shuffled turbines on numerous 10:29:09 occasions, and as some of the earlier layouts had 10:29:15 actually optional turbine locations, some have only 10:29:20 the intended turbine locations. 10:29:23 I would actually have to spend 10:29:25 a little bit more time examining each one of these 10:29:28 drawings to be sure. 10:29:31 Q. Okay. So, I have one last area to 10:29:32 cover. Did you want to break or should we - 10:29:44 PRESIDENT: It's up to you, 10:29:47 Mr. Neufeld. How long do you think you will still 10:29:48 need? 10:29:52 MR. NEUFELD: Probably, oh, 20 minutes 10:29:54 at the most, I would say. 10:29:57 PRESIDENT: Why don't we go and we'll 10:29:59 have a break then after your examination. 10:30:00 MR. 5	Do you see that? 10:31:27	5	spring of 2010, so I think back to context of what 10:32:46
6	MS. NETTLETON: Should it be the 10:31:28	6	happened at certain times, when the FIT contract was 10:32:51
7	page that's on the screen? 10:31:30	7	first offered, we'd actually gone out and consulted 10:32:54
8	PRESIDENT: This is page 1 of 7. 10:31:35	8	with several firms to get spring fieldwork underway. 10:32:56
9	THE WITNESS: One of 7. That's the 10:31:38	9	That didn't happen. 10:33:01
10	first one I had. The two sets of pages in that 10:31:39	10	And when the contract was signed we 10:33:04
11	document, one to 7, and the other one is 1 to 16, so 10:31:46	11	had the contract was signed in August for the 10:33:06
12	it's a little confusing. 10:31:51	12	five-year extension. Then gave us a master plan 10:33:09
13	BY MR. NEUFELD: 10:31:55	13	that said fieldwork will be in 2011, and this 10:33:13
14	Q. That's why I'm mixed up here. 10:31:55	14	procurement in the fall of 2010 is the procurement 10:33:16
15	A. That's why I asked 1 of 7 or 1 of 10:31:57	15	call to environmental assessment firms to assist 10:33:21

17	Q. I see. I see. 10:32:00	17	the winter and next summer of 2010 2011. 10:33:28
18	A. So say it again. 10:32:02	18	Q. Okay, proposals were to be 10:33:30
19	Q. It's got to be right up at the 10:32:03	19	submitted by November 26th; does that sound about 10:33:32
20	front, right? 10:32:04	20	right? 10:33:35
21	PRESIDENT: I think you were referring 10:32:06	21	A. It sounds right. 10:33:35

Yeah, again, as I earlier, that 10:35:04 email referring to the "desperately needing input" 10:35:09 was written in the May — June timeframe. At that 10:35:14 time, we thought we had four years to complete the 10:35:16 project. We then in August found out that there 10:35:18 were five years to complete the project, and this 10:35:20 procurement was done under the new five-year 10:35:22 timeline, anticipating that fieldwork would happen 10:35:25
3 4 5 6 7 8 9 10 11 12 13 14	I think there was a little misconception about that 10:33:48 at the beginning, that there was a reference to 10:33:50 Stantec, but you haven't hired them as of well, 10:33:52 at all, have you? You were about to hire Stantec? 10:33:55 A. Honestly, I'd have to check that 10:33:59 I don't think we did, but I'd have to check that 10:34:00 fact. 10:34:03 Q. Okay. It was on 10:34:03 February 17th that you had planned to do the hiring 10:34:06 based on this RFP? 10:34:12 A. I think for the RFP, yes. CEAA is the Canadian Environmental 10:38:43 Assessment Act. It gets triggered whenever you 10:38:45 trigger something of federal jurisdiction. And 10:38:50 federal jurisdiction includes things such as 10:38:53 Crown-owned land, in which case we had Pigeon 10:38:55 Island, or areas of administrative jurisdiction, 10:38:59 such as navigable waters, as you mentioned, so we 10:39:02 had in the area some shipping lanes, we are dealing 10:39:07 potentially with port facilities, fisheries. 10:39:09	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Project on-shore was carried out in 2008, 2009, when 10:39:26 it was being prepared, which was a project I worked 10:39:31 on in the early stages. It required a CEAA, and the 10:39:34 CEAA was actually carried out in that case by 10:39:37 Enercan on behalf of the projects. Actually, the 10:39:41 government did it for the proponent. 10:39:44 Q. You may also have required 10:39:48 a permit from Environment Canada on migratory birds; 10:39:52 is that possible? 10:39:56 A. Yeah. Again, I would defer for 10:39:57 the bird and bat stuff, I would really refer to what 10:40:00 the proposals were telling us that we were 10:40:03 soliciting, so 10:40:06 Q. So you didn't know yet by February 10:40:06 of 2011? 10:40:08 A. I mean birds are on the one 10:40:09 hand, birds are a significant issue for wind 10:40:11 projects, you know, at large everywhere. 10:40:13 Birds are a core issue. We have, on 10:40:18 an offshore facility most on-shore all 10:40:23

Now my colleagues reminded me, and 10:38:32 this is a good idea for the Tribunal in particular. 10:38:32 We use the Canadian term, the CEAA, but it is 10:38:33 probably helpful to pause on it for a minute to 10:38:38 explain what the CEAA is? 10:38:41 A. 19	A. I don't know. 10:41:45	19	you to it? 10:42:43
20	Q. And did you consult with 10:41:46	20	A. Yeah, that was certainly our view, 10:42:44
21	Environment Canada at least on the Boundary Waters 10:41:50	21	certainly on a consultation perspective again. 10:42:45
22	Treaty? The RFP notes as well that a review through 10:41:50	22	I don't think we necessarily had the view that the 10:42:48

2	more clear. MOE is actually supposed to send you a 10:45:07	2	being adopted would apply retroactively to the 10:47:43
3	list. My understand is, from other files that we've 10:45:08	3	project, and we I think we cleared that up when 10:47:47
4	worked on, MOE actually the REA requires us to 10:45:09	4	you said, no, no, I understand that the REA 10:47:50
5	send out letters and notifications to the affected 10:45:12	5	changes to the REA were underway as of 10:47:54
6	communities. But MOE, I believe, also does on their 10:45:15	6	September 2009, and that it was to become the final 10:47:58
7	own letterhead, so I think it's actually done twice. 10:45:20	7	REA; isn't that fair? 10:48:07
8	But, yes, of course a consultation is required on 10:45:23	8	A. As I said, I don't know if the 10:48:14
9	all projects in Ontario. 10:45:25	9	government contemplated to change the regulation, 10:48:17
10	Q. Okay, thank you. If I could just 10:45:27	10	which is a much bigger step than changing the 10:48:19
11	have one second, I think it looks like I have one 10:45:28	11	standards, requirements or guidance documentation. 10:48:23
12	more question. I'm not sure yet. 10:45:31	12	So I have no view on how technically 10:48:27
13	One more question. 10:47:09	13	it would have been implemented in a regulatory 10:48:32
14	PRESIDENT: You are still below the 20 10:47:11	14	setting, other than that we would have we would 10:48:34
15	minutes you indicated. 10:47:12	15	have tried to work with whatever they rolled out if 10:48:39
16	BY MR. NEUFELD: 10:47:13	16	it retroactively applied to the project. 10:48:42
17	Q. Perfect. This takes us back to 10:47:14	17	Q. Okay, and if you hadn't applied to 10:48:45
18	the conversation we were having earlier about the 10:47:16	18	the REA, the issue of retrospective applications is 10:48:48
19	REA process, and you did confirm that it is not 10:47:18	19	neither here nor there, is it? 10:48:53
20	a rubber stamp, but I guess we need to clarify 10:47:21	20	A. Well, I don't know, because 10:48:58
21	something else. 10:47:24	21	I don't know how they would have rolled it out or 10:48:59
22	So the REA process was underway, and 10:47:27	22	what they would have done. We've seen some new 10:49:02
23	therefore would be there would be no retroactive 10:47:31	23	requirements like modelling requirements, for 10:49:04
24	application, right? 10:47:34	24	example, have been rolled out by Standards Branch 10:49:06
25	I mean it was you had said the REA 10:47:35	25	that came into effect at certain points in the 10:49:09

2 3 4	future. So, we've had I would struggle to give 10:49:11 you a specific example, but I think when we look at 10:49:17 the air quality modelling, air models, when they 10:49:20 were brought in over a seven-year time span, we had 10:49:25 future timelines when certain things would come into 10:49:28	2 3	and rules change along the way. But here we have 10:50:27 a very different process where you apply for an REA, 10:50:30 correct? 10:50:33 Isn't that how the world changed from 10:50:33 the EA to the REA? 10:50:35
2 3 4 5	future. So, we've had I would struggle to give 10:49:11 you a specific example, but I think when we look at 10:49:17 the air quality modelling, air models, when they 10:49:20 were brought in over a seven-year time span, we had 10:49:25 future timelines when certain things would come into 10:49:28 force and effect. 10:49:30	2 3 4 5	and rules change along the way. But here we have 10:50:27 a very different process where you apply for an REA, 10:50:30 correct? 10:50:33 Isn't that how the world changed from 10:50:33 the EA to the REA? 10:50:35 A. The processes, in my mind, are 10:50:38
2 3 4 5 6	future. So, we've had I would struggle to give 10:49:11 you a specific example, but I think when we look at 10:49:17 the air quality modelling, air models, when they 10:49:20 were brought in over a seven-year time span, we had 10:49:25 future timelines when certain things would come into 10:49:28 force and effect. 10:49:30 When the Toxic Reductions Act was put 10:49:31	2 3 4 5 6	and rules change along the way. But here we have 10:50:27 a very different process where you apply for an REA, 10:50:30 correct? 10:50:33 Isn't that how the world changed from 10:50:33 the EA to the REA? 10:50:35 A. The processes, in my mind, are 10:50:38 very similar functionally, in that both have 10:50:40
2 3 4 5 6 7	future. So, we've had I would struggle to give 10:49:11 you a specific example, but I think when we look at 10:49:17 the air quality modelling, air models, when they 10:49:20 were brought in over a seven-year time span, we had 10:49:25 future timelines when certain things would come into 10:49:28 force and effect. 10:49:30 When the Toxic Reductions Act was put 10:49:31 into place, we had specific timelines, and they are 10:49:35	2 3 4 5 6 7	and rules change along the way. But here we have 10:50:27 a very different process where you apply for an REA, 10:50:30 correct? 10:50:33 Isn't that how the world changed from 10:50:33 the EA to the REA? 10:50:35 A. The processes, in my mind, are 10:50:38 very similar functionally, in that both have 10:50:40 a commencement date, and both have similar processes 10:50:43
2 3 4 5 6 7	future. So, we've had I would struggle to give 10:49:11 you a specific example, but I think when we look at 10:49:17 the air quality modelling, air models, when they 10:49:20 were brought in over a seven-year time span, we had 10:49:25 future timelines when certain things would come into 10:49:28 force and effect. 10:49:30 When the Toxic Reductions Act was put 10:49:31 into place, we had specific timelines, and they are 10:49:35 still going on, that were set out years ahead of 10:49:41	2 3 4 5 6 7 8	and rules change along the way. But here we have 10:50:27 a very different process where you apply for an REA, 10:50:30 correct? 10:50:33 Isn't that how the world changed from 10:50:33 the EA to the REA? 10:50:35 A. The processes, in my mind, are 10:50:38 very similar functionally, in that both have 10:50:40 a commencement date, and both have similar processes 10:50:43 for data collection, consultation and so on. So I'm 10:50:48
2 3 4 5 6 7 8 9	future. So, we've had — I would struggle to give 10:49:11 you a specific example, but I think when we look at 10:49:17 the air quality modelling, air models, when they 10:49:20 were brought in over a seven-year time span, we had 10:49:25 future timelines when certain things would come into 10:49:28 force and effect. 10:49:30 When the Toxic Reductions Act was put 10:49:31 into place, we had specific timelines, and they are 10:49:35 still going on, that were set out years ahead of 10:49:41 time. So I don't think it's implied at all that 10:49:43	2 3 4 5 6 7 8	and rules change along the way. But here we have 10:50:27 a very different process where you apply for an REA, 10:50:30 correct? 10:50:33 Isn't that how the world changed from 10:50:33 the EA to the REA? 10:50:35 A. The processes, in my mind, are 10:50:38 very similar functionally, in that both have 10:50:40 a commencement date, and both have similar processes 10:50:43 for data collection, consultation and so on. So I'm 10:50:48 not sure if I understand the question. 10:50:52
2 3 4 5 6 7 8 9	future. So, we've had — I would struggle to give 10:49:11 you a specific example, but I think when we look at 10:49:17 the air quality modelling, air models, when they 10:49:20 were brought in over a seven-year time span, we had 10:49:25 future timelines when certain things would come into 10:49:28 force and effect. 10:49:30 When the Toxic Reductions Act was put 10:49:31 into place, we had specific timelines, and they are 10:49:35 still going on, that were set out years ahead of 10:49:41 time. So I don't think it's implied at all that 10:49:43 it's necessarily retroactive. 10:49:46	2 3 4 5 6 7 8 9	and rules change along the way. But here we have 10:50:27 a very different process where you apply for an REA, 10:50:30 correct? 10:50:33 Isn't that how the world changed from 10:50:33 the EA to the REA? 10:50:35 A. But the actual application is what 10:50:56 will trigger the department, the Ministry, to 10:50:58 consider the rules that would apply and then apply 10:51:03 them? 10:51:05 A. Yeah, but the application in the 10:51:06 REA process was made fairly late, so 10:51:11 upfront and then apply? 10:51:13
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	future. So, we've had I would struggle to give 10:49:11 you a specific example, but I think when we look at 10:49:17 the air quality modelling, air models, when they 10:49:20 were brought in over a seven-year time span, we had 10:49:25 future timelines when certain things would come into 10:49:28 force and effect. 10:49:30 When the Toxic Reductions Act was put 10:49:31 into place, we had specific timelines, and they are 10:49:35 still going on, that were set out years ahead of 10:49:41 time. The processes, in my mind, are 10:50:38 very similar functionally, in that both have 10:50:40 a commencement date, and both have similar processes 10:50:43 for data collection, consultation and so on. So I'm 10:50:48 not sure if I understand the question. 10:50:52 Q. But the actual application is what 10:50:56 will trigger the department, the Ministry, to 10:50:58 consider the rules that would apply and then apply 10:51:03 them? 10:51:05 A. Yeah, but the application in the 10:51:06 REA process was made fairly late, so 10:51:11 upfront and then apply? 10:51:13 A. The REA sets out very carefully 10:51:16
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	future. So, we've had I would struggle to give 10:49:11 you a specific example, but I think when we look at 10:49:17 the air quality modelling, air models, when they 10:49:20 were brought in over a seven-year time span, we had 10:49:25 future timelines when certain things would come into 10:49:28 force and effect. 10:49:30 When the Toxic Reductions Act was put 10:49:31 into place, we had specific timelines, and they are 10:49:35 still going on, that were set out years ahead of 10:49:41 time. So I don't think it's implied at all that 10:49:43 it's necessarily retroactive. 10:49:46 What happens quite often is that there 10:49:49 will be there is an implementation plan and 10:49:50 schedule along with those requirements, and I'm 10:49:54 and I hazard to guess as to what it is. 10:49:57 We made the conservative assumption as 10:49:59 project managers, that there could be new rules 10:50:02 rolled out, that we didn't know exactly what the 10:50:04 wording was, and that it might effect different 10:50:07 layouts, and which you pointed to that we did 10:50:09	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	and rules change along the way. The processes, in my mind, are 10:50:38 very similar functionally, in that both have 10:50:40 a commencement date, and both have similar processes 10:50:43 for data collection, consultation and so on. So I'm 10:50:48 not sure if I understand the question. 10:50:52 Q. But the actual application is what 10:50:56 will trigger the department, the Ministry, to 10:50:58 consider the rules that would apply and then apply 10:51:03 them? 10:51:05 A. Yeah, but the application in the 10:51:06 REA process was made fairly late, so 10:51:11 upfront and then apply? 10:51:13 A. The REA sets out very carefully 10:51:16 what the steps are. I'd be happy to go back and 10:51:18
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	future. So, we've had I would struggle to give 10:49:11 you a specific example, but I think when we look at 10:49:17 the air quality modelling, air models, when they 10:49:20 were brought in over a seven-year time span, we had 10:49:25 future timelines when certain things would come into 10:49:28 force and effect. 10:49:30 When the Toxic Reductions Act was put 10:49:31 into place, we had specific timelines, and they are 10:49:35 still going on, that were set out years ahead of 10:49:41 time. So I don't think it's implied at all that 10:49:43 it's necessarily retroactive. 10:49:46 What happens quite often is that there 10:49:49 will be there is an implementation plan and 10:49:50 schedule along with those requirements, and I'm 10:49:54 and I hazard to guess as to what it is. 10:49:57 We made the conservative assumption as 10:49:59 project managers, that there could be new rules 10:50:02 rolled out, that we didn't know exactly what the 10:50:07 layouts, and which you pointed to that we did 10:50:09 different versions of layout simply because we 10:50:12	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	and rules change along the way. But here we have 10:50:27 a very different process where you apply for an REA, 10:50:30 correct? 10:50:33 Isn't that how the world changed from 10:50:33 the EA to the REA? 10:50:35 A. The processes, in my mind, are 10:50:38 very similar functionally, in that both have 10:50:40 a commencement date, and both have similar processes 10:50:43 for data collection, consultation and so on. So I'm 10:50:48 not sure if I understand the question. 10:50:52 Q. But the actual application is what 10:50:56 will trigger the department, the Ministry, to 10:50:58 consider the rules that would apply and then apply 10:51:03 them? 10:51:05 A. Yeah, but the application in the 10:51:06 REA process was made fairly late, so 10:51:11 upfront and then apply? 10:51:13 A. The REA sets out very carefully 10:51:16 what the steps are. I'd be happy to go back and 10:51:18 look at them

2	much later in the plan in schedule. 10:51:35	2	We will come to those in a moment. 11:10:29
3	Q. Okay, thank you. 10:51:38	3	Mr. Roeper, good morning. I apologize. I've 11:10:30
4	PRESIDENT: Thank you very much. 10:51:40	4	forgotten my binder. 11:10:36
5	I suggest we now break for 15 minutes, and if there 10:51:41	5	A. No shortage of binders here. 11:10:48
6	is redirect, we can do it after the break. So we 10:51:44	6	Q. That's for sure. We're only 11:10:51
7	will continue at 11:05. 10:51:49	7	getting started. 11:10:52
8	If I could ask Mr. Roeper, if could 10:51:52	8	You will recall, Mr. Roeper, that 11:10:53
9	you not speak with anybody about your testimony. 10:51:53	9	Mr. Neufeld asked you some questions about the REA 11:10:55
10	I understand there is a room reserved for you where 10:51:57	10	Regulation, and how it applied to offshore wind 11:10:58
11	you can have a break, where you can have a coffee, 10:52:00	11	facilities, and he took you to a few provisions, but 11:11:02
12	and also perhaps some cookies. Thank you very much. 10:52:03	12	he didn't walk you through the entire document, and 11:11:05
13	Recess taken at 10:52 a m. 10:52:08	13	so I would propose to do that with you now so that 11:11:09
14	Upon resuming at 11:09 a.m. 10:52:08	14	Members of the Tribunal can understand the broader 11:11:13
15	PRESIDENT: We will resume. It will 11:09:50	15	context of the regulation. 11:11:14
16	be Ms. Seers, I understand. 11:09:51	16	However, it is quite a long document, 11:11:17
17	MS. NETTLETON: If, Ms. Seers, you 11:10:05	17	so in the interest of time let's move through it 11:11:19
18	could indicate if we are to be in the public 11:10:08	18	quickly, but I'll take you to provisions, and if you 11:11:22
19	session? 11:10:12	19	could just give the brief context behind those 11:11:25
20	MS. SEERS: Yes. 11:10:13	20	provisions and how they apply or don't apply. 11:11:28
21	RE-EXAMINATION BY MS. SEERS: 11:10:14	21	So you will find that document at 11:11:33
22	Q. Members of the Tribunal, I have 11:10:17	22	Tab 11, and for the record it is Exhibit C-103. 11:11:34
23	provided Mr. Roeper with copies of Exhibit C-0132, 11:10:18	23	A. The regulation? 11:11:44
24	which I see you have in front of you, and C-0791. 11:10:20	24	Q. The regulation, that's right. And 11:11:45
25	I see Mr. Bishop has it. Okay, 11:10:26	25	I may also clarify for the record that there has 11:11:49

7	Mr. Roeper, is at Section 6, which Mr. Neufeld did 11:12:15	7	Q. So it is your understanding that 11:13:14
8	take you to. 11:12:18	8	a Class 5 wind facility is an offshore wind 11:13:15
9	A. I think I have it. 11:12:30	9	facility? 11:13:19
10	Q. So this is a provision that sets 11:12:31	10	A. That's my understanding. 11:13:20
11	out, as I understand it, and you will tell us your 11:12:33	11	Q. And perhaps I can assist you, the 11:13:21
12	understanding, what is defined as a wind facility; 11:12:35	12	table that goes on to the second page, if you turn 11:13:23
13 14	is that your understanding? 11:12:40	13 14	over the page, is that the definition of a Class 5 11:13:25
	A. That's my understanding, yes. 11:12:41	15	facility? 11:13:27
15 16	Q. And does this provision apply to 11:12:43 offshore wind facilities? 11:12:45	16	A. It is. 11:13:29 O. And what is that definition? 11:13:29
17	offshore wind facilities? 11:12:45 A. Yes, it does. 11:12:46	17	•
18	Q. Can you direct us to the 11:12:47	18	A. It says: 11:13:31 "At a location where one or 11:13:32
19	section that makes that so? 11:12:48	19	more parts of a wind turbine 11:13:33
20	A. It says in subsection 3: 11:12:52	20	is located in direct contact 11:13:35
21	"Facilities are to function 11:12:59	21	with a surface water other 11:13:37

Section 25, "Natural Heritage 11:16:52 Records Review"? 11:16:54 A. It applies. 11:16:56 Q. Section 26, "Natural Heritage Site 11:16:57 Investigation"? 11:17:02 A. Yes, it applies. 11:17:03 Q. Section 28 27, pardon me, 11:17:06 "Natural Heritage, Evaluation of Significance"? 11:17:11 A. Yes, it applies. 11:17:16 Q. Section 28, "Confirmation from 11:17:17 Ministry of Natural Resources"? 11:17:21 A. Yes, absolutely, especially on 11:17:23 Crown land. 11:17:26 Q. Section 29, "Water Assessment"? 11:17:27 A. Yes, it applies. 11:17:30 Q. Section 30, "Water Records 11:17:31 Review"? 11:17:35 A. It applies. It is not highly 11:17:38 relevant, but it applies. 11:17:40 Q. Section 31, "Water Site 11:17:42 Investigation"? 11:17:44

	Page 108		Page 109
1	because there are, unless you want to stop me, I'm 11:17:48	1	A. Yes, it applies to offshore. 11:19:28
2	not certain that the following provisions actually 11:17:50	2	Q. Section 44, "Water Bodies." 11:19:31
3	do apply, but they may have some prohibitions, but 11:17:53	3	A. Yes, it applies. 11:19:37
4	the next note that I have in my notes anyway is 11:18:02	4	Q. Section 45, "Water Bodies 11:19:39
5	Section 39. "Water Bodies." 11:18:06	5	Continued"? 11:19:42
6	A. I believe it applies. 11:18:24	6	A. It applies. 11:19:43
7	Q. And if you look at subsection 2 11:18:25	7	Q. Section 53, Mr. Neufeld already 11:19:54
8	pardon me, subsection 3, then there is a list, and 11:18:30	8	took you to, so I won't do so again. 11:19:57
9	number 2 in that list, it says 11:18:33	9	Section 54.1, "Wind Turbine Location 11:20:02
10	A. Class 5 wind facilities. 11:18:37	10	Publication"? 11:20:06
11	Q. Correct, if no transformer is 11:18:39	11	A. Yes, it applies. 11:20:09
12	constructed, installed or expanded in a project 11:18:42	12	Q. Section 55, "Wind Turbines 11:20:14
13	location. 11:18:45	13	Requirements Relocation"? 11:20:17
14	So Section 39 applies in those 11:18:45	14	A. Yes, it also applies to offshore. 11:20:22
15	conditions to offshore wind facilities, correct? 11:18:46	15	Q. Section 56, "Great Lakes Charter." 11:20:27
16	A. That's correct. 11:18:50	16	A. Yes, definitely applies. 11:20:32
17	Q. Section 40, "Water Bodies 11:18:52	17	Q. Then we get to the table we've 11:20:49
18	Continued?" 11:18:56	18	seen this morning, and previously, it is actually 11:20:51
19	A. It applies to certain aspects of 11:19:03	19	Section 64.2, and I wonder, Mr. Roeper, if you could 11:20:54
20	offshore wind facilities, yes. 11:19:05	20	walk us through, there are a number of this 11:20:58
21	Q. How about Section 41, "Specified 11:19:08	21	table, as I understand it, is a description of the 11:21:00
22	Natural Features and Natural Heritage Systems"? 11:19:10	22	reports that would be submitted to the regulator 11:21:02
23	A. Definitely applies to offshore. 11:19:13	23	with a REA application. Perhaps you could walk the 11:21:06
24	Q. Section 43, "Specified Natural 11:19:22	24	Tribunal quickly through each of the reports that 11:21:10
25	Features"? 11:19:27	25	are listed and explain whether they apply or not to 11:21:12

2	offshore wind. 11:21:16 A. So, in Table 1, it lists a number 11:21:18	2	A. So I believe it's all of them 11:22:23 except number 13. 11:22:25 Q. So the construction plan report is 11:22:32 applicable; that's number 1? 11:22:34
2	offshore wind. 11:21:16 A. So, in Table 1, it lists a number 11:21:18 of documents that we would normally prepare as part 11:21:20	2 3 4 5	A. So I believe it's all of them 11:22:23 except number 13. 11:22:25 Q. So the construction plan report is 11:22:32 applicable; that's number 1? 11:22:34 A. The construction plan report's 11:22:39
2 3 4	offshore wind. 11:21:16 A. So, in Table 1, it lists a number 11:21:18 of documents that we would normally prepare as part 11:21:20 of the REA process, and it goes through a long list 11:21:23	2 3 4 5 6	A. So I believe it's all of them 11:22:23 except number 13. 11:22:25 Q. So the construction plan report is 11:22:32 applicable; that's number 1? 11:22:34 A. The construction plan report's 11:22:39 applicable, consultation report's applicable, 11:22:41
2 3 4 5	offshore wind. A. So, in Table 1, it lists a number 11:21:18 of documents that we would normally prepare as part 11:21:20 of the REA process, and it goes through a long list 11:21:23 of them, including a construction plan report, 11:21:28 consultation report, decommissioning plan, design 11:21:30 and operations report, effluent management plan, 11:21:34	2 3 4 5 6 7	A. So I believe it's all of them 11:22:23 except number 13. 11:22:25 Q. So the construction plan report is 11:22:32 applicable; that's number 1? 11:22:34 A. The construction plan report's 11:22:39 applicable, consultation report's applicable, 11:22:41 decommissioning plan report is applicable, the 11:22:44
2 3 4 5 6	offshore wind. A. So, in Table 1, it lists a number 11:21:18 of documents that we would normally prepare as part 11:21:20 of the REA process, and it goes through a long list 11:21:23 of them, including a construction plan report, 11:21:28 consultation report, decommissioning plan, design 11:21:30	2 3 4 5 6 7 8	A. So I believe it's all of them 11:22:23 except number 13. 11:22:25 Q. So the construction plan report is 11:22:32 applicable; that's number 1? 11:22:34 A. The construction plan report's 11:22:39 applicable, consultation report's applicable, 11:22:41 decommissioning plan report is applicable, the 11:22:44 design and operations report is applicable to 11:22:44
2 3 4 5 6 7	offshore wind. A. So, in Table 1, it lists a number 11:21:18 of documents that we would normally prepare as part 11:21:20 of the REA process, and it goes through a long list 11:21:23 of them, including a construction plan report, 11:21:28 consultation report, decommissioning plan, design 11:21:30 and operations report, effluent management plan, 11:21:34 which doesn't have an lot of application, emission 11:21:40 summary, dispersion modelling report, hydrological 11:21:45	2 3 4 5 6 7 8	A. So I believe it's all of them 11:22:23 except number 13. 11:22:25 Q. So the construction plan report is 11:22:32 applicable; that's number 1? 11:22:34 A. The construction plan report's 11:22:39 applicable, consultation report's applicable, 11:22:41 decommissioning plan report is applicable, the 11:22:44 design and operations report is applicable to 11:22:44 offshore wind facilities. 11:22:48
2 3 4 5 6 7 8	offshore wind. A. So, in Table 1, it lists a number 11:21:18 of documents that we would normally prepare as part 11:21:20 of the REA process, and it goes through a long list 11:21:23 of them, including a construction plan report, 11:21:28 consultation report, decommissioning plan, design 11:21:30 and operations report, effluent management plan, 11:21:34 which doesn't have an lot of application, emission 11:21:40	2 3 4 5 6 7 8 9	A. So I believe it's all of them 11:22:23 except number 13. 11:22:25 Q. So the construction plan report is 11:22:32 applicable; that's number 1? 11:22:34 A. The construction plan report's 11:22:39 applicable, consultation report's applicable, 11:22:41 decommissioning plan report is applicable, the 11:22:44 design and operations report is applicable to 11:22:44 offshore wind facilities. 11:22:48 The effluent management plan is 11:22:49
2 3 4 5 6 7 8	offshore wind. A. So, in Table 1, it lists a number 11:21:18 of documents that we would normally prepare as part 11:21:20 of the REA process, and it goes through a long list 11:21:23 of them, including a construction plan report, 11:21:28 consultation report, decommissioning plan, design 11:21:30 and operations report, effluent management plan, 11:21:34 which doesn't have an lot of application, emission 11:21:40 summary, dispersion modelling report, hydrological 11:21:45	2 3 4 5 6 7 8 9 10	A. So I believe it's all of them 11:22:23 except number 13. 11:22:25 Q. So the construction plan report is 11:22:32 applicable; that's number 1? 11:22:34 A. The construction plan report's 11:22:39 applicable, consultation report's applicable, 11:22:41 decommissioning plan report is applicable, the 11:22:44 design and operations report is applicable to 11:22:44 offshore wind facilities. 11:22:48 The effluent management plan is 11:22:49 applicable, although we don't have a lot of effluent 11:22:52
2 3 4 5 6 7 8 9	offshore wind. A. So, in Table 1, it lists a number 11:21:18 of documents that we would normally prepare as part 11:21:20 of the REA process, and it goes through a long list 11:21:23 of them, including a construction plan report, 11:21:28 consultation report, decommissioning plan, design 11:21:30 and operations report, effluent management plan, 11:21:34 which doesn't have an lot of application, emission 11:21:40 summary, dispersion modelling report, hydrological 11:21:45 assessment report, noise report, odour report, the 11:21:46	2 3 4 5 6 7 8 9 10 11	A. So I believe it's all of them 11:22:23 except number 13. 11:22:25 Q. So the construction plan report is 11:22:32 applicable; that's number 1? 11:22:34 A. The construction plan report's 11:22:39 applicable, consultation report's applicable, 11:22:41 decommissioning plan report is applicable, the 11:22:44 design and operations report is applicable to 11:22:44 offshore wind facilities. 11:22:48 The effluent management plan is 11:22:49 applicable, although we don't have a lot of effluent 11:22:52 management with offshore facilities. Emission 11:22:54
2 3 4 5 6 7 8 9 10 11 12	offshore wind. A. So, in Table 1, it lists a number 11:21:18 of documents that we would normally prepare as part 11:21:20 of the REA process, and it goes through a long list 11:21:23 of them, including a construction plan report, 11:21:28 consultation report, decommissioning plan, design 11:21:30 and operations report, effluent management plan, 11:21:34 which doesn't have an lot of application, emission 11:21:40 summary, dispersion modelling report, hydrological 11:21:45 assessment report, noise report, odour report, the 11:21:46 project description report, surface water assessment 11:21:47 report, offshore wind facilities report, and 11:21:50 specifications report for class — that doesn't 11:21:54	2 3 4 5 6 7 8 9 10 11 12 13	A. So I believe it's all of them 11:22:23 except number 13. 11:22:25 Q. So the construction plan report is 11:22:32 applicable; that's number 1? 11:22:34 A. The construction plan report's 11:22:39 applicable, consultation report's applicable, 11:22:41 decommissioning plan report is applicable, the 11:22:44 design and operations report is applicable to 11:22:44 offshore wind facilities. 11:22:48 The effluent management plan is 11:22:49 applicable, although we don't have a lot of effluent 11:22:52 management with offshore facilities. Emission 11:22:54 summary, dispersion modelling report, where it 11:22:57
2 3 4 5 6 7 8 9 10 11 12 13	offshore wind. A. So, in Table 1, it lists a number 11:21:18 of documents that we would normally prepare as part 11:21:20 of the REA process, and it goes through a long list 11:21:23 of them, including a construction plan report, 11:21:28 consultation report, decommissioning plan, design 11:21:30 and operations report, effluent management plan, 11:21:34 which doesn't have an lot of application, emission 11:21:40 summary, dispersion modelling report, hydrological 11:21:45 assessment report, noise report, odour report, the 11:21:46 project description report, surface water assessment 11:21:47 report, offshore wind facilities report, and 11:21:50	2 3 4 5 6 7 8 9 10 11 12 13	A. So I believe it's all of them 11:22:23 except number 13. 11:22:25 Q. So the construction plan report is 11:22:32 applicable; that's number 1? 11:22:34 A. The construction plan report's 11:22:39 applicable, consultation report's applicable, 11:22:41 decommissioning plan report is applicable, the 11:22:44 design and operations report is applicable to 11:22:44 offshore wind facilities. 11:22:48 The effluent management plan is 11:22:49 applicable, although we don't have a lot of effluent 11:22:52 management with offshore facilities. Emission 11:22:54 summary, dispersion modelling report, where it 11:22:57 applies, would be applicable. The hydrological 11:22:59
2 3 4 5 6 7 8 9 10 11 12	offshore wind. A. So, in Table 1, it lists a number 11:21:18 of documents that we would normally prepare as part 11:21:20 of the REA process, and it goes through a long list 11:21:23 of them, including a construction plan report, 11:21:28 consultation report, decommissioning plan, design 11:21:30 and operations report, effluent management plan, 11:21:34 which doesn't have an lot of application, emission 11:21:40 summary, dispersion modelling report, hydrological 11:21:45 assessment report, noise report, odour report, the 11:21:46 project description report, surface water assessment 11:21:47 report, offshore wind facilities report, and 11:21:50 specifications report for class — that doesn't 11:21:54	2 3 4 5 6 7 8 9 10 11 12 13 14 15	A. So I believe it's all of them 11:22:23 except number 13. 11:22:25 Q. So the construction plan report is 11:22:32 applicable; that's number 1? 11:22:34 A. The construction plan report's 11:22:39 applicable, consultation report's applicable, 11:22:41 decommissioning plan report is applicable, the 11:22:44 design and operations report is applicable to 11:22:44 offshore wind facilities. 11:22:48 The effluent management plan is 11:22:49 applicable, although we don't have a lot of effluent 11:22:52 management with offshore facilities. Emission 11:22:54 summary, dispersion modelling report, where it 11:22:57 applies, would be applicable. The hydrological 11:22:59 assessment report would apply for the on-shore 11:23:03
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	offshore wind. A. So, in Table 1, it lists a number 11:21:18 of documents that we would normally prepare as part 11:21:20 of the REA process, and it goes through a long list 11:21:23 of them, including a construction plan report, 11:21:28 consultation report, decommissioning plan, design 11:21:30 and operations report, effluent management plan, 11:21:34 which doesn't have an lot of application, emission 11:21:40 summary, dispersion modelling report, hydrological 11:21:45 assessment report, noise report, odour report, the 11:21:46 project description report, surface water assessment 11:21:47 report, offshore wind facilities report, and 11:21:50 specifications report for class — that doesn't 11:21:56 majority of these items are the same or on-shore and 11:22:01 offshore facilities, with a couple of these items 11:22:03	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	A. So I believe it's all of them 11:22:23 except number 13. 11:22:25 Q. So the construction plan report is 11:22:32 applicable; that's number 1? 11:22:34 A. The construction plan report's 11:22:39 applicable, consultation report's applicable, 11:22:41 decommissioning plan report is applicable, the 11:22:44 design and operations report is applicable to 11:22:44 offshore wind facilities. 11:22:48 The effluent management plan is 11:22:49 applicable, although we don't have a lot of effluent 11:22:52 management with offshore facilities. Emission 11:22:54 summary, dispersion modelling report, where it 11:22:57 applies, would be applicable. The hydrological 11:22:59 assessment report would apply for the on-shore 11:23:03 components of the offshore facility. 11:23:07
2 3 4 5 6 7 8 9 10 11 12 13 14	offshore wind. A. So, in Table 1, it lists a number 11:21:18 of documents that we would normally prepare as part 11:21:20 of the REA process, and it goes through a long list 11:21:23 of them, including a construction plan report, 11:21:28 consultation report, decommissioning plan, design 11:21:30 and operations report, effluent management plan, 11:21:34 which doesn't have an lot of application, emission 11:21:40 summary, dispersion modelling report, hydrological 11:21:45 assessment report, noise report, odour report, the 11:21:46 project description report, surface water assessment 11:21:47 report, offshore wind facilities report, and 11:21:50 specifications report for class that doesn't 11:21:54 apply actually, and specification for so the 11:21:56 majority of these items are the same or on-shore and 11:22:01 offshore facilities, with a couple of these items 11:22:03 not being applicable to offshore facility because 11:22:07	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	A. So I believe it's all of them 11:22:23 except number 13. 11:22:25 Q. So the construction plan report is 11:22:32 applicable; that's number 1? 11:22:34 A. The construction plan report's 11:22:39 applicable, consultation report's applicable, 11:22:41 decommissioning plan report is applicable, the 11:22:44 design and operations report is applicable to 11:22:44 offshore wind facilities. 11:22:48 The effluent management plan is 11:22:49 applicable, although we don't have a lot of effluent 11:22:52 management with offshore facilities. Emission 11:22:54 summary, dispersion modelling report, where it 11:22:57 applies, would be applicable. The hydrological 11:22:59 assessment report would apply for the on-shore 11:23:03 components of the offshore facility. 11:23:10
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	offshore wind. A. So, in Table 1, it lists a number 11:21:18 of documents that we would normally prepare as part 11:21:20 of the REA process, and it goes through a long list 11:21:23 of them, including a construction plan report, 11:21:28 consultation report, decommissioning plan, design 11:21:30 and operations report, effluent management plan, 11:21:34 which doesn't have an lot of application, emission 11:21:40 summary, dispersion modelling report, hydrological 11:21:45 assessment report, noise report, odour report, the 11:21:46 project description report, surface water assessment 11:21:47 report, offshore wind facilities report, and 11:21:50 specifications report for class — that doesn't 11:21:56 majority of these items are the same or on-shore and 11:22:01 offshore facilities, with a couple of these items 11:22:03	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	A. So I believe it's all of them 11:22:23 except number 13. 11:22:25 Q. So the construction plan report is 11:22:32 applicable; that's number 1? 11:22:34 A. The construction plan report's 11:22:39 applicable, consultation report's applicable, 11:22:41 decommissioning plan report is applicable, the 11:22:44 design and operations report is applicable to 11:22:44 offshore wind facilities. 11:22:48 The effluent management plan is 11:22:49 applicable, although we don't have a lot of effluent 11:22:52 management with offshore facilities. Emission 11:22:54 summary, dispersion modelling report, where it 11:22:57 applies, would be applicable. The hydrological 11:22:59 assessment report would apply for the on-shore 11:23:03 components of the offshore facility. 11:23:10 apply. The odour study report, where we had such 11:23:12
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	offshore wind. A. So, in Table 1, it lists a number 11:21:18 of documents that we would normally prepare as part 11:21:20 of the REA process, and it goes through a long list 11:21:23 of them, including a construction plan report, 11:21:28 consultation report, decommissioning plan, design 11:21:30 and operations report, effluent management plan, 11:21:34 which doesn't have an lot of application, emission 11:21:40 summary, dispersion modelling report, hydrological 11:21:45 assessment report, noise report, odour report, the 11:21:46 project description report, surface water assessment 11:21:47 report, offshore wind facilities report, and 11:21:50 specifications report for class that doesn't 11:21:54 apply actually, and specification for so the 11:21:56 majority of these items are the same or on-shore and 11:22:01 offshore facilities, with a couple of these items 11:22:03 not being applicable to offshore facility because 11:22:07	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	A. So I believe it's all of them 11:22:23 except number 13. 11:22:25 Q. So the construction plan report is 11:22:32 applicable; that's number 1? 11:22:34 A. The construction plan report's 11:22:39 applicable, consultation report's applicable, 11:22:41 decommissioning plan report is applicable, the 11:22:44 design and operations report is applicable to 11:22:44 offshore wind facilities. 11:22:48 The effluent management plan is 11:22:49 applicable, although we don't have a lot of effluent 11:22:52 management with offshore facilities. Emission 11:22:54 summary, dispersion modelling report, where it 11:22:57 applies, would be applicable. The hydrological 11:22:59 assessment report would apply for the on-shore 11:23:03 components of the offshore facility. 11:23:07 The noise study report would certainly 11:23:10 apply. The odour study report, where we had such 11:23:12 issue, would apply. The project description reports 11:23:16

1	that continues to be true today? 11:23:36	1	what's in the regulation under Table 1, Section 12 11:24:38
2	A. Absolutely, that is still the 11:23:38	2	for the Offshore Facilities Report, so what it tries 11:24:41
3	case. 11:23:41	3	to do is give a little more meat on what we're 11:24:44
4	Q. Mr. Neufeld asked you questions 11:23:41	4	supposed to put into a Wind Facilities Report, and 11:24:47
5	about specifically about the offshore wind 11:23:43	5	gives us a main topic area, such as shipping channel 11:24:50
6	facility report. 11:23:47	6	locations, fishery zones, location of submarine 11:24:53
7	I've put before you C-0132, which is 11:23:48	7	cables, location of existing disposed lake bed 11:24:58
8	the approval and permitting requirement documents 11:23:53	8	location, or other grid cells, oil and gas licences, 11:25:01
9	for renewable energy projects. 11:23:55	9	fish habitat, fish populations, vegetation species 11:25:04
10	Are you familiar with this document, 11:23:57	10	and hazard lands. 11:25:09
11	Mr. Roeper? 11:23:59	11	So it provides us essentially the 11:25:11
12	A. Yes, it's part and parcel as what 11:23:59	12	chapter heading for our Offshore Facilities Report. 11:25:14
13	we see to be the REA process from a practitioner's 11:24:01	13	Q. Okay, you have in front of you 11:25:18
14	perspective. 11:24:07	14	a document of Exhibit No. C-0791. 11:25:19
15	This outlines in some more detail the 11:24:08	15	Mr. Neufeld, this morning, asked you 11:25:24
16	steps and requirements of how to complete the 11:24:10	16	some questions about the setback requirement that 11:25:26
17	process successfully. 11:24:12	17	applied at the time the REA regulation was adopted. 11:25:32
18	Q. And if I could direct your 11:24:13	18	Does this document help refresh your 11:25:39
19	attention to page 32, which has a Section 7.2 11:24:15	19	memory as to the requirements that were in effect at 11:25:42
20	entitled "Offshore Wind Facility Report." 11:24:20	20	that time? 11:25:46
21	A. Yes. 11:24:23	21	A. Yeah. So, this is very relevant, 11:25:48
22	Q. Do you have an understanding of 11:24:26	22	because what I was trying to say earlier is that, in 11:25:50
23	how this relates to preparation of the Offshore Wind 11:24:27	23	my experience, under the 11:25:56
24	Facility Report? 11:24:32	24	Environmental Protection Act, the government doesn't 11:25:58
25	A. Yeah, it's a small expansion on 11:24:33	25	come up with a lot of arbitrary requirements. They 11:26:01

Okay. 11:27:24 A. So at the time this was put out, 11:27:25 that was really useful guidance to have. 11:27:32 uncertainty that existed in 2010 regarding the 11:27:35 outcome of the proposal to implement the 11:27:41 five-kilometre shoreline exclusion zone, and I think 11:27:43 you said that there was some uncertainty. 11:27:47 I wonder if you could expand on that 11:27:51 comment in light of what happened afterwards, 11:27:53 including the adoption of the moratorium? 11:27:59 Q. The moratorium. 11:28:00 A. The moratorium. So, with respect 11:28:01 to uncertainty, there was uncertainty, there is 11:28:05
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	are usually based in some other requirement that we 11:26:03 can refer to; an odour standard, a noise standard, 11:26:12 specifically to the issue of noise setback 11:26:14 requirements. And this actually provides some 11:26:18 clarification for practitioners to how we should 11:26:23 view setback requirements, and it says: 11:26:27 "Offshore wind facilities 11:26:28 require a REA." 11:26:32 Which we of course we know: 11:26:33 "They do not have 11:26:36 a province-wide standard 11:26:36 setback at this time." 11:26:37 Which we also know, and still don't: 11:26:38 "Each application will be 11:26:42 reviewed and based on local 11:26:42 situation." 11:26:44 Which then refers us back to looking 11:26:45 at each facility on a site-specific basis using the 11:26:54 noise studies demonstrating 11:26:55	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	because what this tells us is that we are applying 11:27:02 exactly the same 40-decibel requirement that we've 11:27:06 been applying to on-shore wind. We would use 11:27:08 similar modelling approaches to determine whether or 11:27:12 not on a site-specific basis we have that impact, 11:27:14 and the criteria against which we will be assessed 11:27:17 for pass or fail will be the 40-decibel. 11:27:21 Q. Okay. 11:27:24 A. So at the time this was put out, 11:27:25 that was really useful guidance to have. 11:27:32 uncertainty that existed in 2010 regarding the 11:27:35 outcome of the proposal to implement the 11:27:41 five-kilometre shoreline exclusion zone, and I think 11:27:43 you said that there was some uncertainty. 11:27:47 I wonder if you could expand on that 11:27:51 comment in light of what happened afterwards, 11:27:56 A. Including the adoption of? 11:27:59 Q. The moratorium. 11:28:00 A. The moratorium. So, with respect 11:28:01 to uncertainty, there was uncertainty, there is 11:28:05

Page 117 Page 116 1 1 I tried to say this earlier, we had the regulation 11:28:25 government in saying let's get back to the 40-dB, 11:29:35 2 2 in place. We had the sort of the guidebook and let's get back to the actual requirements, and 11:29:37 11:28:28 3 3 let's be specific about definitions under 11:29:40 available to us as to how to complete the process. 11:28:32 4 the Environmental Protection Act, which usually 4 We knew the regulations in the guidebook applied to 11:28:35 5 offshore wind. 11:28:38 refer to receptor locations, not -- and sorry I got 11:29:45 6 6 this wrong -- with the shorelines --11:29:45 The one piece we were missing was 11:28:39 7 7 details on the Offshore Facilities report, and we 11:28:41 Q. The water's edge? 11:29:47 8 knew they were working on guidance on that. So 8 A. -- but water's edge location. 11:29:49 9 9 clearly there was uncertainty about what exactly 11:28:48 And so it was my expectation that, 11:29:53 10 10 would be in the guidance, but we saw that in the 11:28:50 yes, there could be some specifics on the rule 11 context of the government had not put any other 11:28:52 11 changes for what would be the guidance requirements 11:29:59 12 requirements on any other projects that would not be 11:28:57 12 for how to complete noise modelling under the Wind 11:30:01 13 reasonably met, and it was my expectation at the 11:29:00 13 Facilities Report. 11:30:04 14 14 I did not expect it to become 11:30:06 time that we would be reasonably able to meet those 11:29:06 15 15 a significant obstacle to finishing the overall guidelines. 11:29:08 11:30:09 16 16 As a matter of fact, I thought we 11:29:09 process. 17 17 would meet them with the initial layouts of the 11:29:10 Q. Mr. Neufeld asked you questions 11:30:18 18 two-kilometre setback that we did. 11:29:12 18 about the timing of your decision in the fall of 11:30:19 19 I was a little surprised when the 11:29:15 19 2010 on behalf of Windstream to issue an RFP to 11:30:24 20 20 government rolled out a five kilometre, and I was 11:29:16 engage consultants to conduct environmental 11:30:28 21 21 trying to rationalize in my mind why are we talking 11:29:18 permitting work, to expand on the drivers, please, 11:30:31 22 22 about five kilometres when our technical experts are 11:29:22 of that timing, when you -- why you made that 11:30:34 23 23 decision at that time, or why Windstream did? telling me two kilometres would probably meet the 11:29:25 11:30:37 24 40-decibel rule? And which also triggered us to put 11:29:30 24 A. So we do this very closely with 11:30:42 25 25 comments in on that particular issue to the 11:29:34 our clients, so we plan our overall project 11:30:44 Page 118 Page 119 1 1 schedule, you've seen a number of those project 11:30:47 that could be affected. REFO's role, as we 11:31:51 2 2 schedules in our plans, and we try to set out what 11:30:50 understood it, was to facilitate and coordinate 11:31:54 3 3 has to be done within different timeframes. 11:30:52 communication dialogue and answer questions for us 11:31:58 4 And we knew that we needed to plan the 11:30:55 4 that we might have on the process. 11:32:01 5 fieldwork for the spring of -- particularly the 11:30:57 5 Q. Thank you very much, Mr. Roeper, 11:32:03 6 fieldwork for the spring of 2011, and we went out 11:30:59 6 those are our questions. 11:32:04 7 for procurement on who would do that work for us and 11:31:02 7 PRESIDENT: Thank you, Ms. Seers. Any 11:32:09 8 8 who was best suited to complete that work for us. 11:31:07 11:32:10 questions? 9 9 Does that answer your question? DR. CREMADES: You said that you are 11:32:15 11:31:10 10 10 Q. Yes, thank you. And one very last 11:31:11 not an environment lawyer, but it seems that you 11:32:17 11 11 brief question, you mentioned Pearl Ing in an email 11:31:14 have such a practice that you could be considered as 11:32:24 12 in the context of an email back and forth. Could 11:31:17 12 a honorary lawyer. And my question is the 13 13 you tell us who Ms. Ing is and what her position and 11:31:19 following: You have said that never you can take it 11:32:36 14 14 role is in the government? 11:31:24 for granted that you are going to get the permit, 11:32:41 15 A. So I believe Pearl Ing was a 11:31:25 15 the environment permit. 11:32:46 16 16 Director at MEI involved in the Renewable Energy 11:31:28 You say that you have been dealing 11:32:48 17 17 Facilitations Office. 11:31:30 with hundreds of applications. I mean, when someone 11:32:50 18 18 Q. Otherwise known as REFO? 11:31:31 gets an FIT, like Windstream, what is the 11:32:56 19 19 A. REFO, yeah. And as we understood 11:31:33 expectations they might have in a situation like 11:33:00 20 it at the time, was that REFO was going to help 20 11:33:04 11:31:36 this? 21 coordinate the involvement of various government 11:31:39 21 THE WITNESS: So I think we saw it in 11:33:09 22 22 departments. 11:31:42 the context of the overall government program to 11:33:13 23 23 Obviously there is a lot going on. 11:31:44 roll-out renewable energy in Ontario. 11:33:16 24 24 You have the MNR, MOE, and possibly as is listed in 11:31:45 And these are my personal views of how 11:33:20 25 some of this stuff, other government departments 11:31:48 25 I kind of see what was going on at the time. 11:33:23

Page 120 Page 121 1 1 In 2009 there was a lot of excitement 11:33:25 approvals in other areas, and to me it was go, go, 11:34:42 2 2 in the industry, including in the consulting 11:33:27 11:34:45 go. 3 3 industry that I work in, about the government really 11:33:30 To me it was the government wanted to 11:34:46 4 4 wanting to do renewable energy projects, and trying 11:33:32 do this and we're building this thing. 11:34:48 5 5 DR. CREMADES: Did you have a feeling 11:34:52 to facilitate to make that happen. 6 6 We viewed the shift from -- from the 11:33:37 dealing with this company that they were treated 11:34:53 7 7 Environmental Assessment Act to the Protection Act 11:33:41 unfairly by the government, and especially in 8 as a way to facilitate and expedite permits, make 11:33:44 8 comparison with other projects you have been getting 11:35:02 9 9 them faster, and especially remove the question of 11:33:47 in the past? 11:35:06 10 10 not if we are building these facilities, the THE WITNESS: Well, that is a big 11:35:07 11 government had already decided we were going to 11:33:52 11 question to ask me. 11:35:08 12 12 build these facilities. It was how to build them 11:33:54 DR. CREMADES: That's the consequence 11:35:12 13 correctly and how to build them with the right 13 of being an honorary lawyer. 11:35:14 14 setbacks, with the right noise limits, with the 11:33:58 14 (LAUGHTER) 11:35:17 15 15 right standards that environmental impacts would be 11:34:01 THE WITNESS: If I look at how many 11:35:20 16 16 addressed and protected. 11:34:04 successful projects we had in the REA process in the 11:35:21 17 17 So, in the context of that FIT, my 11:34:06 FIT program, they were not dealt with fairly. 11:35:26 18 expectation was that government would do what it 11:34:11 18 If I look at how the gas plant 11:35:33 19 could do in terms of facilitating us to complete 11:34:17 19 situation was dealt with, where, in my mind, the 11:35:35 20 20 that process as proponents, as consultants. So they 11:34:21 government did the honourable thing and went to the 11:35:38 21 21 laid out the plan for us. proponents and said "we no longer want to execute 11:35:40 22 22 this contract, we want to terminate this contract," 11:35:45 The plan was to build 2,000-megawatts 11:34:27 23 23 of renewable energy, facilitated that by moving 11:34:29 and they went and negotiated a contract break and 11:35:47 24 24 or -- in moving or flattening out some of the 11:34:34 the settlement, I -- I've -- my own personal opinion 11:35:50 25 25 regulatory wrinkles we had in site release and 11:34:39 is the moratorium was not only completely unexpected 11:35:55 Page 122 Page 123 1 1 for me on February 11th when it came out, because 11:36:00 of the most unusual tools I've seen used in my 11:37:06 2 2 I would have thought we were moving towards 11:36:03 practice over the years. I have not been involved 11:37:11 3 3 completing the setback discussions, much protracted, 11:36:06 in any other moratorium, although there might have 11:37:13 4 much delayed, but I thought we were completing them. 11:36:09 4 been some. And I was really surprised by the 11:37:16 5 So the moratorium, I think, if effect, in my view, 11:36:12 5 moratorium, and I don't think it was a fair thing to 11:37:20 6 and I'm not a lawyer, in my view, made it impossible 11:36:14 6 do for Windstream or for the offshore industry as 11:37:24 7 to proceed with that project. 11:36:20 7 11:37:27 a whole 8 8 And I didn't understand why we needed 11:36:21 DR. CREMADES: How about the treatment 11:37:29 9 9 to take that step, because I knew there was, in the 11:36:22 of the force majeure by the government? 11:37:31 10 10 THE WITNESS: The treatment of the 11:37:35 public consultation groups that wanted no wind 11:36:27 11 11 development period, no on-shore or offshore, that 11:36:31 force maieure? 11:37:36 12 12 certainly there were groups that didn't want 11:36:35 DR. CREMADES: Yes. I mean the fact 11:37:37 13 13 offshore development or groups that had submitted 11:36:36 that it was not granted the force majeure, I mean 11:37:38 14 14 things about setback distances on offshore. But we 11:36:39 the way the government dealt with that? 15 have had that for on-shore, we have had that for 11:36:43 15 THE WITNESS: Yeah, I view that -- you 11:37:43 16 16 water power, and we have had that for other 11:36:46 know, again, these are my personal views, I'm not 11:37:45 17 17 industries, and I think there were ways to address 11:36:48 a lawyer. The force majeure relates specifically to 11:37:48 18 18 that. 11:36:50 a contract provision with OPA. And OPA has been 11:37:51 19 19 appointed by the government to be the firm hand that 11:37:54 And coming up with a reasonable, 11:36:51 20 20 manages and administers these contracts. Everybody 11:37:58 pragmatic setback requirement would have settled 11:36:52 21 21 that issue. It would have addressed some of the 11:36:56 wants one of those contracts. Not everybody can 11:38:02 22 22 have one. And if you execute a contract, I think 11:38:04 issues that people had, and it would have allowed us 11:36:59 23 23 to proceed forward. 11:37:01 the public expects that you will be held accountable 11:38:06 24 24 So do I feel it was -- Windstream was 11:37:02 and execute that contract in a responsible manner. 11:38:09 25 25 treated fairly? No, I think the moratorium is one 11:37:04 In that context, I think the OPA, as 11:38:16

1	manager of contracts, should often say "no." So 11:38:20	1	to run the FIT contract that were frustrated in 11:39:36
2	we've been involved in other files where we've 11:38:27	2	regulatory process. 11:39:39
3	helped clients make application for force majeure on 11:38:29	3	So I actually am aware, and have been 11:39:41
4	other files. And my experience has been with OPA, 11:38:33	4	involved in with other clients and other files that 11:39:43
5	they often have said no to those on first run, and 11:38:37	5	I can't speak about here, where we literally 11:39:45
6	I think that's the right response for a contract 11:38:41	6	returned FIT contracts and got deposits back. So 11:39:50
7	manager to take. 11:38:43	7	it's not at all clear to me why FIT stream 11:39:54
8	So, if I were in their shoes, and 11:38:44	8	Windstream did not get their deposit back, but then 11:39:58
9	I was managing a contract, a lot of occasion my 11:38:47	9	I wasn't specifically involved in their particular 11:40:04
10	first response would be no, until somebody can 11:38:50	10	application to get their deposit back, so I don't 11:40:05
11	explain to me with a lot of good reason why I should 11:38:53	11	know the circumstances. 11:40:07
12	move off that position. And I think that reflects 11:38:57	12	DR. CREMADES: One last question: Do 11:40:08
13	some of the dealings with OPA, and I think, as 11:39:01	13	you have the feeling that Windstream was treated on 11:40:09
14	contract manager, that's how I would expect them to 11:39:06	14	a personal level differently as other clients you 11:40:14
15	act, but I don't think that reflects necessarily the 11:39:09	15	have? 11:40:18
16	government. I think that reflects their role as 11:39:11	16	THE WITNESS: The sheep follow the 11:40:26
17	contract manager. 11:39:13	17	leader. Sometimes in the bureaucracy and I'm not 11:40:29
18	DR. CREMADES: How about the situation 11:39:16	18	trying to be hard on the bureaucracy, they have 11:40:35
19	in which the government has not given back the 11:39:16	19	a tough job bureacracies are doing their best to 11:40:39
20	letter of credit to Windstream at the actual 11:39:19	20	manage the process. In 2008, 2009, 2010, there was 11:40:43
21	situation? 11:39:24	21	a lot going on. They were being asked to come out 11:40:45
22	THE WITNESS: So I haven't been 11:39:25	22	with new protocols, procedures and all kinds of 11:40:47
23	involved in that, but it seems most bizarre to me, 11:39:26	23	stuff, and there was a lot of pressure put by the 11:40:50
24	because there were a number of other projects 11:39:30	24	government on the bureaucracy to execute. 11:40:53
25	cancelled, and OPA had an amnesty for people wanting 11:39:32	25	So, not unlike a president of 11:40:57
	Page 126		Page 127

There was stuff they couldn't get 11:41:54 done just in time, but the overall intent was there. 11:41:59 differently? You know, I think you have to see it 11:42:00 in that context for the bureaucracy. I don't think 11:42:03	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	sheep in the bureaucracy will follow that lead. 11:42:17 If the government says stop, that will 11:42:21 very quickly trickle down, and unfortunately, in our 11:42:22 regulatory system in Ontario, we give a lot of 11:42:25 discretionary powers to the bureaucracy and to the 11:42:28 Minister, and in that discretionary framework, and 11:42:30 I may be way overstepping my bounds in how I view 11:42:33 the regulatory system in Ontario, but as 11:42:36 a practitioner in that system, I think we've put 11:42:38 a lot of onus on Ministers to be the final 11:42:42 decision-maker in a number of Acts, especially the 11:42:45 regulatory Acts in MNR and MOE, and we give a lot of 11:42:48 discretionary power to the bureaucracies and 11:42:52 sometimes the bureaucracies tend to over-interpret 11:42:55 their role. They see themselves as being the 11:42:58 mouthpiece of the Ministers, so sometimes they 11:43:00 over-speak. 11:43:02 I don't think any of that is done 11:43:03 necessarily with ill-intent, because a bureaucracy 11:43:05 follows the lead from on top, and whatever happens 11:43:108 up there is what the bureaucracy tries to 11:43:11

	Page 128		Page 129
1		1	I know that's been sort of questioned 11:44:36
2	questions; a couple of technical questions. We 11:43:26 looked at some of the layouts of your project that 11:43:27	2	and argued about, and my personal view is there was 11:44:39
3	your group had done. Were all points of the project 11:43:32	3	a lot of surface area there, provided we got the 11:44:43
4	a minimum of five kilometres from the shoreline? 11:43:34	4	swap, which the letter from MNR gave us a lot of 11:44:47
5	THE WITNESS: So we do a number of 11:43:38	5	comfort in August that we would get the land swap, 11:44:51
6		6	which we requested fairly early on, that we could 11:44:53
7	layouts, so we started in before we knew about 11:43:39 the five kilometres, we had worked on two kilometres 11:43:42	7	
8	based on the 40-decibel that was in Exhibit C-141. 11:43:45	8	-5
9		9	And if there really was a layout and 11:44:58
10	So we took that kind of as a guide 11:43:50	10	a requirement was really restrictive, the FIT 11:45:01
	post, and said with two kilometres we can meet the 11:43:52		contract had a provision to slightly downsize the 11:45:05
11 12	receptor requirements for Ontario. 11:43:56	11 12	project. They had some downsizing provisions in the 11:45:07
	When the five kilometres came out, it 11:43:58		FIT contract. Not that I think we would have used 11:45:10
13	did throw us for a bit of a loop because we said 11:43:59	13	those, but that would have provided the mechanics if 11:45:12
14	"Five, where did they come up with five?" It is 11:44:01	14	we had to lose the odd turbine due to shipping lane 11:45:15
15	really conservative under any noise model that we 11:44:05	15	constraints or other stuff. 11:45:19
16	could think of. So it pushed us into a position 11:44:08	16	MR. BISHOP: Prior to the moratorium, 11:45:21
17	where we had to do multiple layouts, and then we did 11:44:12	17	were there discussions about a need to do drinking 11:45:22
18	a variety of scenarios for those layouts, and some 11:44:14	18	water studies? 11:45:26
19	of them were more conservative and some of them were 11:44:17	19	THE WITNESS: So the drinking water 11:45:29
20	less conservative. 11:44:22	20	stuff is implicitly contained in some of the stuff 11:45:31
21	I think I'm not sure if the most 11:44:23	21	we went through a few minutes ago. It is something 11:45:35
22	conservative one met all the constraint requirements 11:44:25	22	we would have looked at. And the drinking water 11:45:37
23	for all the turbines, but even the very conservative 11:44:27	23	stuff, I believe, was water intakes were mentioned, 11:45:42
24	model layouts that we did showed us that we could 11:44:32	24	I believe, in a June 25th consultation 11:45:46
25	still fit the project and get it done. 11:44:34	25	documentation, although I'd have to go back and 11:45:48
	Page 130		Page 131
1	check that. 11:45:51	1	work, of course. 11:46:43
2	So drinking water was out there 11:45:51	2	MR. BISHOP: What is required to get 11:46:44

1	completed. FIT took that away. FIT essentially 11:47:42	1	And you had the option, under the FIT 11:49:01
2	said "You don't need to have applied for grid 11:47:44	2	submission rules, to elect to complete your projects 11:49:04
3	application. When you win a FIT contract, that 11:47:46	3	earlier, and that would have given you score points, 11:49:11
4	means we will give you a capacity allocation at the 11:47:49	4	that would have maybe ranked you ahead of another 11:49:14
5	same time." So it took away the whole grid 11:47:52	5	project. But those were the three basic 11:49:18
6	assessment issue. It didn't require environmental 11:47:55	6	requirements for applying for FIT. 11:49:20
7	work to be done upfront. So FIT was the simplest of 11:47:57	7	MR. BISHOP: Well, explain to me 11:49:28
8	the procurement processes we have had. 11:48:01	8	conceptually how this works. I'm assuming that when 11:49:29
9	MR. BISHOP: Did it require the 11:48:07	9	the OPA enters into a FIT contract, that they are 11:49:33
10	applicants to meet certain requirements to show that 11:48:07	10	contractually committing to buy the power that comes 11:49:38
11	they were technically and financially capable of 11:48:11	11	out of that project; is that correct? 11:49:41
12	doing the project? 11:48:16	12	THE WITNESS: Yeah, it's a big deal, 11:49:43
13	THE WITNESS: No, not to the only 11:48:18	13	because not just contractually committing to buy the 11:49:44
14	criteria, other than selection criteria, so you 11:48:23	14	power, but they are committing to buy for 20 years. 11:49:52
15	needed to show that you had site right status. 11:48:26	15	MR. BISHOP: So doesn't that imply 11:49:55
16	Windstream obtained a letter in the fall of 2009 11:48:29	16	that, in entering into the contract, they believe 11:49:55
17	from Minister Cansfield confirming that they had 11:48:32	17	there is a need for the power that's going to come 11:49:58
18	enough site status to apply for the FIT program. 11:48:36	18	out of that project? 11:50:03
19	You need to put a deposit. I think 11:48:40	19	THE WITNESS: Well, the FIT project 11:50:10
20	the deposit was considered the financial 11:48:42	20	program was tied to long-term energy planning in 11:50:11
21	wherewithal, because in other previous ones you had 11:48:45	21	Ontario, which was tied back to closing of coal 11:50:14
22	to submit financial commitment letters and stuff 11:48:47	22	plants and an overall management of supply mix and 11:50:14
23	like that that wasn't required in FIT. So in FIT 11:48:50	23	supply in Ontario, and dating back a few years 11:50:17
24	all we had was the deposit amount as credibility 11:48:53	24	earlier, but we had the announcement of closing of 11:50:20
25	that we were serious about executing. 11:48:55	25	the coal plants, and the announcement almost 11:50:25

5	an engineering perspective? 11:53:05	5	meeting a timeline. 11:54:18
6	THE WITNESS: You know, all the 11:53:07	6	We do that in a number of ways. So, 11:54:19
7	timelines were not overly generous. I think the 11:53:08	7	for example, when we enter into construction 11:54:21
8	context, as we saw it at the time, was it was 11:53:12	8	contracts, we don't do it the way I do my home 11:54:24
9	doable, but you've got to you've got to pick up 11:53:16	9	renovation projects, where I hire a contract and it 11:54:28
10	your boots and get on the ground. 11:53:18	10	takes three weeks and then six weeks and then nine 11:54:31
11	And I think that reflects some of the 11:53:21	11	weeks, and then after 12 weeks we're still not done. 11:54:33
12	comments we made about the emails that came up 11:53:24	12	And I'm a better project manager for large projects 11:54:35
13	an hour ago where we say "We're desperate to get out 11:53:26	13	than I am for my own home renovations, is what the 11:54:38
14	in the field and do field work" because we knew we 11:53:30	14	point might be. But when we do these projects, we 11:54:42
15	had a four-year timeline at that time. So we 11:53:34	15	bring them in largely on budget and on schedule. We 11:54:45
16	thought it was entirely doable, but we had to get on 11:53:36	16	have to. 11:54:49
17	with executing the program. 11:53:40	17	Number one, the contracts require it 11:54:50
18	Now, we're used to that, so when 11:53:41	18	on the PPA side, in this case on the FIT contract 11:54:53
19	we've been involved in numerous infrastructure 11:53:43	19	side, and we design the construction contracts in 11:54:57
20	projects. I've built a project, a \$130-million wind 11:53:46	20	that way with contractors, and they get done. 11:55:00
21	project on-shore from early conception right through 11:53:52	21	And a good example is we issued in 11:55:03
22	to commissioning, and we are still involved in 11:53:56	22	the fall of 2013 we issued a contract to Ellis-Don 11:55:06
23	operating that project. We have the same with a 11:53:58	23	to construct a \$45-million solar farm project in 11:55:15
24	solar project, a \$45-million solar project, from 11:54:00	24 25	London, Ontario under a FIT contract. 11:55:18
25	very early stage to operations, and we operate that 11:54:05	25	And that project had to be completed 11:55:20

What is the regulatory basis, purpose of it, 11:56:17 and what does it contain? 11:56:20	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	apply. And it's been a challenging process. Part of the site release process for 11:56:41 Part of the site release process for 11:56:44 several years now has been that once you apply for, 11:56:46 in this case, grid cells, or a piece of Crown land 11:56:48 to do a project on, one of the first steps in that 11:56:51 process is to file the application. The response to 11:56:55 the application is the site description package from 11:56:57 the Crown. 11:57:00 And what MNR and my view of what 11:57:01 MNR tries to do with that, because I've seen 11:57:03 a number of these site description packages in my 11:57:05 practice, is inform us on what issues MNR perceives 11:57:08 to be for that project. 11:57:11 So on the projects that I have seen, 11:57:14 it would tell us of trap lines in the area, 11:57:15 commercial fishing that's occurring, and anything 11:57:19 that's on their record with respect to the project 11:57:22 that we need to know about, habitat areas that have 11:57:24 been mapped and identified. 11:57:28
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	by July of the next year. And despite the fact that 11:55:24 that was one of the coldest winters on record in 11:55:30 Ontario, and one of the snowiest for that part of 11:55:33 Ontario, we finished construction of that project in 11:55:38 the middle of June of 2015 on time and on schedule. 11:55:40 It's how it's done. So, we know there are 11:55:43 timelines. We know the timelines are not overly 11:55:47 generous. Our job, as project managers, is to make 11:55:50 it happen. 11:55:53 If we really don't think it can 11:55:54 happen, we'll say so, and it's better to speak up 11:55:55 earlier in the process than late. So was the four 11:55:59 years tight? Yeah, it was tight, but it was doable. 11:56:02 PRESIDENT: Thank you. Then 11:56:07 a completely different issue. You mentioned the 11:56:07 site description package a couple of times. Just to 11:56:09 educate us on the Tribunal, what is this package 11:56:12 about? What is the regulatory basis, purpose of it, 11:56:17 and what does it contain? 11:56:20 THE WITNESS: So the site description 11:56:23	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	apply. 8	MR NEUFELD: One small question 11:58:02	8	supplier delivering its NTP 11:59:36
9	PRESIDENT: Mr Neufeld, please go 11:58:03	9	request, pursuant to 11:59:39
10	FURTHER CROSS-EXAMINATION BY MR NEUFELD: 11:58:06	10	Section 2.4, the supplier 11:59:42
11	Q Hello again This question 11:58:09	11	may, on a single occasion, 11:59:44
12	arising from Mr Bishop's questions in terms of the 11:58:15	12	elect to reduce the contract 11:59:47
13	layout For these purposes, I'd like to go to the 11:58:18	13	capacity to a lower amount by 11:59:48
14	FIT contract You don't have it in your binder, but 11:58:21	14	giving notice to the OPA, 11:59:48
15	this is where the technology helps us, and maybe 11:58:24	15	provided that such lower 11:59:48
16	Donnie can pull up Exhibit R-0092, which is the FIT 11:58:27	16	amount is not less than 11:59:50
17	contract 11:58:33	17	75 per cent of the original 11:59:51
18	And this pertains to so Mr Bishop 11:58:37	18	contract capacity." 11:59:53
19	asked about the layout, and you had signalled that 11:58:40	19	[As read] 11:59:56
20	you were satisfied that you could move the project, 11:58:43	20	Q. Okay, right. And just trying to 11:59:57
21	you could also downsize the project 11:58:45	21	clarify here that if you are downsizing, it wasn't 11:59:58
22	I'd like to have a look specifically 11:58:48	22	more than 70 it wasn't to below 75 per cent of 12:00:01

24	that? 11:59:19	24	A. That's correct, the limit of 12:00:05
25	A I see it 11:59:20	25	downsizing was 75 per cent. 12:00:06
1 2	Q. Thank you. 12:00:08 PRESIDENT: Okay, Mr. Neufeld. 12:00:13	1 2	Q. I believe your answer was that you 12:01:24 were not surprised that the OPA refused to grant 12:01:25
3	Anything from the Claimant? 12:00:14	3	or was reluctant to grant force majeure initially. 12:01:30
4	MS. SEERS: Yes, a few questions. 12:00:16	4	Just a point of clarification on that. 12:01:34
5	PRESIDENT: Okay. 12:00:18	5	Were you referring to Windstream's pre-moratorium 12:01:36
6	THE WITNESS: I think I'm more popular 12:00:32	6	force majeure claim or were you referring to the 12:01:42

1	MS. SEERS: I believe Dr. Cremades 12:02:39	1	PRESIDENT: Were you involved then in 12:03:44
2	asked him the question specifically, so I was 12:02:40	2	the process after the moratorium? You were still 12:03:45
3	simply my view is that Mr. Roeper was perhaps 12:02:43	3	advising, working with Windstream? 12:03:49
4	confused in answering the question, so I wanted to 12:02:45	4	THE WITNESS: Yes. Yes, we were. 12:03:52
5	give him the opportunity to do so. 12:02:48	5	PRESIDENT: Until when? 12:03:53
6	PRESIDENT: And when answering the 12:02:51	6	THE WITNESS: Until very recently. As 12:03:55
7	question, you can also explain whether you were 12:02:53	7	you saw from some of these documents, we provided 12:04:00
8	involved in the process after the moratorium. 12:02:55	8	layouts, wind resource assessments right into 2015. 12:04:03
9	THE WITNESS: So please repeat the 12:03:00	9	Now after 2012, a lot of that was in 12:04:08
10	question. 12:03:01	10	support of documentation, which we understood was 12:04:10
11	BY MS. SEERS: 12:03:01	11	going to be used in submissions. 12:04:12
12	Q. Do you have a view as to whether 12:03:02	12	BY MS. SEERS: 12:04:18
13	Windstream was treated fairly by the government and 12:03:05	13	Q. Mr. Roeper, in response to 12:04:21
14	by the OPA after the moratorium? 12:03:07	14	a question from Mr. Bishop, you mentioned 12:04:22
15	A. No, I do not feel they were 12:03:11	15	an August 9th letter from the MNR, and I've 12:04:24
16	treated fairly. And the reason is that the 12:03:12	16	provided my colleague has provided you with 12:04:28
17	moratorium was I disagreed with the moratorium in 12:03:16	17	a copy of what I believe to be the letter you were 12:04:30
18	the first place, as I explained earlier. I don't 12:03:20	18	referring to, which is Exhibit C-0336. Is that the 12:04:34
19	know why the moratorium was chosen as a tool. It is 12:03:23	19	letter you were referring to? 12:04:42
20	completely obtuse to me. But after the moratorium 12:03:26	20	A. Yes, that was the letter I was 12:04:43
21	was put in place, it was put in place saying we were 12:03:28	21	referring to. 12:04:45
22	going to do a series of studies to deal with any 12:03:30	22	Q. And you mentioned I believe you 12:04:45
23	outstanding issues, and I was left with the 12:03:33	23	mentioned that it gave you comfort regarding the 12:04:55
24	impression that, after some study, we would proceed, 12:03:37	24	grid cell swap. 12:04:59
25	and in my mind that never happened. 12:03:40	25	Would you direct us to what 12:05:00
	Page 146		Page 147
1	specifically in this letter gave you that comfort? 12:05:01	1	the normal land application process. 12:06:06
2	A. Well, to me, this letter was the 12:05:04	2	That's very positive, because it means 12:06:09
3	outcome of a series of meetings that occurred from 12:05:07	3	the MNR is willing to move forward with us. 12:06:10
4	April, May, June, July, prior to this letter being 12:05:09	4	"including holding a site 12:06:14
5	issued, on the issue of grid cell swapping, and it 12:05:12	5	information meeting with MNR 12:06:17
6	says a couple of things: 12:05:19	6	to discuss known potential 12:06:18
7	"Once the reconfiguration of 12:05:22	7	constraints, public and 12:06:19
8	application has been 12:05:23	8	Aboriginal notification, and 12:06:19
9	finalized, the amended 12:05:24	9	confirmation of requirements 12:06:21
10	applications can begin to 12:05:25	10	for offshore wind in the 12:06:22
11	move through the normal Crown 12:05:28	11	renewable energy approvals 12:06:24
12	land application process." 12:05:29	12	process." 12:06:25
13	So that's positive, which means as 12:05:31	13	Which ties back to some of the 12:06:26
14	soon as the setback issue is dealt with, which is 12:05:32	14	requirements that we were talking about on the MNR 12:06:28
15	supposed to be September at that time 12:05:41	15	part of the June 25th public consultation process 12:06:30
16	Q. Pardon me, September of 2010? 12:05:42	16	where the MNR stated it had some additional 12:06:33
17	A. September of 2010. So when the 12:05:45	17	requirements. We wanted to know what those were. 12:06:36
18	consultation started on June 25th before the 12:05:47	18	We later found out what they were. 12:06:38
19	consultation we didn't know what was coming. Then 12:05:49	19	One of them had to do with fish impacts, electric 12:06:40
20	the consultation came out on June 25th. We were 12:05:52	20	lines impact on fish, and a couple of other issues. 12:06:45
21	under the impression that the consultation would 12:05:55	21	Then it goes on to say: 12:06:47
22	complete some time in early fall. And what this 12:05:57	22	"I appreciate your need for 12:06:49
			11 61 1 10 0 6 70
23	letter says is once the reconfiguration of 12:05:59	23	certainty on this file, and 12:06:50
23 24 25	letter says is once the reconfiguration of 12:05:59 application has been finalized, which had to do with 12:06:01 the setback provisions, we can move forward through 12:06:04	23 24 25	we will move as quickly as 12:06:51 possible through the 12:06:52

	Page 148		Page 149
1	remainder of the application 12:06:53	1	contract are the three cornerstones of doing 12:08:02
2	review process in order that 12:06:54	2	offshore any Crown land based renewable project. 12:08:04
3	you may obtain applicant of 12:06:55	3	Windstream had applied earlier in 12:08:11
4	record status in a timely 12:06:57	4	2008. We weren't involved with that, but in 2008 12:08:13
5	manner." 12:06:59	5	Windstream had applied for grid cells. 12:08:16
6	So, to me, this was what we had been 12:07:00	6	As the FIT program was rolled out, the 12:08:19
7	meeting about for several months, and this was the 12:07:02	7	government was rolling out the FIT program 12:08:21
8	letter that showed me that those meetings had moved 12:07:04	8	requirements, the submission requirements, and one 12:08:24
9	the goal post. 12:07:11	9	of those requirements was that you had a certain 12:08:25
10	Q. Okay. In response to another 12:07:12	10	land status, if you are doing your project on Crown 12:08:29
11	question from Mr. Bishop, you mentioned a letter 12:07:15	11	land. 12:08:31
12	from Minister Cansfield, who I understand was the 12:07:17	12	So if you were on private land, you 12:08:32
13	Minister of Natural Resources at the time. I've 12:07:22	13	would need to show a lease. If you are on Crown 12:08:34
14	given you a document, which is Exhibit C-0144. It's 12:07:25	14	land, you need to show a status, some sort of 12:08:36
15	a letter from Minister Cansfield to Mr. Baines dated 12:07:31	15	status. 12:08:39
16	September 24th, 2009. 12:07:35	16	This letter is a really important 12:08:39
17	Is that the letter that you are 12:07:38	17	document, because it explains the status of 12:08:41
18	referring to? 12:07:39	18	Windstream. And especially the letter says, without 12:08:46
19	A. Yes, it is. 12:07:39	19	me re-reading it, that this status letter this 12:08:48
20	Q. And I believe you were discussing 12:07:41	20	letter satisfies the requirements for you to file 12:08:52
21	this letter in the context of the relationship 12:07:45	21	for the FIT contract applications. 12:08:54
22	between the FIT program and site access; is that 12:07:50	22	So it's huge. 12:08:57
23	right? 12:07:54	23	Not only that, this letter was huge, 12:08:59
24	A. So, site release was important 12:07:55	24	because it was actually issued by a Minister. 12:09:00
25	aspect of the process. Site release, REA and FIT 12:07:59	25	So there were a number of these 12:09:04
	Page 150		Page 151
1	letters issued, I actually saw in my practice 12:09:06	1	didn't have process for it. They were still working 12:10:15
2	a number of these. 12:09:09	2	on that. The government wanted to let out. 12:10:18
3	In the lead up to the FIT program in 12:09:10	3	The gut feeling is, Cabinet made 12:10:20
4	the fall of 2009, there was a lot going on. As 12:09:13	4	a decision to get the letters out, the Minister 12:10:23
5	I was saying earlier, MOE was trying to roll out 12:09:16	5	itself decided to sign the letter because the 12:10:25
6	REA. MNR was working on its site release process. 12:09:20	6	bureaucracy was not ready to sign the letters 12:10:27
7	And, MNR, in my view, had issues. 12:09:23	7	because they were hung up in their own regulatory 12:10:30
8	They had wrinkles in trying to move as quickly as 12:09:26	8	delays, so 12:10:33
9	the government wanted to move in the FIT program, 12:09:28	9	Q. Okay. Dr. Heiskanen asked you 12:10:35
10	the REA program, and the site release process. 12:09:30	10	about whether the timeline for offshore wind 12:10:43
11	What happened with this letter was 12:09:33	11	facilities under the FIT contract, or in the FIT 12:10:46
12	that there was a lot of industry pressure to get 12:09:34	12	program, was realistic. And in your answer to that 12:10:48
13	confirmation from the MNR that the grid cells that 12:09:37	13	question, you mentioned that the four-year timeline 12:10:54
14	had been applied for had been accepted, awarded, 12:09:40	14	was tight, I believe. 12:10:56
15	whatever you want to call it, that the Applicant had 12:09:47	15	A. Tight, but doable, I think I said. 12:10:58
16	status on those lands that they'd applied, because 12:09:49	16	Q. All right, tight, but doable. 12:11:01
17	that was a requirement for the FIT program. 12:09:52	17	What did Windstream do to try to 12:11:03
18	Those letters never came out. We 12:09:54	18	mitigate that risk of the tight four-year timeline? 12:11:05
19	waited for a long time, in 2009, to get confirmation 12:09:56	19	A. So, to me, the obvious answer is 12:11:10
20	for a number of clients on this issue. 12:09:59	20	when the FIT contract was signed in August, we got 12:11:16
21	The fact that this letter was then 12:10:03	21	five years instead of four years under the contract. 12:11:19
22	came out from Minister Cansfield herself, told me 12:10:05	22	And so it got a contract the simple answer is 12:11:21
23	a bunch of things. 12:10:09	23	Windstream got a contract amendment from OPA from 12:11:29
24	Number one, the bureaucracy was still 12:10:10	24	48 months to 60 months in the FIT contract. 12:11:33
25	struggling with what exactly to put out. They 12:10:13	25	Q. Thank you. Those are my 12:11:36

	Page 152		Page 153
1	questions. 12:11:36	1	ready. Thank you very much. Good afternoon, 12:24:23
2	PRESIDENT: Thank you, Ms. Seers, and 12:11:38	2	Mr. Cecchini. 12:24:27
3	thank you, Mr. Roeper. That concludes your 12:11:41	3	MR. TERRY: And, Mr. President, if we 12:24:30
4	examination. Thank you very much for your time and 12:11:43	4	could just put one issue on the record first, which 12:24:33
5	availability. 12:11:46	5	we discussed with our friends on the other side, and 12:24:37
6	THE WITNESS: Thank you. 12:11:48	6	that is with respect to Mr. Cecchini's evidence - 12:24:40
7	PRESIDENT: We are falling a little 12:11:49	7	is this working? 12:24:47
8	bit behind in our program, so I suggest we start 12:11:51	8	PRESIDENT: Yes, it's working. 12:24:48
9	with the next witness now before the lunch break, at 12:11:54	9	MR. TERRY: You will recall that we 12:24:50
10	least for half an hour or so. Let's have a very 12:11:56	10	had requested from Canada, and then had that had 12:24:51
11	short break, technical break of five minutes, and 12:12:00	11	resulted in a request to the Tribunal, and 12:24:58
12	then we will continue with the next witness. 12:12:04	12	a direction with respect to some a letter that 12:25:00
13	MS. SEERS: Mr. President, may I ask 12:12:08	13	Mr. Cecchini had provided two letters that 12:25:05
14	for your indulgence for a ten-minute break just to 12:12:11	14	Mr. Cecchini had provided to the Canada's damages 12:25:08
15	gather documents and binders and the like? 12:12:14	15	experts, BRG, with respect to some information about 12:25:12
16	PRESIDENT: That's fine. So we have 12:12:16	16	other FIT projects. And you may recall there were 12:25:18
17	flexible timelines with this program, within certain 12:12:17	17	some issues where we were asking for the underlying 12:25:22
18	reasonable limits. 12:12:23	18	information. 12:25:25
19	MS. SEERS: Very much appreciated. 12:12:25	19	Canada last night provided us with 12:25:25
20	Recess taken at 12:12 p m. 12:12:27	20	some of that underlying information. We are taking 12:25:28
21	Upon resuming at 12:24 p m. 12:12:27	21	steps to try to see whether this assists us at all, 12:25:31
22	MS. SEERS: We appreciate the 12:24:18	22	but, by agreement with Canada, we're going to 12:25:35
23	indulgence. We are ready to proceed whenever the 12:24:18	23	proceed with the cross-examination today, but have 12:25:37
24 25	Tribunal is ready to proceed. 12:24:19	24 25	the right to re-call Mr. Cecchini solely to ask him 12:25:40
	PRESIDENT: The Tribunal is always 12:24:21	23	questions on matters arising out of those two 12:25:44

1	letters, and out of the additional information 12:25:47	1	PRESIDENT: And welcome. 12:26:49
2	that's been provided last night, or any further 12:25:49	2	THE WITNESS: Thank you. 12:26:50
3	additional information that might be provided as 12:25:53	3	PRESIDENT: Can I just first ask you 12:26:51
4	a result of this exchange. 12:25:56	4	to state your full name for the record and then read 12:26:52
5	PRESIDENT: This is the information 12:26:01	5	the declaration for witnesses that you have in front 12:26:57
6	that was just handled just last week before the 12:26:02	6 7	of you. 12:27:03
7 8	hearing which was subject to some confidentiality 12:26:05 restrictions? 12:26:08	8	THE WITNESS: Okay, Perry John 12:27:03 Cecchini. I solemnly declare upon my honour and 12:27:05
9	MR. TERRY: Yes. Yes, you will recall 12:26:09	9	conscience that in my evidence before this Tribunal, 12:27:12
10	that issue, and the information some information 12:26:10	10	I shall speak the truth, the whole truth and nothing 12:27:14
11	was provided last night to us. 12:26:13	11	but the truth. 12:27:17
12	PRESIDENT: Okay, but this would be 12:26:15	12	PRESIDENT: Thank you. You have 12:27:18
13	documentation or information that is not on record? 12:26:16	13	submitted one witness statement in this proceeding 12:27:20
14	MR. TERRY: That's correct. This is 12:26:22	14	dated January 20, 2015? 12:27:22
15	documentation that if we were going to get into it 12:26:23	15	THE WITNESS: Yes. 12:27:27
16	would involve third-party information, and would 12:26:26	16	PRESIDENT: It is actually dated 12:27:27
17	require appropriate steps to be taken to protect 12:26:29	17	your signature is dated January 19th, 2015? 12:27:30
18	that information. 12:26:32	18	THE WITNESS: Yes. 12:27:33
19	PRESIDENT: Okay. Perhaps we cross 12:26:32	19	PRESIDENT: You have that statement in 12:27:34
20	the bridge when we get there, and see how we'll deal 12:26:34	20	front of you? 12:27:35
21	with it. 12:26:37	21	THE WITNESS: Yes, I do. 12:27:35
22	MR. TERRY: Thank you. 12:26:38	22	PRESIDENT: And you confirm this is 12:27:36
23	MR. TERRY: Thank you. 12:26:38 PRESIDENT: Okay, thank you. Good 12:26:39	23	your statement? 12:27:38
	MR. TERRY: Thank you. 12:26:38

2	THE WITNESS: Yes, I do. 12:27:47	2	AFFIRMED: PERRY JOHN CECCHINI 12:28:49
3	PRESIDENT: Do you have any 12:27:51	3	EXAMINATION BY MS. SQUIRES: 12:28:49
4	corrections to make? 12:27:52	4	Q. Good afternoon, Mr. Cecchini. 12:28:51
5	THE WITNESS: Not that I'm aware of. 12:27:54	5	A. Thank you. 12:28:53
6	PRESIDENT: Okay, thank you very much. 12:27:56	6	Q. I wonder if you could briefly 12:28:54
7	It will be Ms. Squires asking a few questions first 12:27:57	7	start by discussing your role of what was the OPA 12:28:55
8	on direct. Then there will be a cross-examination 12:28:01	8	that is now the IESO? 12:28:58
9	followed by the counsel for Claimant, and then 12:28:05	9	A. I am a contract manager for 12:28:59
10	possibly additional questions from the government 12:28:07	10	renewable energy projects. 12:29:01
11	lawyers, and there may be at any time questions from 12:28:10	11	I have been in that position since 12:29:03
12	the Members of the Tribunal. 12:28:15	12	September 2009, and in that role I am essentially 12:29:05
13	THE WITNESS: Thank you. 12:28:16	13	the main kind of contact between our counterparties, 12:29:09
14	PRESIDENT: Let's try to do at least 12:28:17	14	and the organization, the OPA or the IESO. So 12:29:14
15	half an hour, and if you could or it's perhaps 12:28:19	15	I manage contracts. 12:29:20
16	a question to or request to Ms. Seers rather that we 12:28:24	16	I have a portfolio of contracts right 12:29:22
17	break around one o'clock, or thereabouts, when it is 12:28:28	17	now, numbering about 2,000, and I have seven people 12:29:25
18	a convenient time. 12:28:35	18	who report to me. So I that's what I do. I manage 12:29:28
19	MS. SQUIRES: Certainly. And please 12:28:36	19	contracts and I deal with issues that arise from 12:29:36
20	feel free to direct me to stop when it's 12:28:37	20	those contracts. And we review documentation that 12:29:38
21	appropriate. 12:28:40	21	comes from suppliers dealing with declaring 12:29:40
22	PRESIDENT: We will. 12:28:41	22	commercial operation, force majeure, things like 12:29:43
23	MS. SQUIRES: I know. 12:28:42	23	that. 12:29:46
24	I don't think I'll be 12:28:46	24	Q. So I want to ask you a couple of 12:29:47
25	a full half hour, so we should be able to get 12:28:47	25	questions, or three actually, about the practice of 12:29:48
	Page 158		Page 159
1	_	,	
1	the OPA with regard to that contract management, 12:29:49	1	So that means these are obligations 12:30:55
2	because some questions have come up from the 12:29:52	2	that we see that the supplier's undertaking. 12:30:56
3	Tribunal in Canada's opening arguments. 12:29:55	3	This is a program. It's a standard 12:31:00
4 5	A. Okay. 12:29:58	4 5	offer. The contract lists in the obligations of the 12:31:02
6	Q. And the first of those is during 12:29:58	6	supplier it's the duty of the supplier to make 12:31:05
7	that time Mr. Bishop asked counsel for Canada that 12:30:00	7	a decision whether they can meet those obligations. 12:31:09
8	when agreeing to offer a FIT contract, does the OPA 12:30:02	8	And, therefore, we see that as their responsibility, 12:31:10
9	do any due diligence on whether or not a supplier 12:30:04	9	and they should be doing their due diligence. 12:31:14
	can meet the contract deadlines imposed in a FIT 12:30:07	10	We're listing our requirements. They 12:31:17
10	contract? 12:30:13		should be undertaking due diligence as to whether 12:31:22
11 12	Can you explain for the Tribunal what 12:30:13	11 12	they can meet those requirements. 12:31:24
	process the OPA undergoes when reviewing application 12:30:14		The one exception, and this I don't 12:31:26
13	and deciding to offer a FIT contract? 12:30:18	13	think applies to this situation, is that during the 12:31:27
14 15	A. Okay, I'll tell you according to 12:30:20	14 15	initial Feed-in-Tariff contracts offer, there were 12:31:29
	my knowledge. I just want to be clear, I am 12:30:21	16	some suppliers that bid time off, that said that 12:31:34
16 17	a contract manager. I do not I am not involved 12:30:23	17	they could develop in an accelerated situation, and 12:31:38
	in what we call our procurement group which deals 12:30:25		that gave them priority with respect to contract 12:31:41
18 19	with applications. I deal with contracts from the 12:30:28	18 19	award. And there was some review of whether they 12:31:45
	moment they're signed, or the moment they're 12:30:31		could they met qualifications there to assume 12:31:48
20	offered, in some cases. 12:30:33	20	to get bid time off. So there was a review of their 12:31:53
21	We it's my understanding that the 12:30:36	21	bid time off requirements. There was no review 12:31:57
22 23	OPA, and now the IESO, does not do any due diligence 12:30:39	22	otherwise. 12:32:00
23	with regards to the ability of the suppliers to meet 12:30:43	24	Q. And when you say "bid time off," 12:32:00
25	the obligations of the contract, for the most part. 12:30:48	4	just for the sake of the Tribunal, you mean 12:32:03
	I'll get to the one difference later. 12:30:51	25	accelerating the commercial operation? 12:32:05

	Page 160		Page 161
1	A. Accelerating what the 12:32:07	1	The second type of extension that are 12:33:08
2	milestones date for commercial operation. 12:32:08	2	granted are where we see that there are program or 12:33:10
3	It was a for the most part, there 12:32:10	3	policy issues that have to be dealt with, and those 12:33:14
4	was standards times. Three years for the most part 12:32:12	4	come from the OPA and subsequently the EISO itself, 12:33:18
5	for on-shore wind, five years for water power, 12:32:15	5	but those extensions are generally extensions that 12:33:24
6	things like that. 12:32:21	6	apply throughout the whole program. We don't do 12:33:27
7	If you bid less than that, you had to 12:32:22	7	extensions on a one-off basis. 12:33:30
8	meet certain requirements, and those were reviewed. 12:32:24	8	This is a standard offer program. We 12:33:33
9	Q. Okay. Now, Mr. Bishop also asked 12:32:27	9	believe it's important to ensure that the rules that 12:33:35
10	Canada during its opening argument about the OPA's 12:32:30	10	apply and the contract terms that apply, apply 12:33:38
11	practice with regard to holding people to the 12:32:33	11	generally throughout our counterparties. We don't 12:33:41
12	deadlines under the FIT contract, and their practice 12:32:35	12	do an extension for one party, that we won't give to 12:33:45
13	in granting extensions. 12:32:38	13	another, if there's a similar fact situation, so we 12:33:48
14	So if we leave aside the discussion of 12:32:39	14	are very careful to ensure that we don't create 12:33:50
15	force majeure extensions, can you provide some 12:32:42	15	if we give an extension it's a precedent for us, and 12:33:54
16	overview of how the OPA decides when those types of 12:32:45	16	we will give it for everybody, but it is for policy 12:33:57
17	extensions have been granted, and when they have 12:32:48	17	or program reasons to further the objective of the 12:34:00
18	done that? 12:32:50	18	program. 12:34:02
19	A. Extensions are granted in two 12:32:51	19	Q. Now, Mr. Bishop also asked in the 12:34:04
20	general categories. I'll put them as categories. 12:32:53	20	opening arguments about whether or not the status 12:34:07
21	The first is we receive we have, on 12:32:56	21	of Windstream's FIT contract, and whether or not in 12:34:10
22	at two occasions that I'm aware of, received 12:32:58	22	the view of the OPA, they were given the amount of 12:34:13
23	directions from the government from the Minister, 12:33:00	23	force majeure they were seen to be in breach of that 12:34:15
24 25	to offer extensions to certain categories of 12:33:02	24 25	FIT contract. 12:34:18
25	projects, and we follow those directions. 12:33:06	25	Do you have any views on the status of 12:34:19
	Page 162		Page 163
1	Page 162 the FIT contract? 12:34:20	1	Page 163 a termination, and there is one that I'm aware of, 12:35:36
1 2	•	1 2	
	the FIT contract? 12:34:20 A. The status of the FIT contract, in 12:34:22 my view, is that it's still in place. They're under 12:34:23		a termination, and there is one that I'm aware of, 12:35:36 under Section 10.1 (g), or we exercise our rights 12:35:38 under 10.1(g) or the supplier exercises their rights 12:35:44
2 3 4	the FIT contract? 12:34:20 A. The status of the FIT contract, in 12:34:22 my view, is that it's still in place. They're under 12:34:23 force majeure. So, that's where it's at. That 12:34:28	2 3 4	a termination, and there is one that I'm aware of, 12:35:36 under Section 10.1 (g), or we exercise our rights 12:35:38 under 10.1(g) or the supplier exercises their rights 12:35:44 under 10.1(g) security would be returned at that 12:35:48
2 3 4 5	the FIT contract? 12:34:20 A. The status of the FIT contract, in 12:34:22 my view, is that it's still in place. They're under 12:34:23 force majeure. So, that's where it's at. That 12:34:28 simple. 12:34:32	2 3 4 5	a termination, and there is one that I'm aware of, 12:35:36 under Section 10.1 (g), or we exercise our rights 12:35:38 under 10.1(g) or the supplier exercises their rights 12:35:44 under 10.1(g) security would be returned at that point. 12:35:50
2 3 4 5 6	the FIT contract? 12:34:20 A. The status of the FIT contract, in 12:34:22 my view, is that it's still in place. They're under 12:34:23 force majeure. So, that's where it's at. That 12:34:28 simple. 12:34:32 Q. Okay, now, I'd just like one 12:34:32	2 3 4 5	a termination, and there is one that I'm aware of, 12:35:36 under Section 10.1 (g), or we exercise our rights 12:35:38 under 10.1(g) or the supplier exercises their rights 12:35:44 under 10.1(g) security would be returned at that 12:35:48 point. 12:35:50 Other than that, we don't return 12:35:51
2 3 4 5 6 7	the FIT contract? A. The status of the FIT contract, in 12:34:22 my view, is that it's still in place. They're under 12:34:23 force majeure. So, that's where it's at. That 12:34:28 simple. 12:34:32 Q. Okay, now, I'd just like – one 12:34:32 last question then on a topic that the Tribunal has 12:34:35	2 3 4 5 6 7	a termination, and there is one that I'm aware of, 12:35:36 under Section 10.1 (g), or we exercise our rights 12:35:38 under 10.1(g) or the supplier exercises their rights 12:35:44 under 10.1(g) security would be returned at that 12:35:48 point. 12:35:50 Other than that, we don't return 12:35:51 security. If the contract is still in development, 12:35:52
2 3 4 5 6 7 8	the FIT contract? A. The status of the FIT contract, in 12:34:22 my view, is that it's still in place. They're under 12:34:23 force majeure. So, that's where it's at. That 12:34:28 simple. 12:34:32 Q. Okay, now, I'd just like — one 12:34:32 last question then on a topic that the Tribunal has 12:34:35 also asked about, and that relates to the letter of 12:34:37	2 3 4 5 6 7 8	a termination, and there is one that I'm aware of, 12:35:36 under Section 10.1 (g), or we exercise our rights 12:35:38 under 10.1(g) or the supplier exercises their rights 12:35:44 under 10.1(g) security would be returned at that 12:35:48 point. 12:35:50 Other than that, we don't return 12:35:51 security. If the contract is still in development, 12:35:52 the security remains in place. 12:35:55
2 3 4 5 6 7 8	the FIT contract? A. The status of the FIT contract, in 12:34:22 my view, is that it's still in place. They're under 12:34:23 force majeure. So, that's where it's at. That 12:34:28 simple. 12:34:32 Q. Okay, now, I'd just like — one 12:34:32 last question then on a topic that the Tribunal has 12:34:35 also asked about, and that relates to the letter of 12:34:37 credit that the FIT supplier would provide to the 12:34:41	2 3 4 5 6 7 8	a termination, and there is one that I'm aware of, 12:35:36 under Section 10.1 (g), or we exercise our rights 12:35:38 under 10.1(g) or the supplier exercises their rights 12:35:44 under 10.1(g) security would be returned at that 12:35:48 point. 12:35:50 Other than that, we don't return 12:35:51 security. If the contract is still in development, 12:35:52 the security remains in place. 12:35:55 Q. Just for the sake of the Tribunal 12:35:57
2 3 4 5 6 7 8 9	the FIT contract? A. The status of the FIT contract, in 12:34:22 my view, is that it's still in place. They're under 12:34:23 force majeure. So, that's where it's at. That 12:34:28 simple. 12:34:32 Q. Okay, now, I'd just like one 12:34:32 last question then on a topic that the Tribunal has 12:34:35 also asked about, and that relates to the letter of 12:34:37 credit that the FIT supplier would provide to the 12:34:41 OPA once they sign a FIT contract. 12:34:45	2 3 4 5 6 7 8 9	a termination, and there is one that I'm aware of, 12:35:36 under Section 10.1 (g), or we exercise our rights 12:35:38 under 10.1(g) or the supplier exercises their rights 12:35:44 under 10.1(g) security would be returned at that 12:35:48 point. 12:35:50 Other than that, we don't return 12:35:51 security. If the contract is still in development, 12:35:52 the security remains in place. 12:35:55 Q. Just for the sake of the Tribunal 12:35:57 then, the termination under 9.1(j) that would be 12:35:58
2 3 4 5 6 7 8 9 10	the FIT contract? A. The status of the FIT contract, in 12:34:22 my view, is that it's still in place. They're under 12:34:23 force majeure. So, that's where it's at. That 12:34:28 simple. 12:34:32 Q. Okay, now, I'd just like — one 12:34:32 last question then on a topic that the Tribunal has 12:34:35 also asked about, and that relates to the letter of 12:34:37 credit that the FIT supplier would provide to the 12:34:41 OPA once they sign a FIT contract. 12:34:45 Can you provide some information for 12:34:47	2 3 4 5 6 7 8 9 10	a termination, and there is one that I'm aware of, 12:35:36 under Section 10.1 (g), or we exercise our rights 12:35:38 under 10.1(g) or the supplier exercises their rights 12:35:44 under 10.1(g) security would be returned at that 12:35:48 point. 12:35:50 Other than that, we don't return 12:35:51 security. If the contract is still in development, 12:35:52 the security remains in place. 12:35:55 Q. Just for the sake of the Tribunal 12:35:57 then, the termination under 9.1(j) that would be 12:35:58 termination for projects that are not in force 12:36:02
2 3 4 5 6 7 8 9 10 11 12	the FIT contract? A. The status of the FIT contract, in 12:34:22 my view, is that it's still in place. They're under 12:34:23 force majeure. So, that's where it's at. Okay, now, I'd just like — one 12:34:32 last question then on a topic that the Tribunal has 12:34:35 also asked about, and that relates to the letter of 12:34:37 credit that the FIT supplier would provide to the 12:34:41 OPA once they sign a FIT contract. 12:34:45 Can you provide some information for 12:34:47 the Tribunal on when and under what circumstances 12:34:48 the OPA returns a letter of credit for those 12:34:50 projects that are in force majeure like Windstream? 12:34:54 A. We don't return security at all, 12:34:57 unless certain conditions are met. For instance, we 12:35:02 will return security if a supplier achieves 12:35:10 We will return — our practice is if 12:35:11 a supplier enters into a mutual termination 12:35:18 stop date" which is a date that 9.1(J) comes into 12:35:22	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	a termination, and there is one that I'm aware of, 12:35:36 under Section 10.1 (g), or we exercise our rights 12:35:38 under 10.1(g) or the supplier exercises their rights 12:35:44 under 10.1(g) security would be returned at that 12:35:48 point. 12:35:50 Other than that, we don't return 12:35:51 security. If the contract is still in development, 12:35:52 the security remains in place. 12:35:55 Q. Just for the sake of the Tribunal 12:35:57 then, the termination under 9.1(j) that would be 12:35:58 termination for projects that are not in force 12:36:02 majeure; correct? 12:36:04 A. Projects that are not in force 12:36:06 majeure. Projects that have missed their 12:36:07 requirement under the contract. There's a certain 12:36:10 date that people have an obligation to bring their 12:36:12 projects into commercial operation by, and if they 12:36:14 don't meet that date, and we terminate them for that 12:36:18 reason, we would not return their security. 12:36:25 termination provision you mentioned, can you explain 12:36:28 how that works with the timelines and when you would 12:36:30

5	that point to kind of walk away from the contract. 12:36:56	5	front of you, if I could get you to turn to tab 1. 12:38:26
6	If that is exercised by either party, 12:37:05	6	A. Okay. 12:38:29
7	the contract stipulates that we have to return 12:37:07	7	Q. I understand this document to be 12:38:30

9	Q. Just one last question then. You 12:37:14	9	it relates to the price schedule in the 12:38:39

12	either of those timelines being met. So, my 12:37:21	12	A. I was not working for the Ontario 12:38:54
13	question to you then is: If Windstream was to come 12:37:23	13	Power Authority at that time, so I haven't reviewed 12:38:55

4	A. Yes, I see that on the page. 12:39:33	4	developed? 12:40:42
5	Q. And then if you go the next slide, 12:39:34	5	A. I have no I have no knowledge 12:40:42

8	A. Yes, I see that. 12:39:43	8	the OPA in September, 2009 and I was not involved 12:40:50
9	Q. And the reason for that is 12:39:45	9	even in my previous job in the pricing schedules 12:40:56
10	indicated as being that those technologies for which 12:39:49	10	that were developed. 12:41:00

13	likely to vary widely, considerable uncertainty 12:40:01	13	has not worked there at the time. And I would note 12:41:09
14	regarding costs or technology that is immature and 12:40:05	14	that two of the claimants' experts were actually 12:41:11
15	still developing; do you see that? 12:40:08	15	employed by OPA at that time to develop these rules, 12:41:14
16	A. Yes, I see it. 12:40:10	16	and they've decided to cross Mr. Cecchini on it. 12:41:16
17	Q. So I take it then that given that 12:40:11	17	So, it's unclear to us why he's being 12:41:19

21	A. I can't comment on this document; 12:40:26	21	for submissions. 12:41:29
22	I've never seen it. 12:40:29	22	MS. SEERS: I'm simply asking 12:41:31
23	Q. Okay, so you don't 12:40:31	23	Mr. Cecchini for his understanding, so if he doesn't 12:41:32
24	A. And I was not involved in any way 12:40:32	24	have an understanding, then that should be his 12:41:34

8 15	[As read] 12:43:21
16	And do you have an understanding as to 12:43:21
17	whether that accurately reflects the way the prices 12:43:22
18	were developed? 12:43:25
19	A. Again, I really wasn't involved in 12:43:27
20	the establishment of pricing, so I can't speak to 12:43:28
21	that. 12:43:32
4 22	Q. And you don't have a current 12:43:32
0 23	understanding about it either? 12:43:33
24	A. I can't speak to how they came up 12:43:35
25	with the prices for the program. 12:43:38
170	Page 171
1	of 2011 the then Deputy Minister of Energy requested 12:44:38
2	that the OPA offer a one year extension for FIT 12:44:43
3	contracts due to permitting delays; is that correct? 12:44:49
4	A. I can speak to that, yes. 12:44:51
5	Q. Yes, finally. We're into your 12:44:53
6	bailiwick. 12:44:55
7	A. Yes. 12:44:56
8	Q. If you turn to tab 2, it's 12:44:57
9	a letter dated January pardon me for the 12:45:06
10	record, that is Exhibit C-0954. And I may not have 12:45:08
11	said so, but the previous document that we were on 12:45:14
12	at tab 1, for the record, was Exhibit C-0121. 12:45:16
13	I apologize. I'll try to be better about that. 12:45:21
14	So, now we're on tab 2, C-0954, which 12:45:23
15	is a letter dated January 28, 2011 from Deputy 12:45:28
16	Minister of Energy, David Lindsay to Colin Anderson, 12:45:31
17	who is the CEO of the OPA. And he says: 12:45:35
18	"I understand that while 12:45:39

2	specified in their FIT 12:45:50	2	A. Yes, the OPA did comply and, in 12:46:28
3	contract or their conditional 12:45:51	3	fact, the OPA was involved in the drafting of this 12:46:32
4	offer. As a result, 12:45:54	4	letter. 12:46:36
5	I request that in place of 12:45:55	5	Q. And then I further understand on 12:46:39
6	a case-by-case approach to 12:45:56	6	June 12th, 2013 and you can turn to a document which 12:46:43
7	granting force majeure 12:45:58	7	is at tab 4, C-0661. The Minister of Energy 12:46:47
8	relief, whether pursuant to 12:46:00	8	directed the OPA to offer a four-year extension to 12:46:55
9	these contracts or otherwise 12:46:01	9	the milestone commercial operation date in existing 12:46:59
10	in relation to these delays, 12:46:02	10	large FIT contracts for aboriginal participation 12:47:04

12	offered to extend the 12:46:05	12	this document? I think the relevant direction is on 12:47:11
13	milestone date for commercial 12:46:07	13	page 6. 12:47:13
14	operation, as provided for in 12:46:09	14	A. Yes, that's I'm aware of this 12:47:14
15	existing FIT contracts and 12:46:09	15	document. 12:47:20
16	the expiry dates for existing 12:46:12	16	Q. And the OPA complied with the 12:47:20
17	microfit applications with 12:46:12	17	Minister's direction? 12:47:21
18	conditional offers by 12:46:12	18	A. The OPA always complies with 12:47:22
19	a period of up to 365 days 12:46:14	19	Minister's directions. 12:47:24
20	for interested applicants." 12:46:17	20	Q. Okay, and then if you turn to 12:47:31
21	[As read] 12:46:19	21	tab 5 this is a June 26, 2013 letter from the 12:47:32
22	A. Yes. 12:46:20	22	Minister of Energy to Mr. Anderson, again, that 12:47:39
23	Q. Do you recall this document? 12:46:20	23	directs the OPA to offer a three-year extension to 12:47:46
24	A. Yes, I was involved. 12:46:22	24	the MCOD for existing water power contracts; is that 12:47:49

1	we will follow ministerial directions. 12:50:14	1	not aware of any extensions to the MCOD ever being 12:51:20
2	Q. Right. So, with respect to 12:50:16	2	granted? 12:51:23
3	Windstream you will agree that you did grant 12:50:19	3	A. I don't recall at this moment that 12:51:24
4	a one-year extension to Windstream's FIT contract? 12:50:21	4	we do. We really make an effort to, when we do 12:51:27
5	A. Yes, and we would also have 12:50:25	5	decisions, that we do it on a program basis. 12:51:30
6	applied that to any offshore wind project. 12:50:26	6	It's important because we have 3,000 12:51:32
7	Q. Of which there are no other ones? 12:50:30	7	contracts, and we don't want to how should I say 12:51:34
8	A. But there were at the time other 12:50:31	8	create precedents that inadvertently 12:51:39
9	projects in the application. 12:50:33	9	Q. So maybe I guess I was asking 12:51:43
10	Q. In the application queue, but no 12:50:35	10	you about one-offs then, and I guess in your 12:51:45
11	actual authorizations? 12:50:38	11	description, Windstream's extension was not 12:51:49
12	A. No authorization. 12:50:39	12	a one-off. So, let's talk about in a programatic, 12:51:51
13	Q. So, have you ever granted 12:50:40	13	as you call it, extension? 12:51:53
14	an extension to other projects on a one-off basis? 12:50:41	14	A. Well Windstream is a unique 12:51:56
15	A. Not that I'm aware of. I know we 12:50:47	15	situation in most aspects, so we can get into that. 12:51:58
16	have granted we do force majeures, but I don't 12:50:49	16	Q. I'd like to talk about extensions, 12:52:02
17	think we do extensions in that one-off basis kind of 12:50:52	17	generally whether they are on a program basis or 12:52:03
18	way. 12:51:01	18	not. We talked about we talked about the one for 12:52:05
19	Q. So we'll get to force majeure in 12:51:02	19	water power. We talked about the one for aboriginal 12:52:07
20	a bit, so right now I just want to talk about MCOD 12:51:03	20	consultation projects. We talked about the one for 12:52:11
21	extensions that are not force majeure. So, I guess 12:51:07	21	permitting, those issued pursuant to the Deputy 12:52:14
22	there are two different buckets of the way that you 12:51:12	22	Minister of Energy's requests. Are there any 12:52:18
23	can account for delay, if you will. 12:51:15	23	others? 12:52:22
24	A. Yes. 12:51:16	24	A. We have got the one year 12:52:27
25	Q. Right. So, have you so you are 12:51:18	25	extension, the extensions for the ERT, the 12:52:28

1	information that was disclosed for the first time 12:55:15	1	point. 12:56:23
2	last night because we've dealt with that separately; 12:55:16	2	PRESIDENT: We are already on 12:56:24
3	I'm asking questions based on what we know from the 12:55:19	3	confidential feed. The question is whether you can 12:56:25
4	public record, which is very little actually, but 12:55:22	4	answer that question - 12:56:27
5	we're doing the best we can. 12:55:24	5	THE WITNESS: Oh, I can answer that 12:56:29
6	So, if we need to go on confidential 12:55:25	6	question. 12:56:29
7	feed and for non-counsel to step out of the room, 12:55:27	7	PRESIDENT: with all these people 12:56:30
8	then I have no objection. 12:55:30	8	in the room or is the answer only for counsel, 12:56:31
9	Restricted Confidential transcript begins 12:55:32	9	whether you need to disclose information that 12:56:37
10	PRESIDENT: So, we are now in 12:55:35	10	is third party 12:56:39
11	confidential feed. Let's hear what the question is 12:55:36	11	(Simultaneous speakers - unclear) 12:56:40
12	and whether the question can be answered without 12:55:39	12	THE WITNESS: It's third party 12:56:41
13	some people leaving the room. 12:55:44	13	confidential information. 12:56:42
14	MS. SEERS: So the question is that 12:55:46	14	(Comments made off the record - no 12:56:43
15	I understand from the public record, that the Nigig 12:55:48	15	audio) 12:56:43
16	project, as you call it, is a 300-megawatt project 12:55:55	16	PRESIDENT: Okay, so then I understand 12:56:43
17	that got its FIT contract in 2010, has not been - 12:55:59	17	the agreement between counsel is that it is only 12:56:45
18	and has not been terminated, as far as we know and 12:56:03	18	counsel who should be present when this issue is 12:56:50
19	has not yet entered its environmental assessment 12:56:06	19	discussed. 12:56:53
20	process. 12:56:09	20	MS. SQUIRES: That's correct. And 12:56:54
21	So, my question to you, Mr. Cecchini 12:56:13	21	counsel for the Ontario Power Authority has 12:56:55
22	is: Has that project or that proponent's FIT 12:56:16	22	indicated that they consider this restricted access. 12:56:57
23	contract received an extension? 12:56:18	23	They would ask that everybody other than counsel 12:57:00
24	THE WITNESS: I think it's probably 12:56:20	24	leave the room. 12:57:02
25	best that we go on the confidential feed at this 12:56:21	25	PRESIDENT: Can I please ask everybody 12:57:03

A. That we were we directed to and 13:00:39
Q. So you were directed by the 13:00:44
A. The ministerial direction was for 13:00:46
a four-year extension and therefore we followed the 13:00:47
Ministerial direction. 13:00:52
Q. Of the projects that were awarded 13:00:56
FIT contracts at the same time as Windstream, that 13:00:58
are say over 50-megawatts, so large projects and I'm 13:01:01
just referring to wind projects, first of all how 13:01:14
many of those are there? And you know you can 13:01:16
estimate 13:01:19
A. I don't have a I can tell you 13:01:20
that there are 20 projects today that are still 13:01:24
under development. 13:01:28
Q. Okay, but I'm interested 13:01:29
A. I, I 13:01:29
Q. Because that doesn't help us with 13:01:29
the timeline 13:01:31
A. I I 13:01:31
Q so, I'm interested in 13:01:31
A. I can't 13:01:32
Q the ones that were awarded 13:01:32
A. I don't have that 13:01:33
Q. (Simultaneous speakers - unclear) 13:01:33

A. I don't have that information in 13:01:36 13:01:37 PRESIDENT: Can you please wait for 13:01:38 the question and can you also please allow the 13:01:39

witness to ask answer the question --13:01:42 THE WITNESS: Sure. Sorry. 13:01:43 MS. SEERS: Certainly. My apologies. 13:01:44 PRESIDENT: -- before starting a new 13:01:44 13:01:46

BY MS. SEERS: 13:01:50

Q. So, I appreciate you don't have 13:01:51 the data in front of you. Mr. Cecchini was actually 13:01:52 requested, as you know, and not provided so we are 13:01:54 doing our best here. 13:02:00

I am interested in the contracts that 13:02:03 were offered and signed, so the contracts that were 13:02:04 offered to on-shore, I guess, wind projects in 2010 13:02:06 at the same time as Windstream, okay. Just those 13:02:15 ones. Do you know how many those are roughly? 13:02:18

A. I roughly know, but not exactly, 13:02:22 13:02:24 no, not off the top of my head.

Q. What is your rough estimate? 13:02:28

A. It would have been in the 50s. 13:02:30

Q. In the 50s, over 50-megawatts? 13:02:33

A. No, no, 50 on-shore wind contracts 13:02:35

Page 187

would have been offered in 2010. But it would have 13:02:40 been -- that's not an exact number. There were 13:02:44 a number of contracts in the 70 -- we have 70 13:02:47 on-shore wind contracts that were offered. 13:02:49

Some were offered -- the majority were 13:02:52 offered in 2010. There were some offered in 2011. 13:02:54

Q. Right. But a lot of those are 13:02:57 small projects, so I'm asking you about large 13:02:59 projects over 50-megawatts? 13:03:01

A. And I have to admit I don't think 13:03:03 of them in that way. I think of them -- we think of 13:03:07 projects as a large project, those being what we 13:03:10 call "CAR," those that are essentially not under 13:03:14 500-kilowatts, so we don't do a classification for 13:03:20 50, so I think of a 10-megawatt project, 13:03:24 100-megawatt as one in the same for me. 13:03:25

Q. Well, we won't get into the 13:03:29 letters that you provided to Mr. Goncalves from BRG 13:03:31 because we will be dealing with those separately. 13:03:35

> A. Yeah. 13:03:38

Q. But just for the record, in those 13:03:38 letters, you provide information about the number of 13:03:40 contracts that are -- that have been, I think you 13:03:43 say, delayed past MCOD, but haven't provided the 13:03:47 back up information for us to be able to ask 13:03:52

1	questions about that, so I just put that on the 13:03:55	1	let's break for lunch for an hour. We continue at 13:04:57
2	record now because anyway, we take this to 13:03:57	2	2:05 and, Mr. Cecchini, if I could ask you not to 13:05:01
3	another day, but of course since you are sitting 13:04:02	3	speak with anybody during the lunch break about your 13:05:05
4	here not able to answer questions about that, we're 13:04:06	4	testimony. 13:05:07
5	certainly maintaining the request that the 13:04:10	5	THE WITNESS: I understand. 13:05:08
6	underlying information be provided, so that we can 13:04:12	6	PRESIDENT: There's a room reserved 13:05:08
7	ask you questions about that. 13:04:14	7	for you where you can have your lunch. The 13:05:10
8	A. Okay. 13:04:15	8	secretary of the Tribunal will take you there. Thank 13:05:13
9	PRESIDENT: Now, Ms. Seers, we should 13:04:16	9	you very much. 13:05:15
10	be breaking now. Is this a good time or 13:04:19	10	Lunch recess taken at 1:05 p m. 13:05:49
11	MS. SEERS: Certainly. Thank you, 13:04:23	11	Upon resuming at 2:07 p m. 14:07:56
12	Mr. President. 13:04:23	12	Restricted Confidential transcript resumes 14:07:56
13	PRESIDENT: Well, we will now break 13:04:28	13	PRESIDENT: Okay. Thank you. 14:07:56
14	for lunch, so now, that's the question that is 13:04:29	14	We go on, Ms. Seers. 14:08:18
15	a good question. 13:04:32	15	MS. SEERS: Good afternoon. So we are 14:08:21
16	So, when we continue after lunch is 13:04:35	16	still in the in the restricted access, counsel 14:08:22
17	this still going to be confidential between counsel 13:04:37	17	and experts only session. 14:08:26
18	only or can we are we moving to another area? 13:04:39	18	My apologies for for being a little 14:08:29
19	MS. SEERS: We'll move to another 13:04:42	19	bit late, Mr. President. 14:08:31
20	area. The witness doesn't appear to be able to 13:04:43	20	BY MS. SEERS: 14:08:32
21	answer this line of questioning, and so we're 13:04:45	21	Q. Mr. Cecchini, when we left off, we 14:08:32
22	hopeful that when he comes back on another day with 13:04:47	22	had concluded, I think, or reached the edge of your 14:08:37
23	the information we'll be able to pursue this. 13:04:50	23	ability to to explain to us the extent or the 14:08:44
24	PRESIDENT: So very good, so we'll 13:04:53	24	pardon me the situation with the original or 14:08:48
25	return to the standard protocol after lunch. So 13:04:54	25	the FIT contracts for onshore wind that had been 14:08:52
	Page 190		Page 191
1	granted the contracts at the same time as 14:08:56	1	A. Yes. Sometimes, if the force 14:09:53
2	Windstream. 14:08:58	2	majeure situation is after MCOD or it's just before 14:09:56
3	We had not yet got to the force 14:09:00	3	MCOD but it doesn't but it had was irrelevant 14:10:03
4	majeure extension, so that's what I'd like I'd 14:09:03	4	to whether the supplier could achieve their 14:10:07
5	like to explore with you before we leave the 14:09:06	5	milestone date, we would give relief, but only to 14:10:10
6	confidential feed, and then we'll 14:09:09	6	the long stop. 14:10:12
7	A. Okay. 14:09:11	7	Q. Fair enough. 14:10:13
8	Q we'll be able to leave the 14:09:11	8	A. So that's I just wanted to make 14:10:13
9	confidential feed. 14:09:12	9	that distinction. 14:10:17
10	A. Sure. 14:09:13	10	Q. Fair enough. So but with respect 14:10:18
11	Q. So as I as I recall, we talked 14:09:13	11	to pre-MCOD projects or contracts 14:10:19
12	about two different types of buckets of extensions. 14:09:15	12	A. Yes. 14:10:23
13	One bucket was the extension to the MCOD. 14:09:17	13	Q that's what the force 14:10:24
14	A. Mm-hmm. 14:09:22	14	majeure 14:10:25
15	Q. So we already talked about that. 14:09:22	15	A. Yes. 14:10:26
16	And now I'd like to talk about force majeure. 14:09:25	16	Q. So it extends the the MCOD and 14:10:26
17	A. Yes, yes. 14:09:29	17	the supplier default date by however number of days 14:10:29
18	Q. Okay. So and, of course, the 14:09:30	18	or months or 14:10:33
19	FIT contract contains a force majeure provision, and 14:09:35	19	A. It extends it by the impact, 14:10:35
	as I understand it, what that does is it extends the 14:09:40	20	really related each force majeure is different. 14:10:37
20	as I dideistand it, what that does is it extends the 14.07.40	21	Q. Right. 14:10:39

2	A. Yes. 14:10:57	2	A. I'm trying to be helpful. 14:11:49
3	Q. How many projects have been 14:11:00	3	Q. And you are. That that is 14:11:51

5	delays? 14:11:04	5	What about what about non-wind? 14:11:53
6	A. Oh, I can't give you an answer 14:11:05	6	Solar? 14:11:56
7	specifically, but it's many. 14:11:07	7	A. There have been some, but not to 14:11:57
8	Q. Can you give us a a sense? A 14:11:09	8	the same extent. 14:11:59

11	restrict it to wind projects? 14:11:17	11	A. Water power is not subject to the 14:12:05
12	Q. Sure. 14:11:20	12	same permitting regime. And it was also, as you 14:12:10
13	A. Okay. If we're dealing with wind 14:11:20	13	mentioned before, a force majeure an extension 14:12:14
14	projects, because that's where most of it's 14:11:22	14	was granted, and and that was an extension that 14:12:17
15	occurring, I would say more than half, probably up 14:11:25	15	involved being an exchange of certain force majeure 14:12:23
16	to three-quarters. 14:11:28	16	rights. 14:12:26
17	Q. So three-quarters of all of the 14:11:29	17	Q. Okay. Has the OPA granted force 14:12:27
18	wind projects, or up to three-quarters, have 14:11:31	18	majeure in connection with projects who are 14:12:32
19	received force majeure for permitting delays? 14:11:34	19	undergoing litigation, court proceedings? 14:12:37
20	A. Yes. I would say between half and 14:11:37	20	A. I can't recall. I'm not aware 14:12:48
21	three-quarters. 14:11:42	21	that we had that many court proceedings. 14:12:51
22	Q. Between half 14:11:43	22	Q. Okay. 14:12:54
23	A. Again, I don't have the specific 14:11:43	23	A. So I'm I'm thinking about it, 14:12:54
24	data in front of me. 14:11:45	24	because I'm trying to figure out what court 14:12:56

There have been cases where at 14:13:25 least one case that I'm aware of where a court 14:13:28 proceeding led to a force majeure. 14:13:31 Q. Okay. How about other kinds of 14:13:34 delays in the projects? 14:13:39 A. Oh, there could be yes, we have 14:13:42 granted for other kinds of delays? 14:13:49 A. If wires, connection issues 14:13:53 could lead to force majeures. 14:13:56	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	lead to circumstances where certain municipalities 14:14:14 may not award certain permits in a timely manner, 14:14:17 and that has led to force majeure. 14:14:24 Q. How about construction delays? 14:14:25 A. I'm not aware of any for 14:14:34 generally, with regards to construction, unless 14:14:35 there is something beyond your control, we would not 14:14:38 grant delays unless it can be proven that it was 14:14:42 something truly beyond the supplier's control. 14:14:48 their own suppliers, third parties. 14:14:52 Q. So as I understand it and this 14:14:56 is probably true of force majeure generally 14:14:58 A. Yes. 14:15:02 Q if the event is within the 14:15:02 supplier's control, then then it wouldn't be 14:15:03 eligible for force majeure. But if the event is 14:15:06 outside their control, then then it may be? 14:15:08 A. It has to be outside their 14:15:11 control, unanticipated, and has to impact their 14:15:12 schedule. 14:15:16
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	that point. Q. Well, none my question wasn't 14:13:03 necessarily court proceedings involving the OPA. 14:13:06 But if the project is subject to a court proceeding 14:13:08 of some kind. For example 14:13:11 A. Okay, okay. 14:13:13 Q an appeal to the ERT, those are 14:13:14 covered by the standard force majeure extension. 14:13:17 How about appeals to the courts of Ontario? 14:13:20 A. Right. How about weather delays, 14:15:17

	Page 196		Page 197
1	have not generally the weather events in Ontario 14:15:27	1	Q. Sure. 14:16:18
2	are of it how should I say of a nature that 14:15:31	2	A. Generally, force majeures occur 14:16:19
3	they can be anticipated. I'll say winter arrives 14:15:34	3	with larger projects. They don't occur with the, 14:16:20
4	every year. 14:15:37	4	like, majority of our projects. 14:16:23
5	[Laughter.] 14:15:38	5	Q. Right. And just because you 14:16:25
6	BY MS. SEERS: 14:15:38	6	mentioned the the 3,000 projects, just put some 14:16:26
7	Q. So if there's a big snowstorm, 14:15:40	7	context on that. How many of those are over 50 14:16:30
8	that's an event of force majeure in Ontario? 14:15:42	8	megawatts, so larger projects, approximately? 14:16:33
9	A. Snowstorms can be anticipated in 14:15:44	9	A. There are 70 as I mentioned 14:16:38
10	Ontario. But, however, if there was an 14:15:46	10	before, there are 70 wind projects. It would only 14:16:39
11	extraordinary event 14:15:49	11	be in the wind projects that you would have them 14:16:43
12	Q. Right. 14:15:50	12	over 50 megawatts. And it would be a minority of 14:16:46
13	A like a tornado or something, we 14:15:50	13	those projects. So I really can't get more 14:16:50
14	could I could foresee granting force majeure in 14:15:52	14	specific. I haven't I didn't do the math, and I 14:16:53
15	those cases. 14:15:54	15	don't want to just guess. 14:16:55
16	Q. If you had to hazard a guess I 14:15:55	16	Q. What do you mean a minority of 14:16:57
17	appreciate you don't have the data how how 14:15:58	17	those? So 70 wind projects 14:16:58
18	many projects have received force majeure in in 14:15:59	18	A. The majority of our wind projects 14:17:00
19	some way or another as a percentage of total 14:16:02	19	would be in the 10- to 50-megawatt range. 14:17:02
20	projects? 14:16:05	20	Q. Right. 14:17:05
21	A. I gave you, I think, an estimate 14:16:07	21	A. There would be a certain number 14:17:06
22	for wind, and that's where I'm comfortable. There 14:16:08	22	and I will say a minority of those projects that 14:17:09
23	are so many FIT projects that trying to you know, 14:16:11	23	would be over 50 megawatts. 14:17:11
24	when you are dealing with 3,000 projects, it's kind 14:16:15	24	Q. Right. Okay. So there are 70 14:17:12
25	of hard to give an estimate. 14:16:17	25	wind projects over 50 megawatts? 14:17:15
	Page 198		Page 199
1	A. No. There are 70 wind projects 14:17:17	1	sense of how how many have received some sort of 14:18:02
2	over 500 kilowatts. 14:17:19	2	event of force majeure, as a percentage. 14:18:05
3	Q. Okay. I apologize. 14:17:21	3	A. Well, as I as I told you 14:18:09
4	A. We we think in terms I know 14:17:22	4	before, I would say at least over half, maybe up to 14:18:09
5	it might be we think in terms of CAE capacity 14:17:24	5	three-quarters. But, again, I haven't done the 14:18:14
6	Q. Right. 14:17:28	6	math, so I can't give you a specific answer. 14:18:16
7	A because of the wires test. 14:17:28	7	Q. I understand. So I had understood 14:18:19
8	Q. Okay. 14:17:30	8	you to give those figures in connection with 14:18:20
9	A. We think of projects under 500 14:17:30	9	permitting delays. Force majeure, where you are 14:18:23
10	kilowatts, over 500 kilowatts. 14:17:32	10	referring to just force majeure generally? 14:18:24
11	Q. Okay. 14:17:34	11	A. Yes, I understand. And and the 14:18:28
12	A. So we have 70 wind projects that 14:17:34	12	number would be very similar. 14:18:30
13	are over 500 kilowatts, and that and those are 14:17:36	13	Q. Similar? Okay. 14:18:32
14	the in the ballpark I'm talking about. 14:17:39	14	A. Okay. 14:18:33
15	Q. And do you know I think I may 14:17:41	15	Q. I take it that 14:18:33
16	have asked you this already, but do you know how 14:17:42	16	A. I mean, permitting delays is 14:18:34
17	many of them are over 50 megawatts? You don't know? 14:17:44	17	are, you know most of our force majeures, I would 14:18:38
18	A. I can't, off the top of my head, 14:17:47	18	say, are coming from permitting delays. 14:18:41
19	just give you that number. I said this before. 14:17:49	19	Q. Okay. That's that's why the 14:18:43
20	Q. Right. 14:17:51	20	numbers would be similar? 14:18:44
21	A. It is the minority of those 14:17:51	21	A. Yes. 14:18:45
22	projects are are over 50 megawatts. 14:17:53	22	Q. Okay. So I think that pretty much 14:18:46
23	Q. Certainly. Okay. 14:17:55	23	reaches the edge of of what I can ask you about 14:18:49
24	And of those projects, I appreciate 14:17:57	24	without more concrete information. So why don't we 14:18:51
25	you don't know how many there are, but do you have a 14:18:00	25	go back on the public feed for now? Open the doors. 14:18:55

But I'm I'm talking about now. 14:31:00 A. Now, no. The contract 14:31:02 Q. The contract is 14:31:03 A. The contract remains as it was 14:31:03 when it was signed. 14:31:05 Q. And it is not frozen? 14:31:07 Q. Okay. Now, you told Ms. Squires 14:31:09 the following I'm reading from the rough 14:31:12 transcript, so forgive me. I think it is accurate, 14:31:26

	Page 212		Page 213
1	release of rights under the 14:31:34	1	clarify. So the the offer that you're that 14:32:13
2	FIT contract, you would 14:31:35	2	you're making, sitting here today, I guess, is is 14:32:15
3	return that security" 14:31:37	3	that the OPA would return the completion and 14:32:19
4	I take it that's the \$6 million 14:31:38	4	performance security if the FIT contract were 14:32:23
5	completion and performance security? 14:31:40	5	terminated and there was a release of right. 14:32:26
6	A. Yes. 14:31:43	6	A. I wouldn't call it an offer. I 14:32:30
7	Q. (Reading): 14:31:43	7	would say that's our practice. And we and we 14:32:31
8	" prior to either of those 14:31:43	8	it's a standard offer program, and we treat all 14:32:34
9	timelines being met. So my 14:31:46	9	contracts the same way. And so we have that 14:32:38
10	question was: If Windstream 14:31:48	10	precedent in place. And so that that is what we 14:32:42
11	was to come forward today and 14:31:49	11	do. If somebody asks to terminate the contract, 14:32:46
12	ask you for a return of your 14:31:52	12	that's what we do. 14:32:48
13	security with release of 14:31:54	13	Q. So just to be completely clear 14:32:50
14	right from their FIT 14:31:55	14	A. Yes. 14:32:51
15	contract, would you return 14:31:56	15	Q Windstream would ask to 14:32:52
16	that security to them?" 14:31:57	16	terminate the contract? 14:32:54
17	And you answered: 14:31:58	17	A. Yes. 14:32:55
18	"If we had a mutual release, 14:32:00	18	Q. You would return the security, and 14:32:56
19	we would return their 14:32:02	19	there would be some sort of a release? 14:32:58
20	security to them." 14:32:03	20	A. Yes. 14:33:01
21	A. Yes. And I think in the context 14:32:03	21	Q. Okay. And you might not know, but 14:33:03
22	of that is the termination agreement, a mutual 14:32:05	22	I I'm just asking: Would would the release 14:33:16
23	termination agreement with full and final release. 14:32:07	23	contemplated have any implications for this 14:33:21
24	We would return the security. 14:32:10	24	particular NAFTA case? 14:33:24
25	Q. Right. So that's what I wanted to 14:32:11	25	MR. SPELLISCY: How would the witness 14:33:25

Q. And so -- and -- and if I didn't 14:37:33
say so, the date of this e-mail is January 20, 2011. 14:37:37
And so the OPA, Mr. Cecchini, was not involved at 14:37:42
this point in the decision about what to do with 14:37:45
Windstream. Is that correct? 14:37:48
A. No, it was not. 14:37:49

Q. And so you'll agree with me that 14:37:50 this reflects government-level consideration of 14:37:52 options about how to treat Windstream's project and 14:37:56 FTT contract? 14:37:58

14 A. I just -- it is what it is. I -- 14:38:01 15 I hadn't seen it. 14:38:04

> Q. It's not an OPA decision? 14:38:05 A. It's not an OPA decision. At this 14:38:07

point, we were not -- we were not aware of the decision. 14:38:08

Q. Right. Okay. We can resume the 14:38:11 feed.

title. I know he was in the Minister's office, and 14:38:45 he provided policy advice to the Minister. 14:38:48

A. That is my understanding too. 14:39:00 Q. And copied to some others. 14:39:02

1 14:41:15 2 Now, again, this reflects 14:41:16 3 government-level discussions, you would agree, about 14:41:23 how to treat Windstream's project and FIT contract? 14:41:27 5 A. It would reflect discussions at 14:41:31 6 least at the political level. 14:41:34 7 Q. Right. And - and the OPA was not 14:41:35 8 involved in those discussions? 14:41:39 9 A. By this time, I would say the OPA 14:41:41 10 was aware of the decision. This was the day before 14:41:42 11 the announcement. 14:41:45 12 O. Right. Was aware of the 14:41:46 13 moratorium decision? 14:41:46 14 A. Aware of the moratorium. And I 14:41:48 15 know I had had discussions prior to this date under 14:41:49 16 the understanding that the government wished that 14:41:54 17 the opportunity be preserved as to what we could do. 14:41:57 18 And I know that I had discussions with my superior, 14:42:02 19 JoAnne Butler, who is the -- who is our 14:42:06 20 vice-president and --14:42:07 21 Q. There's no one, though, from the 14:42:09 22 OPA copied on this e-mail chain. 14:42:10 23 A. Not copied on the e-mail. I'm 14:42:13 24 just letting you know that we had discussions by 14:42:14 25 this time as to what we thought, in the contract, we 14:42:17

Page 223 could do to preserve the opportunity, and we had a 14:42:19 view by this time. I don't know if that had been 14:42:22 communicated. 14:42:26 O. You don't know if it had been 14:42:28 communicated to the Ministry? 14:42:29 A. Communicated, no. 14:42:31 Q. And so now I draw your attention 14:42:31 to Mr. Mitchell. He says: 14:42:34 14:43:01 Q. You state in your witness 14:43:04 statement, Mr. Cecchini, that: 14:43:05 "The OPA's own intention was 14:43:07 to explore ways to 14:43:10 effectively freeze the 14:43:12

project within the parameters 14:43:13

	Page 224		Page 225
1	of the FIT contract until the 14:43:15	1	has a FIT contract, and so to 14:44:20
2	deferral was lifted." 14:43:16	2	that end, Perry is here." 14:44:22
3	Is that correct? 14:43:17	3	So you are here. 14:44:23
4	A. We understood the government 14:43:18	4	A. Hmm-hmm. 14:44:25
5	wished that their opportunity be preserved. And so 14:43:20	5	Q. (Reading): 14:44:26
6	we had a discussion before the February 11 meeting 14:43:23	6	"But we've asked that the OPA 14:44:26
7	as to what we thought would be appropriate. 14:43:26	7	sit down with you to 14:44:27
8	Q. So if I could take you to Tab 17, 14:43:29	8	negotiate a number of pieces, 14:44:28
9	which is a transcription of a telephone call, and I 14:43:33	9	including the force majeure 14:44:30
10	apologize; for the record it's C-0484. 14:43:37	10	provisions, the two-year 14:44:31
11	A. Yes. 14:43:41	11	force majeure termination 14:44:31
12	Q. It's a transcription of a 14:43:41	12	clause, and associated with 14:44:33
13	telephone call on February 10 11, 2011, between 14:43:43	13	those provisions" 14:44:34
14	Windstream and and several government 14:43:48	14	Pardon me. 14:44:35
15	representatives. And I understand you were also on 14:43:52	15	" the two-year force 14:44:36
16	that call. 14:43:53	16	majeure termination clause 14:44:37
17	A. I was on that call. 14:43:53	17	associated with those 14:44:39
18	Q. Okay. Now, if you flip to page 2, 14:43:55	18	provisions, and the security 14:44:39
19	see at the bottom of the page, there's a statement 14:44:08	19	deposits. So you know and 14:44:41
20	from Mr. Mitchell again? 14:44:10	20	we realize that there is a 14:44:43
21	A. Mm-hmm. 14:44:12	21	uniqueness to your position, 14:44:45
22	Q. To about five lines from the 14:44:12	22	given that you have a FIT 14:44:46
23	bottom, he says: 14:44:16	23 24	contract, and we're going to 14:44:47
24	"We acknowledge that your 14:44:17	25	attempt to create a solution 14:44:48
25	project is unique and that it 14:44:19	25	that will be acceptable to 14:44:50
	Page 226		Page 227
1	you. So that is Energy's 14:44:51	1	that we could do to be helpful. 14:46:07
2	position. I'm going to pass 14:44:53	2	Q. Okay. So I understand that. And 14:46:09
3	it along to MOE next, and 14:44:55	3	just just to clarify, you said this was Mr. 14:46:11
4	then MNR finally." 14:44:57	4	Baines' transcript, but this is actually an audio 14:46:13
5	So I take it, from this, that the 14:44:58	5	recording of the a transcript of an audio 14:46:16
6	Ministry of Energy had asked you to negotiate a 14:45:05	6	recording 14:46:19
7	number of contractual terms with Windstream? 14:45:08	7	A. I understand that. What I'm just 14:46:20
8	A. My before this before this 14:45:10	8	saying is, while the capture is their side, we came 14:46:21
9	transcript, which you have the transcript from, I 14:45:16	9	in, in the middle of that transcript. There was a 14:46:24
10	think, Mr. Baines and so it's his call. 14:45:19	10	discussion that occurred before this transcript. 14:46:26
11	So there was a discussion before we went on the 14:45:22	11	Q. Amongst you and the Ministry? 14:46:30
12	call. And at that discussion, I talked to Mr. 14:45:27	12	A. Amongst us and the people on the 14:46:31
13	Mitchell about what our from the OPA side, what 14:45:32	13	because we were all in one room. 14:46:33
14	we thought would be what we could do. And so 14:45:37	14	Q. Right. 14:46:34
15	those three things were things that I had raised 14:45:41	15	A. So everybody who was there from 14:46:35
16	with him prior to the call. 14:45:45	16	the Crown was in one boardroom, and there was a 14:46:37
17	Q. Okay. 14:45:48	17	brief discussion before the call. 14:46:39
18	A. So I don't so I while I 14:45:49	18	Q. Okay. 14:46:42
19	realize you have that other information, I can't say 14:45:51	19	A. And at that discussion, I raised 14:46:43
20	whether he was repeating what I said to him or 14:45:53	20	those three items from the OPA perspective. 14:46:45
21	things he could have said independently. 14:45:55	21	Q. So you raise items from the OPA 14:46:48
22	I do know those three things were the 14:45:57	22	perspective with the Ministry officials, but the 14:46:50
23	three things I had discussed with my vice-president 14:45:59	23	Ministry official, Mr. Mitchell, tells Windstream 14:46:53
24	and my director, prior to the meeting, and those 14:46:00	24	that he has asked - 14:46:55
25	were the three items that I was authorized to say 14:46:04	25	A. Yes. 14:46:56
	and the second and a second to say 11.70.04	1	11.10.00

	Page 228		Page 229
1	Q you 14:46:56	1	A. Those were the areas that we 14:47:57
2	A. Yes. 14:46:57	2	thought we could give something. 14:47:59
3	Q to sit down and negotiate with 14:46:57	3	Q. I understand what you are saying 14:48:00
4	them; correct? 14:46:58	4	about what the OPA thought it could do. But I'm 14:48:02
5	A. Yes. I realize he said that, but 14:46:59	5	asking you about what Mr. Mitchell told Windstream 14:48:04
6	I'm just saying those three items, I had suggested 14:47:01	6	the Ministry would do. And what Mr. Mitchell said 14:48:07
7	to Mr. Mitchell, were areas that we thought we could 14:47:05	7	is that he had asked you here: 14:48:10
8	do something. 14:47:07	8	"We, the Ministry, asked the 14:48:12
9	Q. Okay. And Mr. Mitchell also said 14:47:08	9	OPA to sit down with 14:48:15
10	that the negotiating the negotiation would 14:47:12	10	Windstream and negotiate a 14:48:16
11	include a number of pieces, include a number of 14:47:15	11	number of pieces, including 14:48:17
12	pieces, and he lists those three things. 14:47:22	12	the force majeure provisions, 14:48:20
13	A. Yep. 14:47:24	13	the two-year force majeure 14:48:21
14	Q. But you'll agree with me, based on 14:47:24	14	termination clause, and the 14:48:23
15	what Mr. Mitchell is saying, the negotiations 14:47:26	15	security deposits." 14:48:24
16	weren't necessarily going to be limited to those 14:47:28	16	A. Yes. 14:48:25
17	three things, based on what Mr. Mitchell is 14:47:30	17	Q. So 14:48:29
18	communicating on this call. 14:47:34	18	A. I never 14:48:31
19	A. I'm not so sure I agree with that 14:47:39	19	Q. According to Mr. Mitchell, the 14:48:32
20	statement. Three is a number. I think we 14:47:41	20	negotiations weren't necessarily limited to those 14:48:34
21	eventually, in our subsequent discussions, we agreed 14:47:44	21	three things; correct? 14:48:36
22	to there was one other item that was raised that 14:47:47	22	A. Well, not maybe not 14:48:37
23	we agreed to and maybe another. So those were, I 14:47:50	23	necessarily. I've never received any sense that we 14:48:38
24	think I can only speak for the OPA. 14:47:53	24	needed to go beyond that. But anyway 14:48:42
25	Q. Right. 14:47:56	25	Q. Okay. Why don't we move on to 14:48:45
1	Page 230 page 7, then. So in the middle of the page, you see 14:48:46	1	Page 231 point, I'm going to use the 14:49:33
2	a paragraph with Mr. Chris Benedetti, and and you 14:48:53	2	word, deferred or frozen, 14:49:34
3	understand Mr. Benedetti is a government relations 14:48:57	3	whereas all other projects 14:49:37
4	representative for Windstream; right? 14:49:01	4	are essentially quashed or 14:49:38
5	A. Yes, I'm aware of who 14:49:03	5	cancelled or however you want 14:49:40
6	Mr. Benedetti is. 14:49:04	6	to put it and that the 14:49:41
7	Q. So Mr. Benedetti says: 14:49:05	7	discussion with the OPA would 14:49:42
8	"So, Craig, this is Chris. 14:49:06	8	be to ensure that the 14:49:43
9	Maybe if I can paraphrase 14:49:08	9	requirements embedded in the 14:49:44
10	where things stand. So, in 14:49:10	10	FIT contract reflect this 14:49:46
	essence, what has happened, 14:49:12	11	
11	• • • • • • • • • • • • • • • • • • • •		situation and that there is 14:49:47
12	well, I guess as it pertains 14:49:13	12	no penalties or anything that 14:49:48
12 13	well, I guess as it pertains 14:49:13 in layman's speak to the 14:49:15	12 13	no penalties or anything that 14:49:48 would be incurred by 14:49:50
12 13 14	well, I guess as it pertains 14:49:13 in layman's speak to the 14:49:15 Windstream project, things 14:49:16	12 13 14	no penalties or anything that 14:49:48 would be incurred by 14:49:50 Windstream." 14:49:52
12 13 14 15	well, I guess as it pertains 14:49:13 in layman's speak to the 14:49:15 Windstream project, things 14:49:16 are essentially on hold until 14:49:17	12 13 14 15	no penalties or anything that 14:49:48 would be incurred by 14:49:50 Windstream." 14:49:52 And then Mr. MacLennan, who is the 14:49:52
12 13 14 15	well, I guess as it pertains 14:49:13 in layman's speak to the 14:49:15 Windstream project, things 14:49:16 are essentially on hold until 14:49:17 such time as the province can 14:49:19	12 13 14 15 16	no penalties or anything that 14:49:48 would be incurred by 14:49:50 Windstream." 14:49:52 And then Mr. MacLennan, who is the 14:49:52 Chief of Staff to the Ministry of Energy, says, 14:49:54
12 13 14 15 16 17	well, I guess as it pertains 14:49:13 in layman's speak to the 14:49:15 Windstream project, things 14:49:16 are essentially on hold until 14:49:17 such time as the province can 14:49:19 establish a regulation under 14:49:20	12 13 14 15 16 17	no penalties or anything that 14:49:48 would be incurred by 14:49:50 Windstream." 14:49:52 And then Mr. MacLennan, who is the 14:49:52 Chief of Staff to the Ministry of Energy, says, 14:49:54 "Yes." You see that? 14:49:59
12 13 14 15 16 17	well, I guess as it pertains 14:49:13 in layman's speak to the 14:49:15 Windstream project, things 14:49:16 are essentially on hold until 14:49:17 such time as the province can 14:49:19 establish a regulation under 14:49:20 the Ministry of Environment, 14:49:22	12 13 14 15 16 17 18	no penalties or anything that 14:49:48 would be incurred by 14:49:50 Windstream." 14:49:52 And then Mr. MacLennan, who is the 14:49:52 Chief of Staff to the Ministry of Energy, says, 14:49:54 "Yes." You see that? 14:49:59 A. Yes, I do. 14:50:01
12 13 14 15 16 17 18	well, I guess as it pertains 14:49:13 in layman's speak to the 14:49:15 Windstream project, things 14:49:16 are essentially on hold until 14:49:17 such time as the province can 14:49:19 establish a regulation under 14:49:20 the Ministry of Environment, 14:49:22 under REA, pertaining to 14:49:22	12 13 14 15 16 17 18 19	no penalties or anything that 14:49:48 would be incurred by 14:49:50 Windstream." 14:49:52 And then Mr. MacLennan, who is the 14:49:52 Chief of Staff to the Ministry of Energy, says, 14:49:54 "Yes." You see that? 14:49:59 A. Yes, I do. 14:50:01 Q. Okay. So Mr. MacLennan is 14:50:01
12 13 14 15 16 17 18 19	well, I guess as it pertains 14:49:13 in layman's speak to the 14:49:15 Windstream project, things 14:49:16 are essentially on hold until 14:49:17 such time as the province can 14:49:19 establish a regulation under 14:49:20 the Ministry of Environment, 14:49:22 under REA, pertaining to 14:49:22 offshore wind. There will be 14:49:25	12 13 14 15 16 17 18 19 20	no penalties or anything that 14:49:48 would be incurred by 14:49:50 Windstream." 14:49:52 And then Mr. MacLennan, who is the 14:49:52 Chief of Staff to the Ministry of Energy, says, 14:49:54 "Yes." You see that? 14:49:59 A. Yes, I do. 14:50:01 Q. Okay. So Mr. MacLennan is 14:50:01 speaking for the government. You would agree? 14:50:05
12 13 14 15 16 17 18 19 20 21	well, I guess as it pertains 14:49:13 in layman's speak to the 14:49:15 Windstream project, things 14:49:16 are essentially on hold until 14:49:17 such time as the province can 14:49:19 establish a regulation under 14:49:20 the Ministry of Environment, 14:49:22 under REA, pertaining to 14:49:22 offshore wind. There will be 14:49:25 no further movement on 14:49:27	12 13 14 15 16 17 18 19 20 21	no penalties or anything that 14:49:48 would be incurred by 14:49:50 Windstream." 14:49:52 And then Mr. MacLennan, who is the 14:49:52 Chief of Staff to the Ministry of Energy, says, 14:49:54 "Yes." You see that? 14:49:59 A. Yes, I do. 14:50:01 Q. Okay. So Mr. MacLennan is 14:50:01 speaking for the government. You would agree? 14:50:05 A. I would think he's speaking for 14:50:09
12 13 14 15 16 17 18 19 20 21	well, I guess as it pertains 14:49:13 in layman's speak to the 14:49:15 Windstream project, things 14:49:16 are essentially on hold until 14:49:17 such time as the province can 14:49:19 establish a regulation under 14:49:20 the Ministry of Environment, 14:49:22 under REA, pertaining to 14:49:22 offshore wind. There will be 14:49:25 no further movement on 14:49:27 offshore wind development for 14:49:28	12 13 14 15 16 17 18 19 20 21 22	no penalties or anything that 14:49:48 would be incurred by 14:49:50 Windstream." 14:49:52 And then Mr. MacLennan, who is the 14:49:52 Chief of Staff to the Ministry of Energy, says, 14:49:54 "Yes." You see that? 14:49:59 A. Yes, I do. 14:50:01 Q. Okay. So Mr. MacLennan is 14:50:01 speaking for the government. You would agree? 14:50:05 A. I would think he's speaking for 14:50:09 the Ministry. 14:50:10
12 13 14 15 16 17 18 19 20 21 22 23	well, I guess as it pertains 14:49:13 in layman's speak to the 14:49:15 Windstream project, things 14:49:16 are essentially on hold until 14:49:17 such time as the province can 14:49:19 establish a regulation under 14:49:20 the Ministry of Environment, 14:49:22 under REA, pertaining to 14:49:22 offshore wind. There will be 14:49:25 no further movement on 14:49:27 offshore wind development for 14:49:28 anybody. But, essentially, 14:49:29	12 13 14 15 16 17 18 19 20 21 22 23	no penalties or anything that 14:49:48 would be incurred by 14:49:50 Windstream." 14:49:52 And then Mr. MacLennan, who is the 14:49:52 Chief of Staff to the Ministry of Energy, says, 14:49:54 "Yes." You see that? 14:49:59 A. Yes, I do. 14:50:01 Q. Okay. So Mr. MacLennan is 14:50:01 speaking for the government. You would agree? 14:50:05 A. I would think he's speaking for 14:50:09 the Ministry. 14:50:10 Q. For the Ministry of Energy? 14:50:12
12 13 14 15 16 17 18 19 20 21	well, I guess as it pertains 14:49:13 in layman's speak to the 14:49:15 Windstream project, things 14:49:16 are essentially on hold until 14:49:17 such time as the province can 14:49:19 establish a regulation under 14:49:20 the Ministry of Environment, 14:49:22 under REA, pertaining to 14:49:22 offshore wind. There will be 14:49:25 no further movement on 14:49:27 offshore wind development for 14:49:28	12 13 14 15 16 17 18 19 20 21 22	no penalties or anything that 14:49:48 would be incurred by 14:49:50 Windstream." 14:49:52 And then Mr. MacLennan, who is the 14:49:52 Chief of Staff to the Ministry of Energy, says, 14:49:54 "Yes." You see that? 14:49:59 A. Yes, I do. 14:50:01 Q. Okay. So Mr. MacLennan is 14:50:01 speaking for the government. You would agree? 14:50:05 A. I would think he's speaking for 14:50:09 the Ministry. 14:50:10

1	Energy, he is agreeing that the project will be 14:50:17	1	Lucas from the Ministry of the Environment. In the 14:51:17
2	deferred or frozen. Do you agree with that? 14:50:19	2	middle, Mr. Mars, from Windstream, asks: 14:51:25
3	A. That I would agree with that. 14:50:22	3	"Is it possible to provide an 14:51:27
4	Q. And that the OPA would amend the 14:50:29	4	order of magnitude in regards 14:51:30
5	FIT contract to reflect the moratorium situation so 14:50:31	5	to maybe you can't, but 14:51:31
6	that there would be no penalties or anything that 14:50:34	6	just an order of magnitude in 14:51:34
7	would be incurred by Windstream. That's what he 14:50:37	7	regards to how long you 14:51:36
8	says, or he agrees to anyway? 14:50:39	8	anticipate studying? I know 14:51:37
9	A. That's what he says. 14:50:41	9	Ian" 14:51:38
10	Q. Okay. And the project would be 14:50:42	10	That's Ian Baines. 14:51:38
11	deferred until the REA regulation was amended 14:50:44	11	" is asking for very 14:51:40
12	regarding offshore wind. 14:50:46	12	specific what it is you are 14:51:41
13	A. Let me 14:50:51	13	going to study. But, I 14:51:42
14	Q. He says: 14:50:53	14	guess, just in general, do 14:51:43
15	"Things are essentially on 14:50:53	15	you have a sort of order of 14:51:45
16	hold until such time as the 14:50:56	16	magnitude? A week? A month? 14:51:46
17	province can establish a 14:50:57	17	Years?" 14:51:48
18	regulation under the Ministry 14:50:58	18	And then Ms. Lucas, for the Ministry 14:51:48
19	of the Environment, under 14:50:59	19	of the Environment, says: 14:51:52
20	REA, pertaining to offshore 14:51:01	20	"I can't. We don't know 14:51:53
21	wind." 14:51:03	21 22	really, but it will be 14:51:55
22	A. Yes. 14:51:03	23	more it'll be more than 14:51:56
23 24	Q. Right? 14:51:07	23	months for sure. Probably 14:51:58
25	A. Yes. 14:51:07	25	more like years." 14:52:00 Right? 14:52:00
23	Q. And at page 8, you have Brenda 14:51:08	23	Right? 14:52:00
	Page 234		Page 235
1	A. Yes, that's what it says. 14:52:03	1	Q. The the OPA provided those 14:52:59
2	Q. And so she could not specify an 14:52:04	2	letters to Canada to be filed in support of their 14:53:05
3	end date to the moratorium? 14:52:07	3	defence in this case even though they were expressly 14:53:06
4	A. She did not specify an end date. 14:52:09	4	exchanged on a without prejudice basis; right? 14:53:10
5	Q. And so you agree, then, that the 14:52:11	5	A. We shared with Canada our 14:53:12
6	promise to freeze the FIT contract that Mr. 14:52:13	6	discussions. 14:53:13
7	MacLennan made, on behalf of the Minister of Energy, 14:52:15	7	Q. You shared with Canada the without 14:53:14
8	Ministry of Energy, should be effective for the 14:52:19	8	prejudice letters? 14:53:16
9	duration of the moratorium, whatever its length; 14:52:23	9	A. Yes. 14:53:17
10	right? 14:52:25	10	Q. And they filed them in this case? 14:53:17
11	A. Obviously the OPA had a different 14:52:27	11	A. Yes. 14:53:19
12	view. 14:52:32	12	Q. Okay. Now, in your witness 14:53:19
13	Q. Right. But I'm not asking you 14:52:32	13	statement, you focus entirely on the early 14:53:21
14	about the OPA's view. I'm asking you what the 14:52:33	14	negotiations, but today I would like to focus your 14:53:24
15	Ministry 14:52:36	15	attention on the final offers that were on the 14:53:28
16	A. I think you have to talk to 14:52:36	16	table. Okay? 14:53:30
17	somebody from the Ministry about what their view is. 14:52:37	17	
18	Q. Okay. We will. Is that what you 14:52:40		
19	understand the government or the Ministry of Energy 14:52:42		
20	was telling Windstream? 14:52:44		
21	A. I with the words on the page. 14:52:47		
22	Q. Right. Okay. Now I want to take 14:52:51		
23	you to the without prejudice letters between the OPA 14:52:51		
24	and Windstream. 14:52:56 A. Yes, sure. 14:52:58		14:53:45

Q. If you could turn to Tab 22 of 14:58:35 your binder, which is Exhibit R-0264, this is -- so 14:58:42 the Windstream letter was July 5, 2011, and this is 14:58:50 the response from the OPA's lawyers on October 12, 14:58:53 2011. And it says the following: 14:58:58 "I acknowledge receipt of 14:59:00 your without prejudice letter 14:59:02 of July 5, 2011, sent in your 14:59:03 role as counsel to the 14:59:06 supplier to us, as counsel to 14:59:07 the OPA, et cetera. The OPA 14:59:08 has reviewed the content of 14:59:11 the July 5 letter and has 14:59:12 instructed me to communicate 14:59:14 to you that the views of the 14:59:15 OPA, as set out in its letter 14:59:16 of March 18 and June 24. 14:59:17 remain unchanged." 14:59:20 14:59:29 14:59:32 Q. Okay. Now, just quickly, if you 14:59:32 could turn up Tab 23. This is Exhibit -- pardon 14:59:39

me -- Exhibit C-1025. You will see at the bottom. 14:59:56

1 it's an e-mail from a legal assistant at BLG, which 15:00:02 2 is a law firm, to the OPA's lawyer, Mr. Clark, July 15:00:07 3 5, 2011. So this is attaching the Windstream final 15:00:12 4 offer. Is that -15:00:17 5 A. Mm-hmm. 15:00:17 6 Q. - is that correct? As far as you 15:00:20 7 know? And it's copied to --15:00:22 8 A. Well, I have never seen it before 15:00:22 9 15:00:25 today. 10 15:00:26 Q. You've never seen it before? 11 Okay. 15:00:27 12 A. Okay. 15:00:27 13 Q. It's copied to -- it's sent to the 15:00:27 14 OPA's lawyers, but it's copied to Lana Deluca at the 15:00:31 15 Ministry of Energy; Andrew Mitchell, at the Ministry 15:00:35 16 of Energy; Sabrina Grando, at the Ministry of 15:00:37 17 Consumer Services. Who is Ms. Grando? Do you know? 15:00:39 18 A. I have no idea. 15:00:42 19 Q. Okay. And others. And then Ms. 15:00:43 20 Grando sends it to Craig MacLennan at the Ministry 15:00:45 21 of Energy and Sean Mullin at the Premier's Office. 15:00:49 22 Do you see that? 15:00:54 23 A. I – I see it. 15:00:56 24 Q. And then Ms. Grando sends it to - 15:00:57 25 again to Craig MacLennan and Andrew Mitchell at the 15:01:01

Ministry of Energy. 15:01:05 15:01:18 15:01:22 A. I'm not aware of that, but I should let you know that I was out of the country 15:01:24 for most of the month of July that year. Q. Okay. So but you're not aware of 15:01:28 anyone? 15:01:30 A. I'm not aware of that. 15:01:31 Q. And -- and you're not ware of 15:01:32 anyone else in the government other than those 15:01:33 people making such a request? 15:01:34 A. No. But I was aware that 15:01:36 Windstream lobbied actively and everywhere. 15:01:38 O. Right. 15:01:43 A. So I'm not surprised that 15:01:43 documents were circulated. 15:01:47 Q. Okay. 15:01:49 MS. SEERS: If I could perhaps have a 15:01:49 one moment to confer with my colleagues, Mr. 15:01:54 President. 15:01:54 --- [Counsel confer.] BY MS. SEERS: 15:02:15

1	Q. Briefly, now, Mr. Cecchini, I'm 15:02:44	1	TransCanada and the Municipality of Oakville. Is 15:03:42
2	going to take you to the cancellation of 15:02:45	2	that right? You don't know? 15:03:45
3	TransCanada's proposed gas-fired power plant that 15:02:51	3	A. I can't confirm. I don't know the 15:03:45
4	was to be located in Oakville, Ontario. 15:02:55	4	specifics. I'm sorry. 15:03:47
5	I understand that TransCanada had a 15:02:59	5	Q. And certainly TransCanada had not 15:03:50
6	clean energy supply agreement with the OPA for the 15:03:00	6	commenced construction on its facility? 15:03:54
7	Oakville plant. Is that right? 15:03:03	7	A. It is my understanding, no, they 15:03:57
8	A. I understand there was a contract 15:03:05	8	hadn't commenced construction. 15:03:59
9	in place for a gas power plant. 15:03:06	9	Q. It was under force majeure. Its 15:04:01
10	Q. And TransCanada had not obtained 15:03:09	10	contract was under force majeure? 15:04:03
11	the required permits for that facility or all of 15:03:11	11	A. I can't say. I don't know that. 15:04:05
12	them? It hadn't obtained all of them? 15:03:15	12	Q. You don't know? 15:04:06
13	A. I'm dealing from hearsay. I was 15:03:17	13	A. Specifically, no. 15:04:06
14	not involved in this file whatsoever. 15:03:18	14	Q. I understand that the contract had 15:04:11
15	Q. Okay. You're the OPA witness 15:03:20	15	a two-year force majeure termination, right, just 15:04:13
16	that's been put forward. 15:03:25	16	like the FIT contract with Windstream? Are you 15:04:15
17	A. Okay. 15:03:26	17	aware of that? 15:04:17
18	Q. So I will put the questions to 15:03:26	18	A. I'm not aware of that. 15:04:18
19	you. 15:03:27	19	Q. Not aware? Are you aware that, as 15:04:19
20	A. Okay. 15:03:28	20	an election promise during the 2011 pardon me 15:04:22
21	Q. If you don't know the answer, 15:03:28	21	the 2010 election, Premier McGuinty promised to 15:04:24
22	please just say so. 15:03:30	22	cancel the Oakville plant? 15:04:27
23	A. Yes, okay. 15:03:31	23	A. You know, it's hard for me because 15:04:35
24	Q. There was litigation, I understand 15:03:35	24	I think I may recall that, but I'm not I can't 15:04:36
25	it, regarding permitting and bylaws between 15:03:37	25	speak to that specifically. I know promises were 15:04:40

1 .	will go to page JP87. 15:06:12	1	he changes the the paragraph. He says: 15:07:19
2	A. Mm-hmm. 15:06:15	2	"Were you in frequent 15:07:20
3	Q. This is a transcript of testimony 15:06:21	3	communication with the Premier's 15:07:22
	that Ms. JoAnne Butler of the OPA gave before that 15:06:24	4	Office, or can you tell us a 15:07:23
	committee. I think you said Ms. Butler is the 15:06:26	5	little bit about this particular 15:07:25
6	vice-president at the OPA? 15:06:30	6	call from back in 2011? 15:07:26
7	A. I report through Michael Killeavy 15:06:32	7	Ms. Butler says: 15:07:27
8 1	to Ms. Butler. 15:06:33	8	"The only person I remember 15:07:29
9	Q. You report to Mr. Killeavy who 15:06:35	9	dealing with from the 15:07:31
10 1	reports to Ms. Butler? 15:06:37	10	Premier's Office was Sean 15:07:31
11	A. Yes, I do. 15:06:38	11	Mullin, so Sean must have 15:07:32
12	Q. Okay. And I'm just going to read 15:06:39	12	been on that call." 15:07:35
	from this transcript. You don't need to answer any 15:06:41	13	Then a little bit later she says: 15:07:35

15	any potential objections. 15:06:45	15	Sean Mullin. 15:07:39
16	A. Okay. 15:06:47	16	" he was in the Premier 15:07:39
17	Q. At page 87, if you go pardon 15:06:48	17	office, I believe, on the 15:07:42
	me. There is a question from Mr. Victor Fedeli on 15:06:57	18	energy file." 15:07:43
19 1	the on the left-hand side, about the middle of 15:07:06	19	Mr. Fedeli asks: 15:07:44
20 1	the page. Do you see that? 15:07:08	20	"So the Premier's Office was 15:07:46
21	A. There is many questions, but - 15:07:12	21	interested in these files 15:07:48
22	Q. So Victor Fedeli. So on page 8, 15:07:14	22	back in 2011. Can you tell 15:07:49
23 1	there's an e-mail here that says 15:07:16	23	us anything, any details 15:07:51
24	A. I got it. 15:07:17	24	about your instructions from 15:07:52
25	Q JoAnne Butler, et cetera. Then 15:07:17	25	the Premier's Office?" 15:07:53
	Page 250		Page 251
1	And Ms. Butler says: 15:07:54	1	events. 15:08:53
2	"The instructions basically 15:07:56	2	Q. You don't? 15:08:53
3	were the commitments that the 15:07:57	3	A. No. 15:08:54
4	government had made with 15:07:59	4	Q. So you weren't involved in that 15:08:55
5	TransCanada prior to letting 15:08:01	5	matter? 15:08:56
6	the OPA know were basically 15:08:02	6	A. I was not involved in the gas 15:08:56
7	outlined in a letter that the 15:08:04	7	plants whatsoever. 15:08:58
8	OPA wrote to TransCanada, 15:08:05	8	Q. Okay. Those are my questions. 15:08:59
9	because we held the contract, 15:08:06	9	Thank you, Mr. Cecchini. 15:09:04
10	which basically said, 'We're 15:08:08	10	PRESIDENT: Thank you, Ms. Seers. 15:09:07
11	going to work together to 15:08:09	11	Any questions on redirect? You need to confer? 15:09:10
12	come up with a new proposal 15:08:11	12	MR. SPELLISCY: One minute. Yes. 15:09:17
13	and that you would get the 15:08:12	13	[Counsel confer.] 15:09:19
14	financial value of your 15:08:14	14	RE-EXAMINATION BY MS. SQUIRES: 15:09:39
15	contract." 15:08:15	15	Q. Just a couple of short questions 15:09:39
16	Do you see that? 15:08:15	16	for you, Mr. Cecchini. 15:10:24
17	A. Mm-hmm. 15:08:16	17	A. Okay. 15:10:25
18	Q. And so my my question is simply 15:08:25	18	Q. If the OPA were to terminate 15:10:27
	this: Do you have any understanding of these events 15:08:27	19	Windstream's contracts under section 10.1(g) - 15:10:30
•	in terms of the Premier's Office direction to the 15:08:36	20	A. Yes. 15:10:32
	OPA in connection with that matter? And if you do, 15:08:40	21	Q on May 4, 2017 15:10:33
	is it different from Ms. Butler's? Please don't 15:08:44	22	A. Mm-hmm. 15:10:35
	answer the question. I'll let my friends, if they 15:08:46	23	Q what would happen to the letter 15:10:35
	have an objection, raise it. 15:08:49	24	of credit? 15:10:36
	A. I have no understanding of the 15:08:50	25	A. It would be returned. 15:10:38
25	A I have no inderstanding of the 12.08.20		

	Page 252		Page 253
1	Q. And if Windstream were to wait 15:10:39	1	still needed and that with regards to the 15:11:44
2	until May 4, 2017 to terminate its contract, what 15:10:41	2	supplier. We don't want to leave that transmission 15:11:47
3	would happen to the letter of credit? 15:10:44	3	space kind of allocated to somebody forever without 15:11:50
4	A. It would be returned. 15:10:46	4	any investment. 15:11:55
5	Q. And when Windstream wrote in 2014 15:10:48	5	Q. Okay. Those are all of my 15:11:58
6	asking for 15:10:51	6	questions. 15:11:59
7	A. Sorry, can I say, it would be I 15:10:52	7	A. Okay. Thank you. 15:11:59
8	shouldn't say returned. It would be cancelled 15:10:53	8	PRESIDENT: Thank you, Ms. Squires. 15:12:05
9	because the letter of credit's in our name. So we 15:10:55	9	QUESTIONS FROM THE TRIBUNAL: 15:12:06
10	would write a letter to the bank cancelling the 15:10:58	10	MR. BISHOP: I have a few questions 15:12:08
11	letter of credit. 15:11:00	11	for you. 15:12:10
12	Q. Okay. And when Windstream wrote 15:11:00	12	THE WITNESS: Sure. 15:12:11
13	to the OPA in 2014 asking for its letter of credit 15:11:03	13	MR. BISHOP: And I'll try to try 15:12:12
14	back, can you explain specifically why the OPA 15:11:06	14	to put this in, in some sort of order. 15:12:16
15	refused that? 15:11:09	15	THE WITNESS: Okay. 15:12:21
16	A. Well, we didn't have an agreement 15:11:11	16	MR. BISHOP: I realize you're on the 15:12:22
17	with Windstream. So our offer was in the context of 15:11:13	17	contract management side 15:12:23
18	coming up with a larger agreement. 15:11:18	18	THE WITNESS: Yes, I am. 15:12:25
19	The other reason is that is when 15:11:20	19	MR. BISHOP: not the offer side, 15:12:26
20	you get a FIT contract, you're holding grid space. 15:11:24	20	as I understand it. 15:12:28
21	That grid space is very valuable. And so one of the 15:11:27	21	THE WITNESS: Right. 15:12:29
22	reasons we insist on having that letter of credit 15:11:31	22	MR. BISHOP: But let me ask you 15:12:30
23	for people who are in development is we need to 15:11:33	23	about to see if you can answer. 15:12:32
24	maintain there has to be some kind of investment 15:11:37	24	THE WITNESS: Okay. 15:12:35
25	in order to ensure that the transmission space is 15:11:40	25	MR. BISHOP: When the OPA offers 15:12:36
	Page 254		Page 255

How does it manage those? 15:14:16 And in that regard, does OPA put out 15:14:19 an annual report or a regular report that talks 15:14:23 about the power capacity in the future and how it's 15:14:27
2 3 4 5 6 7 8	contracts, is it doing so with the idea that it 15:12:39 needs that power, the power that's being offered by 15:12:43 the proponent? 15:12:49 THE WITNESS: With regards to the FIT 15:12:51 contract, it is complicated because the FIT contract 15:12:53 had multiple FIT program had multiple objectives. 15:13:00 It was on one hand, it was a 15:13:04 purchasing power. On the other hand like, I 15:13:06	2 3 4 5 6 7 8	power that it's purchasing, that is, the capacity, 15:14:05 so that it doesn't either underpurchase or 15:14:08 overpurchase when you have projects like this that 15:14:13 are in development? How does it manage those? 15:14:16 And in that regard, does OPA put out 15:14:19 an annual report or a regular report that talks 15:14:23 about the power capacity in the future and how it's 15:14:27 managing this? 15:14:35
2 3 4 5 6 7 8	contracts, is it doing so with the idea that it 15:12:39 needs that power, the power that's being offered by 15:12:43 the proponent? 15:12:49 THE WITNESS: With regards to the FIT 15:12:51 contract, it is complicated because the FIT contract 15:12:53 had multiple FIT program had multiple objectives. 15:13:00 It was on one hand, it was a 15:13:04 purchasing power. On the other hand like, I 15:13:06 would go through three objectives. On one 15:13:09	2 3 4 5 6 7 8	power that it's purchasing, that is, the capacity, 15:14:05 so that it doesn't either underpurchase or 15:14:08 overpurchase when you have projects like this that 15:14:13 are in development? How does it manage those? 15:14:16 And in that regard, does OPA put out 15:14:19 an annual report or a regular report that talks 15:14:23 about the power capacity in the future and how it's 15:14:27 managing this? 15:14:35 THE WITNESS: We have it's gotten 15:14:36
2 3 4 5 6 7 8 9	contracts, is it doing so with the idea that it 15:12:39 needs that power, the power that's being offered by 15:12:43 the proponent? 15:12:49 THE WITNESS: With regards to the FIT 15:12:51 contract, it is complicated because the FIT contract 15:12:53 had multiple FIT program had multiple objectives. 15:13:00 It was on one hand, it was a 15:13:04 purchasing power. On the other hand like, I 15:13:06 would go through three objectives. On one 15:13:09 objective, it is to obtain power for the Ontario, 15:13:12	2 3 4 5 6 7 8 9	power that it's purchasing, that is, the capacity, 15:14:05 so that it doesn't either underpurchase or 15:14:08 overpurchase when you have projects like this that 15:14:13 are in development? How does it manage those? 15:14:16 And in that regard, does OPA put out 15:14:19 an annual report or a regular report that talks 15:14:23 about the power capacity in the future and how it's 15:14:27 managing this? 15:14:35 THE WITNESS: We have it's gotten 15:14:36 more complicated because there has been a merger in 15:14:38
2 3 4 5 6 7 8 9 10	contracts, is it doing so with the idea that it 15:12:39 needs that power, the power that's being offered by 15:12:43 the proponent? 15:12:49 THE WITNESS: With regards to the FIT 15:12:51 contract, it is complicated because the FIT contract 15:12:53 had multiple FIT program had multiple objectives. 15:13:00 It was on one hand, it was a 15:13:04 purchasing power. On the other hand like, I 15:13:06 would go through three objectives. How does it manage those? 15:14:16 And in that regard, does OPA put out 15:14:19 an annual report or a regular report that talks 15:14:23 about the power capacity in the future and how it's 15:14:27 managing this? 15:14:35 THE WITNESS: We have it's gotten 15:14:36 more complicated because there has been a merger in 15:14:38 the last, I think, 14 13 and a half months ago. 15:14:41
2 3 4 5 6 7 8 9 10 11	contracts, is it doing so with the idea that it 15:12:39 needs that power, the power that's being offered by 15:12:43 the proponent? 15:12:49 THE WITNESS: With regards to the FIT 15:12:51 contract, it is complicated because the FIT contract 15:12:53 had multiple FIT program had multiple objectives. 15:13:00 It was on one hand, it was a 15:13:04 purchasing power. On the other hand like, I 15:13:06 would go through three objectives. On one 15:13:09 objective, it is to obtain power for the Ontario, 15:13:12 for the province and its citizens. 15:13:16 It's also in place for environmental how should I 15:13:18	2 3 4 5 6 7 8 9 10 11	power that it's purchasing, that is, the capacity, 15:14:05 so that it doesn't either underpurchase or 15:14:08 overpurchase when you have projects like this that 15:14:13 are in development? How does it manage those? 15:14:16 And in that regard, does OPA put out 15:14:19 an annual report or a regular report that talks 15:14:23 about the power capacity in the future and how it's 15:14:27 managing this? 15:14:35 THE WITNESS: We have it's gotten 15:14:36 more complicated because there has been a merger in 15:14:38 the last, I think, 14 13 and a half months ago. 15:14:41 So we're now part of the IESO. 15:14:46
2 3 4 5 6 7 8 9 10 11 12 13	contracts, is it doing so with the idea that it 15:12:39 needs that power, the power that's being offered by 15:12:43 the proponent? 15:12:49 THE WITNESS: With regards to the FIT 15:12:51 contract, it is complicated because the FIT contract 15:12:53 had multiple FIT program had multiple objectives. 15:13:00 It was on one hand, it was a 15:13:04 purchasing power. On the other hand like, I 15:13:06 would go through three objectives. On one 15:13:09 objective, it is to obtain power for the Ontario, 15:13:12 for the province and its citizens. 15:13:16 It's also in place for environmental how should I 15:13:18 say reducing the environmental footprint of our 15:13:23	2 3 4 5 6 7 8 9 10 11 12 13	power that it's purchasing, that is, the capacity, 15:14:05 so that it doesn't either underpurchase or 15:14:08 overpurchase when you have projects like this that 15:14:13 are in development? How does it manage those? 15:14:16 And in that regard, does OPA put out 15:14:19 an annual report or a regular report that talks 15:14:23 about the power capacity in the future and how it's 15:14:27 managing this? 15:14:35 THE WITNESS: We have it's gotten 15:14:36 more complicated because there has been a merger in 15:14:38 the last, I think, 14 13 and a half months ago. 15:14:41 So we're now part of the IESO. 15:14:46 So the OPA would do long-term 15:14:50
2 3 4 5 6 7 8 9 10 11 12 13	contracts, is it doing so with the idea that it 15:12:39 needs that power, the power that's being offered by 15:12:43 the proponent? 15:12:49 THE WITNESS: With regards to the FIT 15:12:51 contract, it is complicated because the FIT contract 15:12:53 had multiple FIT program had multiple objectives. 15:13:00 It was on one hand, it was a 15:13:04 purchasing power. On the other hand like, I 15:13:06 would go through three objectives. On one 15:13:09 objective, it is to obtain power for the Ontario, 15:13:12 for the province and its citizens. 15:13:16 It's also in place for environmental how should I 15:13:18 say reducing the environmental footprint of our 15:13:23 electricity generation fleet. So there is an 15:13:26	2 3 4 5 6 7 8 9 10 11 12 13	power that it's purchasing, that is, the capacity, 15:14:05 so that it doesn't either underpurchase or 15:14:08 overpurchase when you have projects like this that 15:14:13 are in development? How does it manage those? 15:14:16 And in that regard, does OPA put out 15:14:19 an annual report or a regular report that talks 15:14:23 about the power capacity in the future and how it's 15:14:27 managing this? 15:14:35 THE WITNESS: We have it's gotten 15:14:36 more complicated because there has been a merger in 15:14:38 the last, I think, 14 13 and a half months ago. 15:14:41 So we're now part of the IESO. 15:14:46 So the OPA would do long-term 15:14:50 planning, and it would work with the government and 15:14:54
2 3 4 5 6 7 8 9 10 11 12 13 14	contracts, is it doing so with the idea that it 15:12:39 needs that power, the power that's being offered by 15:12:43 the proponent? 15:12:49 THE WITNESS: With regards to the FIT 15:12:51 contract, it is complicated because the FIT contract 15:12:53 had multiple FIT program had multiple objectives. 15:13:00 It was on one hand, it was a 15:13:04 purchasing power. On the other hand like, I 15:13:06 would go through three objectives. On one 15:13:09 objective, it is to obtain power for the Ontario, 15:13:12 for the province and its citizens. 15:13:16 It's also in place for environmental how should I 15:13:18 say reducing the environmental footprint of our 15:13:23 electricity generation fleet. So there is an 15:13:26 environmental objective. 15:13:29	2 3 4 5 6 7 8 9 10 11 12 13 14 15	power that it's purchasing, that is, the capacity, 15:14:05 so that it doesn't either underpurchase or 15:14:08 overpurchase when you have projects like this that 15:14:13 are in development? How does it manage those? 15:14:16 And in that regard, does OPA put out 15:14:19 an annual report or a regular report that talks 15:14:23 about the power capacity in the future and how it's 15:14:27 managing this? 15:14:35 THE WITNESS: We have it's gotten 15:14:36 more complicated because there has been a merger in 15:14:38 the last, I think, 14 13 and a half months ago. 15:14:41 So we're now part of the IESO. 15:14:46 So the OPA would do long-term 15:14:50 planning, and it would work with the government and 15:14:54 the Crown with regard to getting a long-term supply 15:14:57
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	contracts, is it doing so with the idea that it 15:12:39 needs that power, the power that's being offered by 15:12:43 the proponent? 15:12:49 THE WITNESS: With regards to the FIT 15:12:51 contract, it is complicated because the FIT contract 15:12:53 had multiple FIT program had multiple objectives. 15:13:00 It was on one hand, it was a 15:13:04 purchasing power. On the other hand like, I 15:13:06 would go through three objectives. On one 15:13:09 objective, it is to obtain power for the Ontario, 15:13:12 for the province and its citizens. 15:13:16 It's also in place for environmental how should I 15:13:18 say reducing the environmental footprint of our 15:13:23 electricity generation fleet. So there is an 15:13:26 environmental objective. 15:13:31	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	power that it's purchasing, that is, the capacity, 15:14:05 so that it doesn't either underpurchase or 15:14:08 overpurchase when you have projects like this that 15:14:13 are in development? How does it manage those? 15:14:16 And in that regard, does OPA put out 15:14:19 an annual report or a regular report that talks 15:14:23 about the power capacity in the future and how it's 15:14:27 managing this? 15:14:35 THE WITNESS: We have it's gotten 15:14:36 more complicated because there has been a merger in 15:14:38 the last, I think, 14 13 and a half months ago. 15:14:41 So we're now part of the IESO. 15:14:46 So the OPA would do long-term 15:14:50 planning, and it would work with the government and 15:14:54 the Crown with regard to getting a long-term supply 15:14:57 mix plan for the long-term. 15:15:01
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	contracts, is it doing so with the idea that it 15:12:39 needs that power, the power that's being offered by 15:12:43 the proponent? 15:12:49 THE WITNESS: With regards to the FIT 15:12:51 contract, it is complicated because the FIT contract 15:12:53 had multiple FIT program had multiple objectives. 15:13:00 It was on one hand, it was a 15:13:04 purchasing power. On the other hand like, I 15:13:06 would go through three objectives. On one 15:13:09 objective, it is to obtain power for the Ontario, 15:13:12 for the province and its citizens. 15:13:16 It's also in place for environmental how should I 15:13:18 say reducing the environmental footprint of our 15:13:23 electricity generation fleet. So there is an 15:13:26 environmental objective. 15:13:31 developed in 2008. So there was a strong economic 15:13:35	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	power that it's purchasing, that is, the capacity, 15:14:05 so that it doesn't either underpurchase or 15:14:08 overpurchase when you have projects like this that 15:14:13 are in development? How does it manage those? 15:14:16 And in that regard, does OPA put out 15:14:19 an annual report or a regular report that talks 15:14:23 about the power capacity in the future and how it's 15:14:27 managing this? 15:14:35 THE WITNESS: We have it's gotten 15:14:36 more complicated because there has been a merger in 15:14:38 the last, I think, 14 13 and a half months ago. 15:14:41 So we're now part of the IESO. 15:14:46 So the OPA would do long-term 15:14:50 planning, and it would work with the government and 15:14:54 the Crown with regard to getting a long-term supply 15:14:57 mix plan for the long-term. 15:15:01 The IESO, which we are now part of, 15:15:04
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	contracts, is it doing so with the idea that it 15:12:39 needs that power, the power that's being offered by 15:12:43 the proponent? 15:12:49 THE WITNESS: With regards to the FIT 15:12:51 contract, it is complicated because the FIT contract 15:12:53 had multiple FIT program had multiple objectives. 15:13:00 It was on one hand, it was a 15:13:04 purchasing power. On the other hand like, I 15:13:06 would go through three objectives. On one 15:13:09 objective, it is to obtain power for the Ontario, 15:13:12 for the province and its citizens. 15:13:16 It's also in place for environmental how should I 15:13:18 say reducing the environmental footprint of our 15:13:23 electricity generation fleet. So there is an 15:13:26 environmental objective. 15:13:31 developed in 2008. So there was a strong economic 15:13:35 development objective associated with the program. 15:13:38	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	power that it's purchasing, that is, the capacity, 15:14:05 so that it doesn't either underpurchase or 15:14:08 overpurchase when you have projects like this that 15:14:13 are in development? How does it manage those? 15:14:16 And in that regard, does OPA put out 15:14:19 an annual report or a regular report that talks 15:14:23 about the power capacity in the future and how it's 15:14:27 managing this? 15:14:35 THE WITNESS: We have it's gotten 15:14:36 more complicated because there has been a merger in 15:14:38 the last, I think, 14 13 and a half months ago. 15:14:41 So we're now part of the IESO. 15:14:46 So the OPA would do long-term 15:14:50 planning, and it would work with the government and 15:14:57 mix plan for the long-term. 15:15:01 The IESO, which we are now part of, 15:15:04 does outlooks. And I think they still I know at 15:15:07
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	contracts, is it doing so with the idea that it 15:12:39 needs that power, the power that's being offered by 15:12:43 the proponent? 15:12:49 THE WITNESS: With regards to the FIT 15:12:51 contract, it is complicated because the FIT contract 15:12:53 had multiple FIT program had multiple objectives. 15:13:00 It was on one hand, it was a 15:13:04 purchasing power. On the other hand like, I 15:13:06 would go through three objectives. On one 15:13:09 objective, it is to obtain power for the Ontario, 15:13:12 for the province and its citizens. 15:13:16 It's also in place for environmental how should I 15:13:18 say reducing the environmental footprint of our 15:13:23 electricity generation fleet. So there is an 15:13:26 environmental objective. 15:13:29 And this program was essentially 15:13:31 developed in 2008. So there was a strong economic 15:13:35 development objective associated with the program. 15:13:38 So when you are looking at it, you 15:13:42	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	power that it's purchasing, that is, the capacity, 15:14:08 so that it doesn't either underpurchase or 15:14:08 overpurchase when you have projects like this that 15:14:13 are in development? How does it manage those? 15:14:16 And in that regard, does OPA put out 15:14:19 an annual report or a regular report that talks 15:14:23 about the power capacity in the future and how it's 15:14:27 managing this? 15:14:35 THE WITNESS: We have it's gotten 15:14:36 more complicated because there has been a merger in 15:14:38 the last, I think, 14 13 and a half months ago. 15:14:41 So we're now part of the IESO. 15:14:46 So the OPA would do long-term 15:14:50 planning, and it would work with the government and 15:14:57 mix plan for the long-term. 15:15:01 The IESO, which we are now part of, 15:15:04 does outlooks. And I think they still I know at 15:15:07 one point they were doing 18-month outlooks. 15:15:11
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	contracts, is it doing so with the idea that it 15:12:39 needs that power, the power that's being offered by 15:12:43 the proponent? 15:12:49 THE WITNESS: With regards to the FIT 15:12:51 contract, it is complicated because the FIT contract 15:12:53 had multiple FIT program had multiple objectives. 15:13:00 It was on one hand, it was a 15:13:04 purchasing power. On the other hand like, I 15:13:06 would go through three objectives. On one 15:13:09 objective, it is to obtain power for the Ontario, 15:13:12 for the province and its citizens. 15:13:16 It's also in place for environmental how should I 15:13:18 say reducing the environmental footprint of our 15:13:23 electricity generation fleet. So there is an 15:13:26 environmental objective. 15:13:29 And this program was essentially 15:13:31 developed in 2008. So there was a strong economic 15:13:35 development objective associated with the program. 15:13:38 So when you are looking at it, you 15:13:42 have to look at all three. And the and so the 15:13:43	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	power that it's purchasing, that is, the capacity, 15:14:05 so that it doesn't either underpurchase or 15:14:08 overpurchase when you have projects like this that 15:14:13 are in development? How does it manage those? 15:14:16 And in that regard, does OPA put out 15:14:19 an annual report or a regular report that talks 15:14:23 about the power capacity in the future and how it's 15:14:27 managing this? 15:14:35 THE WITNESS: We have it's gotten 15:14:36 more complicated because there has been a merger in 15:14:38 the last, I think, 14 13 and a half months ago. 15:14:41 So we're now part of the IESO. 15:14:46 So the OPA would do long-term 15:14:50 planning, and it would work with the government and 15:14:57 mix plan for the long-term. 15:15:01 The IESO, which we are now part of, 15:15:07 one point they were doing 18-month outlooks. 15:15:11 And so there are there's kind of 15:15:13
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	contracts, is it doing so with the idea that it 15:12:39 needs that power, the power that's being offered by 15:12:43 the proponent? 15:12:49 THE WITNESS: With regards to the FIT 15:12:51 contract, it is complicated because the FIT contract 15:12:53 had multiple FIT program had multiple objectives. 15:13:00 It was on one hand, it was a 15:13:04 purchasing power. On the other hand like, I 15:13:06 would go through three objectives. On one 15:13:09 objective, it is to obtain power for the Ontario, 15:13:12 for the province and its citizens. 15:13:16 It's also in place for environmental how should I 15:13:18 say reducing the environmental footprint of our 15:13:23 electricity generation fleet. So there is an 15:13:26 environmental objective. 15:13:29 And this program was essentially 15:13:31 developed in 2008. So there was a strong economic 15:13:35 development objective associated with the program. 15:13:38 So when you are looking at it, you 15:13:42 have to look at all three. And the and so the 15:13:48 policy objectives that we were dealing with were 15:13:48	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	power that it's purchasing, that is, the capacity, 15:14:08 so that it doesn't either underpurchase or 15:14:08 overpurchase when you have projects like this that 15:14:13 are in development? How does it manage those? 15:14:16 And in that regard, does OPA put out 15:14:19 an annual report or a regular report that talks 15:14:23 about the power capacity in the future and how it's 15:14:27 managing this? 15:14:35 THE WITNESS: We have it's gotten 15:14:36 more complicated because there has been a merger in 15:14:38 the last, I think, 14 13 and a half months ago. 15:14:41 So we're now part of the IESO. 15:14:46 So the OPA would do long-term 15:14:50 planning, and it would work with the government and 15:14:57 mix plan for the long-term. 15:15:01 The IESO, which we are now part of, 15:15:04 does outlooks. And I think they still I know at 15:15:17 one point they were doing 18-month outlooks. 15:15:11 And so there are there's kind of 15:15:13 different levels of groups within the organization 15:15:15
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	contracts, is it doing so with the idea that it 15:12:39 needs that power, the power that's being offered by 15:12:43 the proponent? 15:12:49 THE WITNESS: With regards to the FIT 15:12:51 contract, it is complicated because the FIT contract 15:12:53 had multiple FIT program had multiple objectives. 15:13:00 It was on one hand, it was a 15:13:04 purchasing power. On the other hand like, I 15:13:06 would go through three objectives. On one 15:13:09 objective, it is to obtain power for the Ontario, 15:13:12 for the province and its citizens. 15:13:16 It's also in place for environmental how should I 15:13:18 say reducing the environmental footprint of our 15:13:23 electricity generation fleet. So there is an 15:13:26 environmental objective. 15:13:31 developed in 2008. So there was a strong economic 15:13:35 development objective associated with the program. 15:13:38 So when you are looking at it, you 15:13:42 have to look at all three. And the and so the 15:13:48 quite complicated and varied. And, you know, you're 15:13:50	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	power that it's purchasing, that is, the capacity, 15:14:08 so that it doesn't either underpurchase or 15:14:08 overpurchase when you have projects like this that 15:14:13 are in development? How does it manage those? 15:14:16 And in that regard, does OPA put out 15:14:19 an annual report or a regular report that talks 15:14:23 about the power capacity in the future and how it's 15:14:27 managing this? 15:14:35 THE WITNESS: We have it's gotten 15:14:36 more complicated because there has been a merger in 15:14:38 the last, I think, 14 13 and a half months ago. 15:14:41 So we're now part of the IESO. 15:14:46 So the OPA would do long-term 15:14:50 planning, and it would work with the government and 15:14:54 the Crown with regard to getting a long-term supply 15:14:57 mix plan for the long-term. 15:15:01 The IESO, which we are now part of, 15:15:04 does outlooks. And I think they still I know at 15:15:17 And so there are there's kind of 15:15:13 different levels of groups within the organization 15:15:15 that does the planning function. 15:15:18
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	contracts, is it doing so with the idea that it 15:12:39 needs that power, the power that's being offered by 15:12:43 the proponent? 15:12:49 THE WITNESS: With regards to the FIT 15:12:51 contract, it is complicated because the FIT contract 15:12:53 had multiple FIT program had multiple objectives. 15:13:00 It was on one hand, it was a 15:13:04 purchasing power. So there was a strong economic 15:13:35 development objective associated with the program. 15:13:38 So when you are looking at it, you 15:13:42 have to look at all three. And the and so the 15:13:48 quite complicated and varied. And, you know, you're 15:13:50 trying to balance those three objectives. 15:13:50	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	power that it's purchasing, that is, the capacity, 15:14:05 so that it doesn't either underpurchase or 15:14:08 overpurchase when you have projects like this that 15:14:13 are in development? How does it manage those? 15:14:16 And in that regard, does OPA put out 15:14:19 an annual report or a regular report that talks 15:14:23 about the power capacity in the future and how it's 15:14:27 managing this? 15:14:35 THE WITNESS: We have it's gotten 15:14:36 more complicated because there has been a merger in 15:14:38 the last, I think, 14 13 and a half months ago. 15:14:41 So we're now part of the IESO. 15:14:46 So the OPA would do long-term 15:14:50 planning, and it would work with the government and 15:14:54 the Crown with regard to getting a long-term supply 15:14:57 mix plan for the long-term. 15:15:01 The IESO, which we are now part of, 15:15:04 does outlooks. And I think they still I know at 15:15:17 one point they were doing 18-month outlooks. 15:15:11 And so there are there's kind of 15:15:13 different levels of groups within the organization 15:15:15 that does the planning function. 15:15:15 I'm in the, of course, the contract 15:15:20
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	contracts, is it doing so with the idea that it 15:12:39 needs that power, the power that's being offered by 15:12:43 the proponent? 15:12:49 THE WITNESS: With regards to the FIT 15:12:51 contract, it is complicated because the FIT contract 15:12:53 had multiple FIT program had multiple objectives. 15:13:00 It was on one hand, it was a 15:13:04 purchasing power. 1	to the terms of those contracts. We have specific 15:15:27	1	perspective. 15:16:47
2	groups that do go planning. 15:15:31	2	MR. BISHOP: What does that mean, the 15:16:48
3	MR. BISHOP: Okay. Do you know 15:15:33	3	"wires perspective"? 15:16:48
4	whether, in any of the plans or reports about how to 15:15:34	4	THE WITNESS: What it means is, 15:16:50
5	manage the future, there's any discussion or any 15:15:40	5	because we're still under going procurements, so 15:16:51
6	mention of the Windstream contract? 15:15:43	6	they're still planning from the point of view of 15:16:53
7	THE WITNESS: It would be booked. I 15:15:47	7	future procurements. 15:16:56
8	mean, our planning people would know what we've 15:15:51	8	Right now the 300 megawatts in the 15:16:57
9	contracted. They also do wires planning, and so 15:15:56	9	Kingston area that Windstream is supposed to be 15:17:01
10	since Windstream has a FIT contract and it has an 15:16:00	10	connecting to, that 300 megawatts isn't available 15:17:04
11	allocation of 300 megawatts to the grid at that 15:16:03	11	for future procurement. So when I'm talking about 15:17:09
12	particular part in Kingston, they would be aware of 15:16:07	12	they would be aware of that, they would be aware 15:17:12
13	that in their for planning purposes. 15:16:10	13	that there is a contract there; that wire space has 15:17:13
14	You know, at this point, they would 15:16:15	14	been allocated to that contract. So when they're 15:17:16
15	know that the contract, from our point of view, is 15:16:17	15	doing future planning, they can't access that grid 15:17:19
16	in force majeure, and so no development activities 15:16:21	16	space. That's what they would know. 15:17:24
17	have taken place because it was put in force majeure 15:16:22	17	I don't know. I can't speak as to, 15:17:27
18	so early in its development cycle. 15:16:29	18	when they're doing their planning assumption, 15:17:29
19	MR. BISHOP: Okay. Do I understand 15:16:31	19	whether they're planning for Windstream, yes or no. 15:17:31
20	from that 15:16:32	20	MR. BISHOP: Okay. You've mentioned 15:17:33
21	THE WITNESS: Yes. 15:16:33	21	the term "wire space" a couple of times. What does 15:17:35
22	MR. BISHOP: that this contract 15:16:35	22	that mean? 15:17:37
23	would somewhere be within the long-term plan? 15:16:37	23	THE WITNESS: Yes. It just means 15:17:38
24	THE WITNESS: I can't say that. What 15:16:43	24	that there is only so much capacity on the grid for 15:17:39
25	I'm talking about is more from the wires 15:16:45	25	generation projects. 15:17:42

1 2	MR. BISHOP: Mm-hmm. 15:17:43	1 2	process. 15:18:45
2	MR. BISHOP: Mm-hmm. 15:17:43 THE WITNESS: And so when we do so 15:17:43	2	process. 15:18:45 THE WITNESS: Part of the planning 15:18:46
2	MR. BISHOP: Mm-hmm. 15:17:43 THE WITNESS: And so when we do so 15:17:43 generally when we do procurements, we try to make 15:17:47	2 3	process. 15:18:45 THE WITNESS: Part of the planning 15:18:46 process. It is, because we can't you know, you 15:18:47
2	MR. BISHOP: Mm-hmm. 15:17:43 THE WITNESS: And so when we do so 15:17:43 generally when we do procurements, we try to make 15:17:47 sure that we're contracting for facilities that can 15:17:49	2	process. 15:18:45 THE WITNESS: Part of the planning 15:18:46 process. 2 3 4	MR. BISHOP: Mm-hmm. 15:17:43 THE WITNESS: And so when we do so 15:17:43 generally when we do procurements, we try to make 15:17:47 sure that we're contracting for facilities that can 15:17:49 actually connect to the grid. And so we won't 15:17:53	2 3 4	process. 15:18:45 THE WITNESS: Part of the planning 15:18:46 process. It is, because we can't you know, you 15:18:47 can't sell the same thing twice. You have to have 15:18:50 the availability. 15:18:53
2 3 4 5	MR. And so we won't 15:17:53 procure contracts if the grid space is already 15:17:58	2 3 4 5	process. 15:18:45 THE WITNESS: Part of the planning 15:18:46 process. It is, because we can't you know, you 15:18:47 can't sell the same thing twice. You have to have 15:18:50 the availability. 15:18:53 MR. BISHOP: And one last question. 15:18:55
2 3 4 5	MR. BISHOP: Mm-hmm. 15:17:43 THE WITNESS: And so when we do so 15:17:43 generally when we do procurements, we try to make 15:17:47 sure that we're contracting for facilities that can 15:17:49 actually connect to the grid. And so we won't 15:17:53 procure contracts if the grid space is already 15:17:58 taken. And that's what I mean. 15:18:00	2 3 4 5	process. 15:18:45 THE WITNESS: Part of the planning 15:18:46 process. It is, because we can't you know, you 15:18:47 can't sell the same thing twice. You have to have 15:18:50 the availability. 15:18:53 MR. 2 3 4 5 6 7	MR. And so we won't 15:17:53 procure contracts if the grid space is already 15:17:58 taken. And that's what I mean. 15:18:00 MR. BISHOP: Okay. I think you 15:18:02	2 3 4 5 6 7	process. 15:18:45 THE WITNESS: Part of the planning 15:18:46 process. It is, because we can't you know, you 15:18:47 can't sell the same thing twice. You have to have 15:18:50 the availability. 15:18:53 MR. 2 3 4 5 6 7 8	MR. BISHOP: Mm-hmm. 15:17:43 THE WITNESS: And so when we do – so 15:17:43 generally when we do procurements, we try to make 15:17:47 sure that we're contracting for facilities that can 15:17:49 actually connect to the grid. And so we won't 15:17:53 procure contracts if the grid space is already 15:17:58 taken. And that's what I mean. 15:18:00 MR. BISHOP: Okay. I think you 15:18:02 probably just answered this, then, but let me make 15:18:04	2 3 4 5 6 7 8	process. THE WITNESS: Part of the planning 15:18:46 process. It is, because we can't you know, you 15:18:47 can't sell the same thing twice. You have to have 15:18:50 the availability. 15:18:53 MR. BISHOP: And one last question. 15:18:55 You said at one point in your testimony that the 15:18:58 government wanted this opportunity to be preserved. 15:19:01 And did you mean by that, that it wanted it the 15:19:06
2 3 4 5 6 7 8	MR. BISHOP: Mm-hmm. 15:17:43 THE WITNESS: And so when we do – so 15:17:43 generally when we do procurements, we try to make 15:17:47 sure that we're contracting for facilities that can 15:17:49 actually connect to the grid. And so we won't 15:17:53 procure contracts if the grid space is already 15:17:58 taken. And that's what I mean. 15:18:00 MR. BISHOP: Okay. I think you 15:18:02 probably just answered this, then, but let me make 15:18:04 sure. You had said at one point that the contract 15:18:08	2 3 4 5 6 7 8	process. THE WITNESS: Part of the planning 15:18:46 process. It is, because we can't you know, you 15:18:47 can't sell the same thing twice. You have to have 15:18:50 the availability. 15:18:53 MR. BISHOP: And one last question. 15:18:55 You said at one point in your testimony that the 15:18:58 government wanted this opportunity to be preserved. 15:19:01 And did you mean by that, that it wanted it the 15:19:06 opportunity to be preserved for Windstream's benefit 15:19:10
2 3 4 5 6 7 8 9	MR. BISHOP: Mm-hmm. 15:17:43 THE WITNESS: And so when we do so 15:17:43 generally when we do procurements, we try to make 15:17:47 sure that we're contracting for facilities that can 15:17:49 actually connect to the grid. And so we won't 15:17:53 procure contracts if the grid space is already 15:17:58 taken. And that's what I mean. 15:18:00 MR. BISHOP: Okay. I think you 15:18:02 probably just answered this, then, but let me make 15:18:04 sure. You had said at one point that the contract 15:18:08 was taking up wire space in the province, and at 15:18:10	2 3 4 5 6 7 8 9	process. THE WITNESS: Part of the planning 15:18:46 process. It is, because we can't you know, you 15:18:47 can't sell the same thing twice. You have to have 15:18:50 the availability. 15:18:53 MR. BISHOP: And one last question. 15:18:55 You said at one point in your testimony that the 15:18:58 government wanted this opportunity to be preserved. 15:19:01 And did you mean by that, that it wanted it the 15:19:06 opportunity to be preserved for Windstream's benefit 15:19:10
2 3 4 5 6 7 8 9 10	MR. BISHOP: Mm-hmm. 15:17:43 THE WITNESS: And so when we do so 15:17:43 generally when we do procurements, we try to make 15:17:47 sure that we're contracting for facilities that can 15:17:49 actually connect to the grid. You had said at one point that the contract 15:18:08 was taking up wire space in the province, and at 15:18:10 another point you said it was holding grid space, 15:18:14	2 3 4 5 6 7 8 9 10	process. THE WITNESS: Part of the planning 15:18:46 process. It is, because we can't you know, you 15:18:47 can't sell the same thing twice. You have to have 15:18:50 the availability. 15:18:53 MR. BISHOP: And one last question. 15:18:55 You said at one point in your testimony that the 15:18:58 government wanted this opportunity to be preserved. 15:19:01 And did you mean by that, that it wanted it the 15:19:06 opportunity to be preserved for Windstream's benefit 15:19:10 or for OPA's benefit or both or 15:19:14 THE WITNESS: No. I think that 15:19:17 you know, it's my word what I think a FIT contract 15:19:19 is. When a supplier gets a FIT contract, I don't 15:19:22 see it as they get a guarantee. They're being given 15:19:25 an opportunity to develop a project. They have to 15:19:31 So it was our understanding that, when 15:19:32 the moratorium came in place, that the government 15:19:36 wanted Windstream to have that opportunity kept in 15:19:38 place. So they still had to meet all our 15:19:43 obligations. It was just keeping that opportunity 15:19:47

1	DR. CREMADES: You said very clearly 15:19:54	1	that the the letter of credit will only be 15:20:59
2	that the FIT contract with Windstream is still in 15:19:56	2	cancelled, you said, by mutual release or by 15:21:05
3	place. 15:20:02	3	cancellation of the contract after the contract is 15:21:10
4	THE WITNESS: Yes. 15:20:03	4	terminated in 2017. 15:21:13
5	DR. CREMADES: Do you have other 15:20:04	5	THE WITNESS: Well, I want to be 15:21:16
6	contracts in a limbo situation like this one? 15:20:05	6	clear that we have had no discussions within the OPA 15:21:18
7	THE WITNESS: No. I would say in 15:20:09	7	on what we are going to do with the Windstream 15:21:22
8	this kind of like this, with the long-term force 15:20:14	8	contract. 15:21:24
9	majeure like this, we don't have Windstream is 15:20:18	9	It is not generally our practice to do 15:21:25
10	unique. 15:20:20	10	we discuss these events as they come before us, 15:21:28
11	DR. CREMADES: When Windstream 15:20:21	11	so we haven't had any discussions to date. 15:21:32
12	started this arbitration against Canada 15:20:25	12	What I would say is what I was 15:21:35
13	THE WITNESS: Yes. 15:20:27	13	saying is, if the if Windstream came to us and 15:21:37
14	DR. CREMADES: did any settlement 15:20:29	14	said they wanted to terminate the contract, and they 15:21:41
15	negotiations took place? 15:20:34	15	wanted to and in exchange for a full and final 15:21:44
16	THE WITNESS: We have had no 15:20:37	16	release on both sides, we would return the security, 15:21:48
17	discussions with Windstream since the arbitration 15:20:38	17	and we have done so in every case where that has 15:21:50
18	was launched. 15:20:45	18	happened to date. 15:21:53
19	DR. CREMADES: Mm-hmm. And you say 15:20:46	19	If under the contract, if we ever 15:21:56
20	that the letter of credit 15:20:48	20	exercise 10.1(g), if we ever had a termination right 15:21:59
21	THE WITNESS: Other than that request 15:20:51	21	under 10.1(g) and we exercised it, by the terms of 15:22:03
22	for the letter of credit, I should say, except I 15:20:52	22	the contract, we would be required to return the 15:22:06
23	think that was done just before the arbitration was 15:20:55	23	security. 15:22:08
24	launched. 15:20:57	24	DR. CREMADES: Thank you. 15:22:09
25	DR. CREMADES: Mm-hmm. And you say 15:20:58	25	THE WITNESS: Whether they do it or 15:22:09

1	PRESIDENT: No, you are not, as long 15:23:48	1	and see what kind of arrangement can be agreed. 15:24:49
2	because there has been no decision to call you 15:23:49	2	MR. TERRY: Yes, that would be good. 15:24:52
3	back, so you are no longer sequestered. 15:23:51	3	And, if in the interim, we could consider him 15:24:53
4	THE WITNESS: Thank you very much. 15:23:54	4	sequestered until that's determined. It's and 15:24:56
5	MR. TERRY: If I may just 15:23:56	5	it's simply because this information has arisen at 15:24:59
6	apologies. I just want to make sure. From our 15:23:58	6	such a late date, and we received it just last 15:25:02
7	perspective, I'm just a little bit concerned. We're 15:24:01	7	night. 15:25:06
8	certainly reserving the right to recall him. We 15:24:06	8	If necessary, we can certainly put on the record our 15:25:06
9	haven't made a decision yet because we have to 15:24:08	9	confirmation that we will recall him, but I don't 15:25:11
10	finish our review of the information he provided. 15:24:10	10	want to be I don't want to be, you know, being 15:25:14
11	And I'm just concerned that I don't 15:24:13	11	silly about this, and we will try to work it out the 15:25:15
12	think it is appropriate. I haven't had a chance to 15:24:15	12	best we can. 15:25:18
13	discuss it with my friends, and they may in fact 15:24:18	13	PRESIDENT: Understood. Let's be 15:25:19
14	agree with us. I'm concerned about just the 15:24:20	14	practical. If the counsel can discuss 15:25:20
15	appropriateness, given the approach we have taken to 15:24:24	15	DR. CREMADES: It's a clear case of 15:25:22
16	all of the other fact witnesses, that until their 15:24:26	16	mutual release. 15:25:27
17	evidence is complete, I respectfully submit that it 15:24:31	17	[Laughter.] 15:25:28
18	be appropriate to keep them sequestered. I would be 15:24:33	18	PRESIDENT: Okay. Thank you very 15:25:29
19	happy if you want, during the break we could 15:24:37	19	much. 15:25:30
20	discuss with our friends and see if we can come up 15:24:38	20	And I suggest we continue the examination. Let's 15:25:30
21	with a solution. 15:24:41	21	just have a do you need five, ten minutes; five 15:25:35
22	PRESIDENT: That would be that 15:24:41	22	minutes is enough five-minute break, and we'll 15:25:38
23	would be better, because as long as there is no 15:24:42	23	continue with the next witness. We will continue at 15:25:45
24	decision to call the witness back, he is effectively 15:24:43	24	3:30. 15:25:50
25	released. So if you could confer between counsel 15:24:47	25	Recess taken at 3:25 p m. 15:25:50

3	So I take it there you're setting out 15:49:14	3	or connection to appropriate 15:50:00
4	what this document is intended to do 15:49:16	4	staff and subject experts in 15:50:01
5	A. That's right. 15:49:17	5	other ministries as well as 15:50:03
6	Q and what you're conveying 15:49:17	6	inform applicants of 15:50:04

	A. Yes. 15:58:18		offshore wind projects and 15:58:59
4	A. Yes. 15:58:18 Q. And then you have a records review 15:58:19	4	offshore wind projects and 15:58:59 related infrastructure, some 15:59:01
4 5	A. Yes. 15:58:18 Q. And then you have a records review 15:58:19 that's set out there dealing with issues such as 15:58:21	4 5	offshore wind projects and 15:58:59 related infrastructure, some 15:59:01 federal government approvals 15:59:02
4 5 6	A. Yes. 15:58:18 Q. And then you have a records review 15:58:19 that's set out there dealing with issues such as 15:58:21 fish and fish habitat, fish population, where 15:58:24	4 5 6	offshore wind projects and 15:58:59 related infrastructure, some 15:59:01 federal government approvals 15:59:02 may have to be met." 15:59:03
4 5 6 7	A. Yes. 15:58:18 Q. And then you have a records review 15:58:19 that's set out there dealing with issues such as 15:58:21 fish and fish habitat, fish population, where 15:58:24 vegetation communities, species in habitat protected 15:58:27	4 5 6 7	offshore wind projects and 15:58:59 related infrastructure, some 15:59:01 federal government approvals 15:59:02 may have to be met." 15:59:03 So in addition to all the studies 15:59:04 we've outlined here, there might, depending on the 15:59:06
4 5 6 7 8	A. Yes. 15:58:18 Q. And then you have a records review 15:58:19 that's set out there dealing with issues such as 15:58:21 fish and fish habitat, fish population, where 15:58:24 vegetation communities, species in habitat protected 15:58:27 under the Endangered Species Act, wildlife species 15:58:28 hazard lands. All those items are covered under the 15:58:35 next section? 15:58:38 A. Yes. 15:58:38 Q. And then it also says: 15:58:38 "In support of the 15:58:39 compilation of baseline 15:58:40 information, applicants must 15:58:41	4 5 6 7 8 9 10 11 12 13	offshore wind projects and 15:58:59 related infrastructure, some 15:59:01 federal government approvals 15:59:02 may have to be met." 15:59:03 So in addition to all the studies 15:59:04 we've outlined here, there might, depending on the 15:59:06 circumstances, be a requirement for additional 15:59:10 federal studies as well? 15:59:12 A. Correct. 15:59:14 Q. Now, I'll turn very briefly to the 15:59:18 REA regulation, the Renewable Energy Regulation 15:59:24 which is at Tab 35. And I appreciate, Ms. Lawrence, 15:59:29
4 5 6 7 8 9 10 11 12 13 14 15	A. Yes. 15:58:18 Q. And then you have a records review 15:58:19 that's set out there dealing with issues such as 15:58:21 fish and fish habitat, fish population, where 15:58:24 vegetation communities, species in habitat protected 15:58:27 under the Endangered Species Act, wildlife species 15:58:28 hazard lands. All those items are covered under the 15:58:35 next section? 15:58:38 A. Yes. 15:58:38 Q. And then it also says: 15:58:38 "In support of the 15:58:39 compilation of baseline 15:58:40 information, applicants must 15:58:41 also undertake a coastal 15:58:42	4 5 6 7 8 9 10 11 12 13	offshore wind projects and 15:58:59 related infrastructure, some 15:59:01 federal government approvals 15:59:02 may have to be met." 15:59:03 So in addition to all the studies 15:59:04 we've outlined here, there might, depending on the 15:59:06 circumstances, be a requirement for additional 15:59:10 federal studies as well? 15:59:12 A. Correct. 15:59:14 Q. Now, I'll turn very briefly to the 15:59:18 REA regulation, the Renewable Energy Regulation 15:59:24 which is at Tab 35. And I appreciate, Ms. Lawrence, 15:59:29 that this is Ministry of Environment that 15:59:42

18	A. It does. 16:01:19	18	with the previous witness, but if you turn to 16:02:26
19	Q. And you will see, in Section 6.2, 16:01:20	19	paragraph 11 sorry, Section 11, you will see that 16:02:32
20	it refers to the fact, in this regulation, a 16:01:25	20	it says, "This part," and it's dealing with this 16:02:40

So I don't know the answer to that 16:04:17 16:04:19 Q. Okay. 16:04:19 A because I'm not familiar with 16:04:19 Class 5. And I'm not a master of this particular 16:04:20 regulation, nor a lawyer, as you correctly point 16:04:26 out. 16:04:30 I am familiar with the policy proposal 16:04:34 that preceded the actual drafting, but I know that 16:04:36 had a specific section on offshore, which referred 16:04:43 to MOE undertaking further examination of potential 16:04:48 setbacks. It committed MNR to providing more detail 16:04:57 with respect to what the coastal engineering study 16:05:03 would do. And there was one other commitment they 16:05:06 made, but it was in prose, not in law. 16:05:11 Q. Right. And if we just sticking 16:05:15 to the law for one moment and, again, 16:05:17

2	end of this section, after Section 64.2. Do you 16:05:31	2	to the policy perspective, what would happen then 16:06:50
3	have that section? 16:05:34	3	under the Renewable Energy Approval is all wind 16:06:53
4	A. I have lost where I'm looking. I 16:05:40	4	promises, including offshore projects, would come 16:06:58
5	apologize. 16:05:42	5	forward, and as part of their approval, they would 16:07:00
6	Q. No problem. If you flip through 16:05:43	6	have to go out and do all these various studies and 16:07:01
7	to Section 64 of the legislation. See the tables 16:05:44	7	provide these reports to both ministries, Ministry 16:07:06
8	that start there? 16:05:57	8	of Environment and Ministry of Natural Resources. 16:07:11
9	A. I do. 16:05:58	9	Perhaps Ministry of Environment was playing the lead 16:07:14
10	Q. Okay. And you will see, if you 16:05:59	10	role in the process, but Ministry of Natural 16:07:17
11	look through the list of various studies there, 16:06:02	11	Resources would also be reviewing these; correct? 16:07:19
12	construction plan reports, consultation reports, 16:06:07	12	A. That's correct. And supporting 16:07:21
13	decommissioning reports, design and operation, there 16:06:11	13	MOE in its review. 16:07:23
14	is a congruence between those and what the APRD 16:06:14	14	Q. Right. And then, just like on the 16:07:24
15	requires. Do you agree? Or certainly an overlap? 16:06:17	15	APRD side, the MNR document we looked at earlier, 16:07:26
16	A. I wouldn't describe it as an 16:06:29	16	there was a requirement for a separate offshore wind 16:07:31
17	overlap. I would describe it as a congruence. 16:06:30	17	facility report that was effectively provided to 16:07:34
18	Q. Okay. 16:06:32	18	both MNR and MOE, and you can see that if you look 16:07:38
19	A. We weren't asking for separate 16:06:32	19	at tab paragraph 12 in this table. If you flip 16:07:42
20	reports. 16:06:35	20	maybe another page or so, you come to paragraph 12, 16:07:45
21	Q. Right. 16:06:36	21	which talks about an offshore wind facility report. 16:07:54
22	A. The REA was the home of the 16:06:37	22	Do you see that? 16:07:57
23	reports, but MNR was going to be playing an active 16:06:39	23	A. I do. 16:07:57
24	role in reviewing the complete submissions with MOE 16:06:44	24	Q. Okay. And you can see there that, 16:07:58
25	at the time. 16:06:47	25	just like in the MNR document, there is a 16:08:00

Now, in the case of Windstream, if 16:20:00 I could turn you back to the front of the book, Tab 16:20:12 3. So Windstream it's agreed between the parties 16:20:22 here applied in pretty much as soon as the 16:20:32 Is that your understanding? 16:20:36 A. That is my understanding. 16:20:37 Q. And then we see so they apply 16:20:39	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	a letter to advise you of the 16:20:51 status of your applications. 16:20:53 Due to large volume of 16:20:54 applications that we 16:20:56 received, at the opening of 16:20:56 the latest wind power window, 16:20:58 the review process is taking 16:21:00 longer than the scheduled 30 16:21:02 days from date of 16:21:03 submission." [As read] 16:21:04 So I understand there was a a bit 16:21:04 of a backlog. It seems there was some delay on 16:21:05 MNR's part in processing these site release 16:21:08 A. Yes. My understanding is we 16:21:10 received more than 500 applications. 16:21:13 Q. Okay. And that circumstance 16:21:18 continues for some time until we get to the period 16:21:25 that we were at before where we get the Renewable 16:21:30 Energy Approval requirements coming in or provisions 16:21:32 coming in September of 2009. 16:21:38
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	A. That's correct. Q. Right. And and, also, it gives 16:19:27 you the ability to go through the environmental 16:19:29 processes, and here you describe the Environmental 16:19:32 Assessment process. 16:19:34 A. That's right. 16:19:37 Q. And and you you indicate 16:19:37 here that the offshore wind power deferral is being 16:19:42 lifted, and the window will open for new 16:19:46 applications as of February 15, 2008. So that was 16:19:49 referring to the new window that was going to open? 16:19:51 A. That's right. 16:19:54 Q. Now, in the case of Windstream, if 16:20:00 I could turn you back to the front of the book, Tab 16:20:12 3. So Windstream it's agreed between the parties 16:20:22 here applied in pretty much as soon as the 16:20:38 window opened in in February 2008 for grid cells. 16:20:32 Is that your understanding? 16:20:36 A. That is my understanding. 16:20:37 Q. And then we see so they apply 16:20:39 in February. We see a letter in May 2008, saying: 16:20:41	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	a letter to advise you of the 16:20:51 status of your applications. 16:20:53 Due to large volume of 16:20:54 applications that we 16:20:56 received, at the opening of 16:20:56 the latest wind power window, 16:20:58 the review process is taking 16:21:00 longer than the scheduled 30 16:21:02 days from date of 16:21:03 submission." 	Page 308		Page 309
1	and I want to focus on the sixth paragraph down. 16:22:01	1	Q. And, effectively, if you wanted to 16:22:49
2	Minister Cansfield, she says: 16:22:11	2	maintain your priority position within the site 16:22:53
3	"In order to maintain 16:22:12	3	release process, you had to submit an application to 16:22:55
4	priority position with MNR 16:22:13	4	the FIT program; correct? 16:22:58
5	site release process, you 16:22:15	5	A. Correct. 16:22:59
6	must submit an application to 16:22:16	6	Q. And, presumably, if you didn't do 16:23:00
7	the FIT program within the 16:22:18	7	that you mentioned before that, if you have 16:23:02
8	FIT program launch period." 16:22:19	8	competing applications on grid cells, if there was 16:23:05
9	[As read] 16:22:21	9	someone behind you on the queue and you didn't apply 16:23:09
10	And then it says: 16:22:21	10	for FIT into the FIT program, you'd would lose 16:23:11
11	"Following the outcome of the 16:22:23	11	your priority in the queue, and someone else may 16:23:15
12	Ontario Power Authority's FIT 16:22:25	12	come in and have the priority application with 16:23:19
13	launch application process, 16:22:26	13	respect to those cells; correct? 16:23:21
14	the status of all Crown land 16:22:27	14	A. No. We were this was aligning 16:23:24
15	applications will be reviewed 16:22:30	15	our site release process and 500 applications for 16:23:26
16	and applicants will be 16:22:30	16	Applicant of Record with FIT program priorities to 16:23:30
17	contacted regarding the 16:22:32	17	try and focus in on shovel-ready projects, I believe 16:23:35
18	status of each of their 16:22:33	18	we were calling them at the time. 16:23:41
19	applications." [As read] 16:22:34	19	So this is about you will have 16:23:44
20	So this was MNR. You mentioned before 16:22:34	20	priority vis-à-vis other applicants in terms of the 16:23:47
21	ministries working together. This is MNR aligning 16:22:38	21	order in which we're going to process these, and 16:23:54
22	its processes with the FIT process, which was being 16:22:40	22	we're going to expedite FIT contracts first as best 16:23:59
23	administered by Ministry of Energy and the OPA; 16:22:43	23	we can. 16:24:05
24	right? 16:22:47	24	Q. Okay. In addition to that 16:24:06
25	A. That's right. 16:22:48	25	priority, if, for example, you had a circumstance 16:24:07
	Page 310		Page 311
1	where two applicants were had put in applications 16:24:08	1	contract offer? Right? Do you see that? That's 16:25:37
2	for the same site and one applicant applied for the 16:24:14	2	effectively the question that's being asked here. 16:25:41
3	FIT program and the other applicant didn't, then you 16:24:17	3	A. Yes. 16:25:47
4	would be giving priority to the applicant that was 16:24:19	4	Q. You'll see at at the for 16:25:47
5	that was awarded the FIT contract; correct? 16:24:24	5	example, if you turn to the second page here, where 16:25:53
6	A. Correct. 16:24:26	6	the e-mail chain starts, and you can see that, for 16:25:55
7	Q. Right. And if we turn to the next 16:24:27	7	the 2008 applications, it includes Wolfe Island: 16:26:00
8	document at Tab 6, we see a discussion here, which I 16:24:33	8	"Due to the high number of 16:26:04
9	think is very consistent with what you were just 16:24:45	9	site release applications 16:26:05
10	telling me. 16:24:48	10	received, MNR, in 16:26:06
11	So this is Mr. Linley feel free if 16:24:49	11	consultation with MEI, 16:26:08
12	you want to take a drink of water. I don't want 16:24:52	12	Ministry of Energy, changed 16:26:10
13	to 16:24:55	13	the approach and said the 16:26:11
14	A. Sorry, wrong tab. 16:24:56	14	site release review will be 16:26:13
15	Q. Tab 6, there is an e-mail. And 16:24:58	15	initiated for those projects 16:26:14
16	you will see this is this is this is a time at 16:25:02	16	after they receive a FIT 16:26:15
17	which, and just to remind you of the time frame 16:25:06	17	contract." [As read] 16:26:17
18	here, Windstream receives its FIT contract offer in 16:25:08	18	A. Correct. 16:26:17
19	early April of 2010. 16:25:14	19	Q. And then you've got going up 16:26:22
20	A. Correct. 16:25:19	20	the e-mail chain here, you've got someone at 16:26:24
21	Q. And you'll see, if you look down 16:25:19	21	Ministry of Environment copying Mr. Linley you 16:26:28
22	at the bottom of the chain, you've got Ministry of 16:25:21	22	explained his role at MNR saying: 16:26:31
23	Environment officials wondering how does this work. 16:25:25	23	"Is this your understanding? 16:26:34
24	If if Wolfe Island Shoals hasn't come through the 16:25:33	24	They don't need Applicant of 16:26:36
25	site release process, how are they getting a FIT 16:25:35	25	Record status before they get 16:26:36

	Page 312		Page 313
1	a FIT? Shouldn't this be a 16:26:39	1	view as to what the rationale was? 16:27:09
2	requirement before 16:26:41	2	A. Yes. 16:27:12
3	determining that they are 16:26:42	3	Q. And then in the second paragraph: 16:27:14
4	worthy of a FIT contract?"[As 16:26:44	4	"So last year MNR negotiated 16:27:16
5	read] 16:26:45	5	with OPA to allow all 16:27:18
6	Do you see that statement? 16:26:45	6	existing Crown land 16:27:20
7	A. I do. 16:26:46	7	applications to apply for a 16:27:21
8	Q. And then then you see the 16:26:46	8	FIT program, the idea being 16:27:22
9	answer from Mr. Linley: 16:26:47	9	that MNR would determine 16:27:24
10	"This is true." 16:26:49	10	priority Crown land projects 16:27:25
11	He says: 16:26:49	11	based on which Crown land 16:27:28
12	"They don't need Applicant of 16:26:51	12	applicants secured accepted 16:27:29
13	Record status before they get 16:26:53	13	FIT applications from OPA." 16:27:31
14	a FIT." [As read] 16:26:54	14	[As read] 16:27:32
15	He says: 16:26:54	15	Again, is that consistent with your 16:27:32
16	"The rationale was to weed 16:26:55	16	understanding? 16:27:35
17	out speculators among the 16:26:56	17	A. Sorry, just let me read that for a 16:27:36
18	pool of applicants. Remember 16:26:58	18	moment. 16:27:38
19	MNR received over 400 site 16:26:59	19	Q. Sure. 16:27:39
20	release applications for wind 16:27:01	20	A. So I'm not aware of any 16:27:56
21	and over 100 for water. One 16:27:02	21	negotiation that went on with the OPA, but I know 16:27:57
22	company submitted over 100 16:27:04	22	that, certainly, internally we had talked about the 16:28:01
23	applications alone." [As 16:27:06	23	focus being on shovel-ready projects to facilitate 16:28:04
24	read] 16:27:06	24	the implementation of the Green Energy Act and the 16:28:09
25	So would that be consistent with your 16:27:07	25	FIT program itself. 16:28:13
1	Page 314	1	Page 315
2	Q. Right. And and shovel-ready 16:28:14 projects would presumably be those that that got 16:28:16	2	and technical viability was something, in our 16:29:05 various policy discussions around changing site 16:29:10
3	FIT applications versus those that didn't get FIT 16:28:20	3	various policy discussions around changing site 16:29:10 release to line up with Green Energy Act, was 16:29:14
4	applications? 16:28:23	4	something, I think, we appropriately ceded to the 16:29:17
5	A. That's correct. 16:28:23	5	OPA. It used to be our district offices making that 16:29:20
6	Q. And we can see this reflected also 16:28:24	6	determination. 16:29:24
7	in the next paragraph where it says: 16:28:25	7	Q. Right. But you would agree with 16:29:25
8	"MNR worked with the OPA to 16:28:27	8	me, as you said before, that and this really 16:29:27
9	identify priority Crown land 16:28:28	9	talks about alignment of policies among the 16:29:31
10	projects."[As read] 16:28:30	10	ministries, is that that you and MNR were were 16:29:35
11	This is Mr. Linley speaking: 16:28:30	11	working to support those projects that were deemed 16:29:40
12	"Those determined most 16:28:31	12	and I'm not saying you would deem them to be 16:29:43
13	economically and technically 16:28:34	13	shovel-ready, but the projects that that other 16:29:45
14	viable by OPA, i.e., 16:28:35	14	ministries or entities had determined to be 16:29:48
15	shovel-ready, and where or 16:28:37	15	shovel-ready and ready to get the FIT contract. 16:29:50
16	what areas of the province, 16:28:38	16	A. We did not have a view of what 16:29:55
17	this process was also used to 16:28:40	17	priority Crown land projects were in terms of the 16:29:57
18	help MNR to determine 16:28:41	18	mass it had received, but the ones we thought that 16:30:05

21	And, again, do you agree with what Mr. 16:28:43	21	behind them, so the Crown land freed up to 16:30:15
22	Linley is saying here to to his colleagues at 16:28:45	22	accommodate specific energy projects. 16:30:20

11	Phase 2 for discussion on key 16:34:50	11	be replaced with Renewable Energy Approvals. So the 16:36:16
12	policy elements and methods 16:34:53	12	framework looked the same. 16:36:19
13	for making Crown land 16:34:54	13	Q. Right. All that. And you can see 16:36:21
14	available in the future." [As 16:34:55	14	that at page 4 where you outline there that you're 16:36:22
15	read] 16:34:56	15	trying to achieve procedural clarity in Phase 1, 16:36:25
16	So the basic idea, as I understand it, 16:34:56	16	aligning with GEA direction and eliminating 16:36:29
17	of this Phase 1 was to, for those who were already 16:34:58	17	duplication; right? 16:36:32
18	applicants, was to streamline the process or make it 16:35:02	18	A. That's correct. 16:36:35
19	consistent with the Green Energy Act and FIT 16:35:06	19	Q. Okay. This would be a convenient 16:36:36
20	contract process; correct? 16:35:08	20	time to break. 16:36:38
21	A. Yes. So to that extent, we 16:35:11	21	PRESIDENT: Okay. Very good. So we 16:36:39
22	removed things like the requirement for a wind site 16:35:13	22	will break for 15 minutes and continue at 4:50. 16:36:40
23	strategy, because that was going to be in the 16:35:18	23	Recess taken at 4:36 p m. 16:36:47

2	you will still need? 16:53:07	2	heads-up that they were going to be offered one. 16:54:21
3	MR. TERRY: I think I'm going to be 16:53:09	3	Q. Right. And in the next next 16:54:23
4	at least a half an hour and perhaps more. It sort 16:53:10	4	e-mail, which is an interesting one, it's an e-mail 16:54:28
5	of depends how quickly we can go through the 16:53:14	5	chain, if we could start at the second page of the 16:54:34
6	documents. 16:53:16	6	e-mail chain. This is Mr. Paul Evans who he 16:54:37
7	The and I understand that 16:53:17	7	like you, he's at the ADM level at the Ministry of 16:54:42
8	Mr. Wilkinson is only available for today, so we'll 16:53:19	8	Environment; correct? 16:54:46
9	need to proceed with him. I don't plan to be as 16:53:24	9	A. That's right. He is my policy 16:54:47
10	long with Mr. Wilkinson as with this witness. 16:53:29	10	counterpart. 16:54:49
11	PRESIDENT: Okay. Okay. Let's go 16:53:31	11	Q. Okay. And he's he's writing. 16:54:49
12	on, then. 16:53:33	12	He's saying, Rosalyn and Eric and that is Eric 16:54:51
13	BY MR. TERRY: 16:53:34	13	Boysen who we talked about later or earlier; 16:54:55
14	Q. Right. Okay. If you could and 16:53:34	14 15	right? 16:54:57
15	I will try to move fairly quickly through these 16:53:40	16	A. That's right. 16:54:57 Q. And he says: 16:54:58
16	documents with you. At Tab 9, this is the document 16:53:43	17	"Last week we had also talked 16:54:59
17	where MNR actually is writing and taking the next 16:53:49	18	about contact with the 16:55:01

Now, this is your 17:00:16 account of what you understand Mr. Boysen said, but 17:00:22 we actually have a contemporaneous e-mail, which is 17:00:26 at Tab 12. If you could turn to that. And you'll 17:00:29 see that this is Mr. Boysen writing to, among 17:00:37 others, you, April 19. It says: 17:00:41 "We just wrapped up our 17:00:44 meeting with the developers." 17:00:46 It talks about who was in attendance. 17:00:47 He says: 17:00:50 "From the developer" 17:00:50 He's describing what was said. 17:00:51 " lots of development 17:00:52 experience in Ontario, 17:00:54	2 3 4 5 6 7 8 9 10 11 12 13 14 15	And then he says at the very bottom 17:01:28 here: 17:01:29 "Bottom line for me: We are 17:01:30 as ready for this project as 17:01:31 all of the others on Crown 17:01:33 land." [As read] 17:01:34 Now, is there any reason, 17:01:36 Ms. Lawrence, with respect, that you can give me as 17:01:40 to why we should prefer why we should not accept 17:01:42 what Mr. Boysen was saying in that bottom line at 17:01:49 the time in his contemporaneous letter as being the 17:01:51 best evidence as to what happened there from the 17:01:55 MNR's perspective. 17:01:56 A. So my interpretation of that is 17:01:57

1	Q. Okay. If we could turn to the 17:02:32	1	A. I don't know what Richard is 17:03:53
2	next document, which is this August 9, 2010 letter. 17:02:34	2	doing, but I think typically ministries work 17:03:57
3	And I understand you weren't involved in the process 17:02:41	3	together, both bureaucratically and politically. So 17:04:02
4	of you weren't the author of this letter? 17:02:49	4	it doesn't surprise me that somebody might be 17:04:06
5	A. I was not. 17:02:53	5	involved from the Premier's Office. 17:04:11
6	Q. All right. And were you involved 17:02:54	6	Q. Okay. And I think you made the 17:04:12
7	in I understand you weren't involved in the 17:02:55	7	point in your witness statement you did say that 17:04:20
8	process of the drafting or provision of this letter? 17:02:59	8	this, from your perspective, wasn't the type of 17:04:21
9	A. Well, I would have been aware of 17:03:04	9	comfort letter that would be given to a financial 17:04:24
10	the letter, because we would have needed Minister's 17:03:05	10	institution, but that it was rare for MNR to provide 17:04:26
11	approval to send it. 17:03:09	11	this kind of letter. 17:04:29
12	Q. Okay. And and is it true that 17:03:10	12	A. Well, it was rare because it flew 17:04:33
13	you also, if you can turn to Tab 14, that, in 17:03:13	13	in the face of policy that we had just put out which 17:04:36
14	addition to Minister's approval, there was actually 17:03:17	14	said we weren't entertaining grid cell swaps or 17:04:42
15	approval from the Premier's Office with respect to 17:03:20	15	reconfigurations, and we had never actually 17:04:46
16	sending this letter? You can see that, in the next 17:03:22	16	processed such a request, to my knowledge, before. 17:04:50
17	e-mail, there is a discussion that involves Sean 17:03:26	17	Q. Right. So it was rare for MNR to 17:04:53
18	Mullin of the Premier's Office, and you can see that 17:03:30	18	provide this kind of letter? 17:04:56
19	Sean Mullin is saying, "Looks fine to me," after 17:03:32	19	A. It was. 17:04:58
20	Richard Linley sends him the letter and the 17:03:36	20	Q. Now, this letter, of course, was 17:05:11
21	description of it. 17:03:38	21	conditional on the idea was that there would 17:05:14
22	A. I'm not familiar with this e-mail. 17:03:39	22	first be a determination as to what the applicable 17:05:18
23	We wouldn't interact with the Premier's Office from 17:03:48	23	setback was going to be, because you remember that 17:05:22
24	our side of it. 17:03:52	24	was an issue at the time, the setback for offshore 17:05:24
25	Q. Right. 17:03:53	25	wind turbines? 17:05:27
	Page 334		Page 335
1	A. Yes. It was 17:05:28	1	And you'll see that there is a timeline overview 17:06:57
2	Q. Do you recall that? Yea. 17:05:28	2	document discussed here, dated the 23rd of August, 17:06:59
3	A conditional on the Ministry of 17:05:29	3	2010. 17:07:03
4	Environment's conclusion and articulation of its 17:05:35	4	Is this consistent with your 17:07:05
5	policy on setback zones. 17:05:38	5	recollection, that, at that time, for planning 17:07:07
6	Q. Right. And do you recall that the 17:05:41	6	purposes, both MOE and MNR were anticipating that 17:07:09
7	window of for that posting was due to expire 17:05:43	7	they would have completed their processes and would 17:07:12
8	sometime in in mid-September? It's not a memory 17:05:47	8	have revised regulations by January 2011? 17:07:15
9	test, so if you don't recollect, that's fine. 17:05:53	9	A. Yes. That's what we were 17:07:20
10	A. It's roughly the timeline. 17:05:55	10	targeting. 17:07:21
11	Q. Okay. And the if I could turn 17:05:57	11	Q. Okay. And that's also if we 17:07:22
12	to the next document, and it's at tab Tab 15. 17:06:04	12	turn to Tab 17, which is Exhibit 840 C-840, we 17:07:33
13	For the record, these are documents which are C-351 17:06:15	13	can also see what Mr. Boysen, who authored that 17:07:42
14	and C-352. 17:06:19	14	August 9 letter, was thinking at the time in terms 17:07:45
15		15	of the next steps. And he says: 17:07:48
	And the reason I have just included it 17:06:23	1 -2	
16	And the reason I have just included it 17:06:23 here is just to give a reminder as to what the 17:06:25	16	"While we have cautioned that 17:07:51

17 18 19 20 21 22	here is just to give a reminder as to what the 17:06:25 thinking was at the time with MOE and MNR with 17:06:27 respect to the timelines that were anticipated for 17:06:33 the setback issue to be resolved and a new 17:06:37 regulation on this. 17:06:42	16 17 18 19 20	"While we have cautioned that 17:07:51 the outcome of the EBR 17:07:52 consultation is not yet 17:07:53 concluded" 17:07:55 That's because it wasn't going to 17:07:55 conclude until mid-September; right? Correct? 17:07:57 A. Correct. 17:08:01
17 18 19 20 21 22 23	here is just to give a reminder as to what the 17:06:25 thinking was at the time with MOE and MNR with 17:06:27 respect to the timelines that were anticipated for 17:06:33 the setback issue to be resolved and a new 17:06:37 regulation on this. 17:06:42 So you can see when you look at this e-mail that 17:06:42 this involves discussions between MNR. It starts 17:06:44 with Ministry of the Environment at the bottom and 17:06:47	16 17 18 19 20 21	"While we have cautioned that 17:07:51 the outcome of the EBR 17:07:52 consultation is not yet 17:07:53 concluded" 17:07:55 That's because it wasn't going to 17:07:55 conclude until mid-September; right? 17:10:27 Q. Right. Okay. And if we can turn, 17:10:30

then, to the -- the next document. And I wanted to 17:10:37 take you to the -- through some of the various steps 17:10:43 that led up to what we call the moratorium. And 17:10:46 this document is at -- it's C-0072, for the record. 17:10:52

And this is a document that was - 17:10:58 came out in June 9, 2009, discussing the next steps 17:11:02 in the REA regulation. Do you see that? 17:11:09 A. I do. 17:11:13

Q. And if you turn to the second 17:11:13 page, you will see there is a reference here that -- 17:11:16 in the bottom-to-last paragraph, above solar energy 17:11:22 facilities, it talks about offshore wind facilities. 17:11:26 It says -- and I appreciate this is a MOE document, 17:11:29

17:11:32

"There are special rules for 17:11:32 wind facilities that include 17:11:34 turbines in contact with 17:11:36 surface water other than 17:11:36 wetlands. These facilities 17:11:38 require a REA and are 17:11:39 required to submit an 17:11:41

not MNR, but it says:

offshore wind facility report 17:11:43 as part of the application." 17:11:44

And we've gone through that, those 17:11:45 provisions. And then it says: 17:11:49 "The Ministry of the 17:11:49 Environment and the Ministry 17:11:51 of Natural Resources continue 17:11:51 to work on a coordinated 17:11:53 17:11:55 approach to offshore wind facilities which would 17:11:56 include province-wide minimum 17:11:57 separation distance standards 17:11:59 for noise." 17:12:01

And do you recall that there was 17:12:01 discussion at this time that there -- for onshore 17:12:07 wind turbines, there had been a 550-metre set for 17:12:12 noise. Do you recall that? 17:12:15

> A. I do. 17:12:16

Q. And that this was looking at what 17:12:17 the appropriate distance should be for offshore 17:12:19 turbines for noise; correct? 17:12:23

A. Yes. 17:12:39 Q. And it says: 17:12:41 "The Ministry of the 17:12:42 Environment and Ministry of 17:12:43

1 17:25:32 5 MR. NEUFELD: Sorry to interrupt. 17:25:35 6 Are you at Tab 24? 17:25:38 7 MR. TERRY: Tab 25. Sorry, did I say 17:25:40 8 Tab 24? 17:25:42 9 MR. NEUFELD: I'm just asking. 17:25:42 1.0 MR. TERRY: I'm at Tab 25. 17:25:44 11 MR. NEUFELD: Twenty-five? 17:25:45 PRESIDENT: Twenty-five? 12 17:25:48 13 MR. TERRY: Yes. 17:25:50 14 BY MR. TERRY: 17:25:50 15 Q. Oh, were you --17:25:50 16 A. I was at 24. 17:25:51 17 Q. Okay. My apologies. Yeah, Tab 17:25:52 18 25. And if you could turn to the -- you can see 17:25:54 19 there's a submission or a policy paper that's 17:25:59 20 attached to your e-mail. 17:26:03 21 MR. BISHOP: There's not in mine. 17:26:06 22 THE WITNESS: There's not in mine. 17:26:08 23 MR. TERRY: Oh, my apologies. 17:26:10 24 MR. SPELLISCY: I think that is at 17:26:10 25 Tab 24, and I would note it is a confidential 17:26:11

document. 17:26:13 MR. TERRY: Okay. Well, let's go off 17:26:14 feed, and I apologize for that. MS. NETTLETON: One moment. 17:26:17 --- Confidential transcript begins 17:26:24 BY MR. TERRY: 17:26:24 Q. Maybe I could just assist the 17:26:24 witness here. 17:26:45 17:26:49 A. It's okay. I got it. Q. This looks like it's Tab 24. So 17:26:56 in terms of this document, we're off the record, or 17:27:07 off feed now. If you could turn to page 6 of that 17:27:10

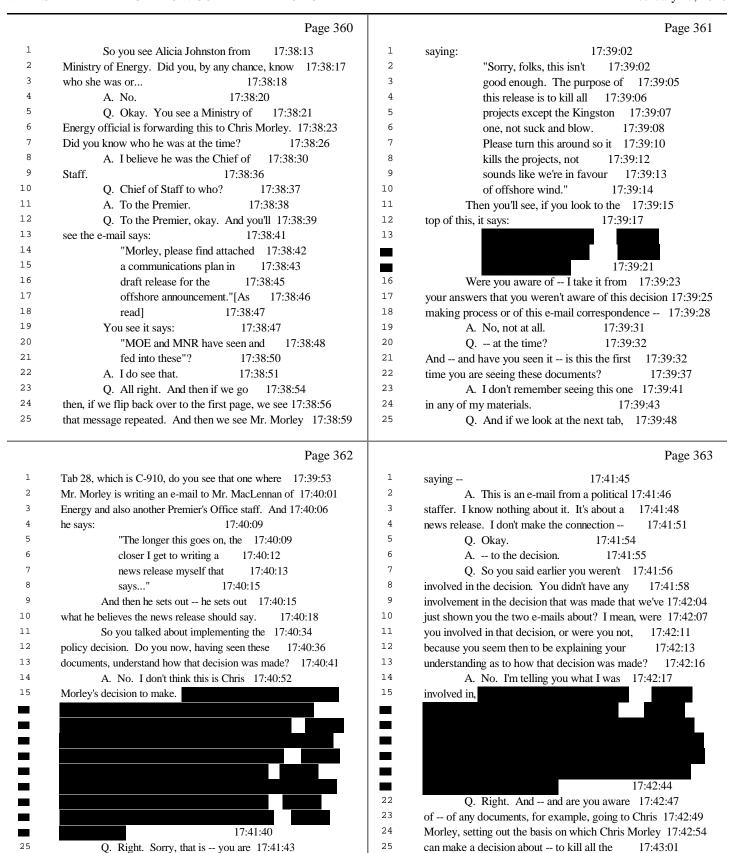

document, the policy document.

3	Q. All right. And if we can turn 17:28:09	3	it would be your Tab 25 now, at C-905. 17:29:48
4	to back to the front of this document. Here is 17:28:12	4	And here you are saying: 17:29:58
5	you received this document from Mr. Linley, and 17:28:20	5	"Copying Ken and Eric so 17:30:04
6	you are sending it to Mr. Boysen and you say: 17:28:24	6	we're all on the same page. 17:30:07
7	"Colourful language. The 17:28:28	7	Ken and Eric, I think this is 17:30:08

12	And just wondering if you I 17:28:36	12	they're leaving to MNR to do 17:30:18
13	appreciate this was some time ago, but can you 17:28:39	13	the arbitrary 5K setback. 17:30:19
14	recall why you had that reaction? 17:28:42	14	Light just went off. The 17:30:23
15	A. I do. 17:28:49	15	transmission no-go is what 17:30:25
16	Q. Okay. 17:28:50	16	takes out Lakes Huron and 17:30:26
17	A. And I think my e-mail speaks to 17:28:52	17	Superior. Nothing to do with 17:30:28
18	it. My reaction was that, having spent some number 17:28:55	18	setbacks. We're going to 17:30:30
19	of months explaining we had no science to support an 17:29:01	19	have to rely very, very 17:30:31
20	exclusion zone, it was over to us, which left us in 17:29:07	20	heavily on the Q&As to elicit 17:30:32
21	a very tricky communications position, particularly 17:29:16	21	the many policy flaws in the 17:30:34

47	A. I can't say for certain now 17:47:10		That also would have been initially commissioned 17:48:29
25	whether there wasn't another one in 2011, because in 17:47:14	25	before the moratorium? 17:48:31

	Page 368		Page 369
1	A. That's correct. And at this point 17:48:32	1	paper. Is that fair? 17:50:15
2	in time, since the moratorium, we hadn't initiated 17:48:35	2	A. That's fair. 17:50:20
3	new science.	3	Q. Yes, okay. And also you talk 17:50:21
		4	about funding research at the University of Western 17:50:23

15	that a fair reading? 17:49:29	15	indicated on behalf of Ontario that it's not 17:50:59
16	A. So I have to confess; I've never 17:49:31	16	planning to conduct any further studies with respect 17:51:02
17	read the document. But it was research on wind 17:49:34	17	to offshore wind in the in the near term to 17:51:07
18	generally. I don't think we had anything or any 17:49:40	18	address the areas that were initially set out in its 17:51:17

	Page 378		Page 379
1	react that way? I mean, you said something, but I 18:03:07	1	or technical reason for suspending offshore wind 18:05:17
2	didn't catch exactly why you were so irritated at 18:03:09	2	development back in 2006? 18:05:21
3	that point. 18:03:14	3	THE WITNESS: So the project was the 18:05:23
4	THE WITNESS: So I think my head 18:03:15	4	South Point project that we referenced previously. 18:05:31
5	exploded in anger. But after months of working with 18:03:20	5	It became very controversial in the community. A 18:05:36
6	our colleagues at MOE principally on where we were 18:03:28	6	lot of legitimate concerns raised from birds and 18:05:40
7	going to go next on offshore and after many months 18:03:32	7	bats and fisheries' habitat and commercial fishing 18:05:48
8	of telling people that we did not have a scientific 18:03:38	8	perspective, but also from the community. The 18:05:53
9	rationale to support a setback, the option chosen 18:03:48	9	Ministry had very little understanding at the time 18:05:56
10	left us with the responsibility of going out and 18:03:56	10	or had given much thought on the social and economic 18:05:59
11	implementing a setback with no evidence to bring to 18:04:01	11	benefits and impacts of wind. And the Minister took 18:06:04
12	bear on the conversation. It was an awkward 18:04:07	12	the decision to pause and enable the Ministry to 18:06:08
13	position for our Ministry to be in and quite 18:04:14	13	gather more information and knowledge about offshore 18:06:12
14	inconsistent with what we had said all along is our 18:04:18	14	wind. 18:06:17
15	approach is to start with the best information you 18:04:22	15	PRESIDENT: And which Ministry took 18:06:17
16	have and work with the proponent on the site and 18:04:26	16	the decision to suspend at that point in time? 18:06:19
17	iterate it that way. 18:04:32	17	THE WITNESS: That is the purview and 18:06:21
18	DR. CREMADES: Thank you. That's it. 18:04:37	18	discretion of the Ministry of Natural Resources. So 18:06:26
19	PRESIDENT: Thank you. 18:04:40	19	the MNR Minister of the day would have made that 18:06:30
20	Perhaps just one additional question. It goes to 18:04:41	20	decision, based on a MNR world. 18:06:33
21	the 2006 moratorium or suspension of offshore wind. 18:04:57	21	PRESIDENT: I understood MNR was 18:06:42
22	What was the reason for it? There was a reference 18:05:06	22	dealing more with the site issue. So this was seen 18:06:44
23	to a particular site. You mentioned it's in the 18:05:09	23	
24		24	mainly as a site issue back in 2006? 18:06:49 THE WITNESS: It was. 18:06:53

5	you became the Minister of the Environment. 18:20:53	5	CROSS-EXAMINATION BY MR. TERRY: 18:21:58
6	A. Well, I served at the Ontario 18:20:55	6	Q. Good evening, Mr. Wilkinson. 18:22:07
7	Legislature from 2003 to 2011, two terms. My first 18:20:56	7	A. Good evening. 18:22:09
8	term, I served as the MPP for the riding of 18:21:01	8	Q. Sorry to have kept you here so 18:22:10
9	Perth-Middlesex. I was subsequently re-elected to 18:21:04	9	long. As you might expect and we're trying to 18:22:12

11	redistribution. 18:21:10	11	day, but we're most interested in asking you about 18:22:24
12	In my first term of note, perhaps 18:21:11	12	the part of your witness statement where you say 18:22:29
13	today, is that I served as the parliamentary 18:21:15	13	that the Premier's Office did not make or influence 18:22:31
14	assistant to the Minister of the Environment here in 18:21:16	14	the deferral decision. All right? And you have 18:22:34
15	the Province of Ontario. I subsequently served as 18:21:19	15	been very emphatic that you made the decision as 18:22:37
16	the parliamentary assistant to the Minister of 18:21:22	16	Minister of the Environment and that you did not 18:22:41
17	Research and Innovation, who was the Premier of 18:21:25	17	discuss the issue of offshore wind development with 18:22:44
18	Ontario, the Honourable Dalton McGuinty. 18:21:28	18	the Premier or seek his counsel before you made the 18:22:46
19	In 2007, I was re-elected. I was 18:21:30	19	deferral decision, and: 18:22:49
20	called to executive council to serve as a Cabinet 18:21:32	20	"He did not attempt to 18:22:50
21	Minister. I was sworn in initially to be the 18:21:35	21	influence my decision in any 18:22:52
22	Minister of Research and Innovation. I then 18:21:37	22	way, nor do I recall having 18:22:53
23	subsequently was asked to become the Minister of 18:21:40	23	any personal communication 18:22:55
24	Revenue, and then I was subsequently appointed to be 18:21:42	24	from the Premier's Office 18:22:56
25	the Minister of the Environment. 18:21:47	25	about the issue. However, 18:22:57

2	briefed, and it was certainly 18:23:00	2	my old profession was very proud of me, and I 18:23:59
3	aware that offshore wind 18:23:01	3	started a firm. 18:24:01
4	development was a difficult 18:23:02	4	Q. Congratulations. 18:24:02
5	file politically." 18:23:03	5	A. So I was in business for 20 years 18:24:03
6	And that, as you say, you're not 18:23:04	6	before I I ended up serving in an elected 18:24:05
7	making any corrections, that is your evidence here 18:23:06	7	capacity. 18:24:07
8	today? 18:23:08	8	Q. All right. Now, the events we're 18:24:08
9	A. Yes. I went on, of course, in my 18:23:09	9	discussing occurred some five years ago. And, 18:24:10
10	statement to say that all the decisions that would 18:23:11	10	listen, I appreciate that five years is a long time, 18:24:15
11	be made by the Minister of the Environment, in my 18:23:13	11	and it's difficult to remember particular dates and 18:24:18
12	opinion, were political, because you had to make 18:23:16	12	events that occurred five years ago, particularly if 18:24:21
13	decisions, and some people would be happy, and some 18:23:19	13	you have a number of Ministerial responsibilities. 18:24:26
14	people would be unhappy. That's just the nature of 18:23:21	14	A. Yes. I can tell you that when 18:24:29
15	government. 18:23:23	15	that I distinctly remember every decision that I 18:24:33
16	Q. Okay. Now, you just to 18:23:24	16	made as the Minister that was controversial and 18:24:37
17	confirm, currently you run a firm called "Wilkinson 18:23:31	17	historic. I made a number of them during my tenure, 18:24:42
18	Insight Incorporated"? 18:23:36	18	which Ministers of the Environment have to do, and I 18:24:44
19	A. Yes. That's my personal 18:23:37	19	remember this one distinctly, and I remember exactly 18:24:47
20	corporation. As well, as I serve on eight different 18:23:40	20	what happened. 18:24:49
21	boards, four charities and four corporations. 18:23:43	21	Q. And you in your witness 18:24:51
22	Q. All right. And prior to being 18:23:46	22	statement, you have referred to various documents 18:24:57
23	elected to office, you were a financial planner? 18:23:48	23	and footnotes. I understand I take it you 18:24:59
24	A. Yes. I believe I was the first 18:23:51	24	reviewed all of those documents before you prepared 18:25:03
25	certified financial planner ever elected I know 18:23:53	25	your witness statement? 18:25:05

A. Yes. The -- I was given a flash 18:25:07 drive, and I don't know how many thousands of pages 18:25:10 were on that, but I did make sure that I reviewed 18:25:14 the things that had to do with my decision, not the 18:25:17 things that other people did. I'm somewhat aware of 18:25:22 it, but I didn't read all 15,000 pages, if that's 18:25:25 your question, Mr. Terry. Q. So you -- you were working alone 18:25:30

in deciding what you wanted to -- what you needed to 18:25:32 review to provide this witness statement?

A. No. Just so we're very clear, I 18:25:39 was approached by lawyers of the Government of 18:25:41 Canada who asked me a question. I remember they got 18:25:43 a hold of me in Shanghai, and they called me. It 18:25:46 was three o'clock in the morning. So I picked up 18:25:48 the phone, and they started explaining to me how 18:25:51 they were wondering if they could ask me a few 18:25:53 questions and asked me could we do this -- they 18:25:56 didn't know I was in Shanghai. 18:25:58

And we subsequently arranged a call. 18:26:00 I said I'd be back next week, and they said they 18:26:02 needed to talk to me right away. And we arranged -- 18:26:05 I think it was ten o'clock at night my time, ten 18:26:07 o'clock in the morning their time -- to have a discussion whether or not I recalled the decision 18:26:12

Page 389

Page 391

that I made. They asked the question. "Did you make 18:26:15 the decision?" I said, "Yes, I did." 18:26:17 "Did I recall it?" I said yes, and I explained it 18:26:19 to them, and they said, "Would you provide a witness 18:26:23 statement?" And I was happy to. Now, subsequently just to finish your 18:26:28

question, I have then been given, by the Government 18:26:31 of Canada, flash drives with voluminous documents on 18:26:34 them. 18:26:40

Q. And were you given additional 18:26:42 documents after you prepared your witness statement? 18:26:44

A. The -- yes. I was asked for my 18:26:50 statement first. What did I recall? And that's 18:26:54 exactly what I provided. And I haven't changed my 18:26:58 opinion about my statement that I gave. 18:27:01

Q. Okay. And I take it, sir, that, 18:27:04 when I look at your witness statement, that you -- 18:27:09 obviously you remember intensely the question of 18:27:17 whether the Windstream project should go ahead as a 18:27:20 18:27:23 pilot or not?

A. Well, first of all, I would have 18:27:24 some hesitation about answering that, for one reason. The decision I made at the time had nothing 18:27:31 to do with Windstream. It had to do with what was 18:27:35 going to be the regulatory framework for offshore 18:27:38

Page 390

projects anywhere in the Great Lakes. The consequence of that decision was 18:27:43 that it affected, I think, three companies, if I 18:27:45 recall. Windstream was one of them. And I was. 18:27:48 subsequently -- of course, this became an issue, but 18:27:53 it didn't change my decision. My decision wasn't 18:27:56 about Windstream. My decision was about draft regulations that were out for consultation by my 18:28:05 18:28:09 Ministry.

Q. Okay. Let's look at the 18:28:15 documents. 18:28:16

> A. Sure. 18:28:17

Q. If you could turn, first of all, 18:28:17 to Tab 1 of the book in front of you. That's R-208. 18:28:19 And what I want to do is focus really in on the 18:28:23 documents where I see --18:28:29

MR. SPELLISCY: I think this has 18:28:33 confidential information in it. 18:28:34

MR. TERRY: My apologies. Oh, yes. 18:28:36 I should have said. Let's be off feed for this whole cross-examination. It will be much more 18:28:40 efficient, because we will be touching on a number 18:28:42 of documents that are confidential. 18:28:43

THE WITNESS: I don't know what that 18:28:44

18:28:44

1 means, but I am in your hands, Mr. Terry. 18:28:49 2 PRESIDENT: What it means is there's 18:28:51 3

a public viewing. This is a public hearing. 18:28:52 THE WITNESS: Confidential. 18:28:54

PRESIDENT: Confidential information 18:28:55

will not be disclosed. 18:28:56 THE WITNESS: Sure, thank you. So go 18:28:57

back to Tab 1. 18:28:59 BY MR. TERRY: 18:29:00

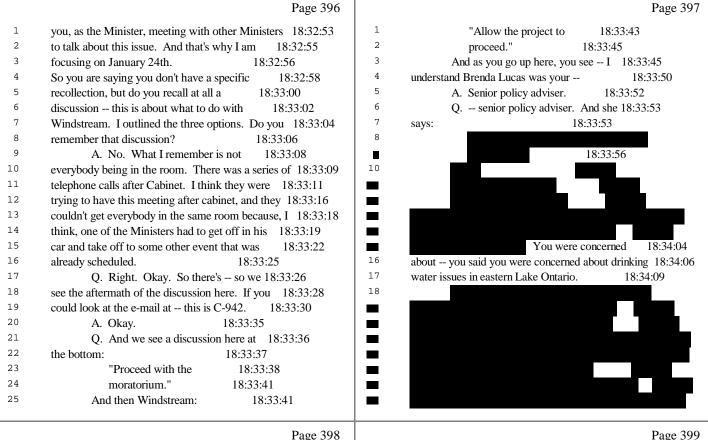

Q. So, Minister -- former Minister 18:29:00 Wilkinson, Mr. Wilkinson, if you look at Tab 1.

18:29:06

Q. And I am going to have to take you 18:29:06 through a number of e-mails here and just -- and if 18:29:08 you look at the bottom of this e-mail --18:29:12

A. Mm-hmm. 18:29:14

Anyway, a meeting was set 18:32:03 up? 18:32:05 A. Yes. 18:32:05 Q. And it was attended. Do you have 18:32:06 a recollection of that meeting? 18:32:10 A. No, Mr. Terry. I there was a 18:32:13 conversation. I don't actually remember us all 18:32:15 getting in the room. 18:32:17 Q. Right. 18:32:18 A. There was a there was a need. 18:32:18 Because the decision that I had made was a change 18:32:22 for the path that the government was on, it was 18:32:25 important, before it became announced, that 18:32:27 everybody in the government knew where we were 18:32:30 going, and so it was a matter of getting people 18:32:32 coordinated. 1 science. 18:34:34 2 I subsequently went with my Deputy 3 Minister, who, when I asked her direct questions, 18:34:36 4 raised within me some very serious concerns about 18:34:42 5 whether or not the precautionary principle, which is 18:34:45 6 another fundamental part of environmental law, was 18:34:47 7 18:34:51 being upheld. 8 And when I was faced with that, from my senior 18:34:52 9 policy adviser, 18:34:55 10 science and that, for my Deputy Minister, the chief 18:34:58 11 person, that she could not answer basic questions 18:35:00 12 about the consequence of the construction in regard 18:35:02 13 to -- in regard to drinking water, because of course 18:35:05 14 the Great Lakes are a source of drinking water for 18:35:08 15 millions of people, and we were talking about a set 18:35:10 16 of regulations for the entire Great Lakes, not for 18:35:13 17 any particular place, but trying to get the 18 regulations right for what we were trying to do. 18:35:18 19 And because those questions weren't answered, I 18:35:20 20 felt, and it was -- I was the only guy that could 18:35:23 21 make that decision under the law. I felt that we 18:35:26 22 should not proceed on a path that I thought was -- 18:35:28 23 was flawed. 24 Q. And then that's why -- and this is 18:35:32 25 a question I had asked you about, why you had the 18:35:36

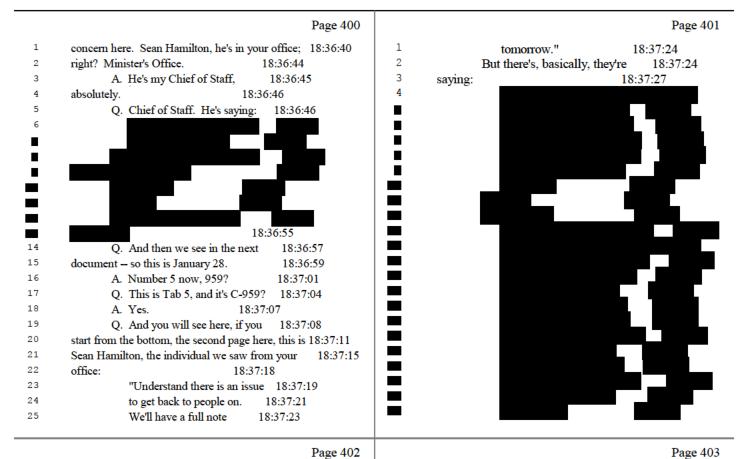

reservations there. That's why you had those 18:35:39 reservations. Is that fair to say? In your 18:35:41 meetings with those Ministers, that's the type of 18:35:43 sentiment you were expressing? 18:35:45

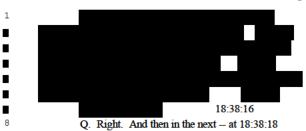

A. Well, yes. I think the Ministry 18:35:46 of Energy, which had granted a FIT contract, right, 18:35:48 wanted to know whether or not that project could go 18:35:52 18:35:55 ahead as a pilot.

> Q. Right. 18:35:56 A. And I said, no, that 18:36:02

Q. Right. And that's what we see in 18:36:04 this debate. I am focusing again, sir, on the documents. You know, you talk about discussions, 18:36:09 briefings, discussions with the Deputy Minister. We 18:36:11 don't, in the documents, see those records. I'm 18:36:14 focusing on the records that show you and your staff 18:36:16 involved in making these decisions. All right? And 18:36:21 so that's why I am focusing you on this record - 18:36:24 A. Sure. 18:36:26

Q. -- in January 24. Okay? Now, if 18:36:27 we move -- so we've got your reservations as to 18:36:29 what's being decided here. Then we move to the next 18:36:33 document, which is R-555. And, again, we see a

C-986, we see a discussion, which I understand
18:38:22
reflects — and there is some colourful language
18:38:27
here which we don't need to get into, but I
18:38:30
understand it reflects a caucus discussion where
18:38:33
there is a discussion about the decision, the
18:38:36
moratorium and the pilot, and there were strong
18:38:40
words among your colleagues.
18:38:43

A. Well, I said decisions made by the 18:38:45

Minister of Environment make some people happy and 18:38:47

some people unhappy. 18:38:50

Q. Yes. 18:38:51

A. The question is: Do you make your 18:38:51 decisions based on the principles that you are swom 18:38:53 to uphold? That's the question. And what staff 18:38:55

Q. You say in terms of describing the 18:39:07 things that influence your decision here, if we go 18:39:09

to your witness statement, paragraph 10 - 18:39:11

A. Okay. So I can go to this - 18:39:14

Q. Yeah. That's the red book in 18:39:14

front of you. 18:39:17

A. Great. And they're numbered? 18:39:18

Q. Paragraph 10? 18:39:20

A. Oh, yes, great. Got it. 18:39:20

Q. You say that – you say you were 18:39:22 briefed on many environmental concerns, and, sir, I 18:39:26 just want you to agree with me here. I don't want a 18:39:28 long elaboration. 18:39:31

"The issue that heavily influenced my decision was the effect the construction of an offshore wind facility might have on drinking water." 18:39:38

Then you say: 18:39:31

18:39:31

18:39:35

18:39:35

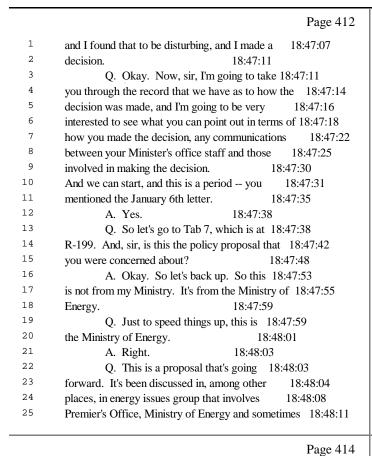

18:39:38

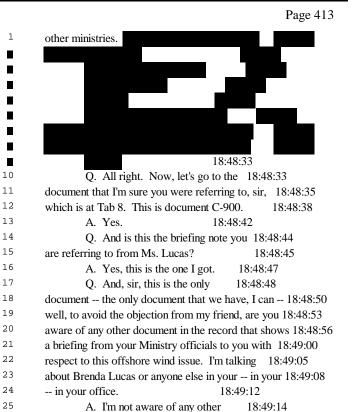

"The construction of turbine towers for the WWIS project would stir up the lake bed at over 100 sites in Lake 18:39:43

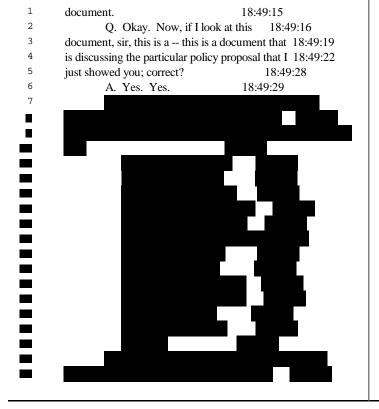

Ontario. I was concerned 18:39:44 with how this might effect sediment. And when I asked 18:39:49

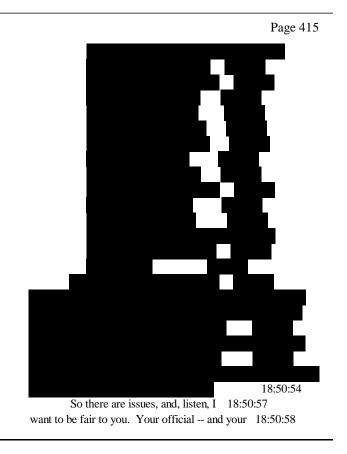

Page 404		Page 405
my Ministry officials about 18:39:50	1	paragraph 11, Mr. Terry, that particularly we had no 18:40:30
it" 18:39:51	2	data on the impacts of large-scale offshore 18:40:36
So presumably there you are talking 18:39:51	3	construction in the Great Lakes, which was a concern 18:40:39
	4	for Lake Ontario, but also for Lakes Erie and Huron. 18:40:40
	5	I wasn't asked to have a set of rules for Lake 18:40:43
	6	Ontario or for the eastern basin of Lake Ontario. 18:40:45
	7	The Ministry was developing rules for all of the 18:40:49
whether or not we were applying the precautionary 18:40:06	8	Great Lakes, and I was particularly concerned that, 18:40:51
principle. 18:40:07	9	if I had a process, that it had to be applied based 18:40:53
Q. Well, sir, just go up a little bit 18:40:09	10	on science and the precautionary principle for all 18:40:57
in your witness statement. You are talking about: 18:40:11	11	the Great Lakes. That was what was in front of me. 18:41:00
"The construction of turbine 18:40:12	12	Yes, I know that Windstream had a FIT 18:41:03
towers for the WWIS project 18:40:14	13	contract, and that would be a consequence to my 18:41:07
would stir up the lake bed at 18:40:16	14	decision. But and I but what was important to 18:41:10
over 100 sites in Lake 18:40:17	15	me was I had been told by my Ministry that we had 18:41:14
Ontario. I was concerned 18:40:19	16	regulations out there for consultation where it was 18:41:18
about how this might displace 18:40:19	17	insufficient scientific evidence, because this had 18:41:21
the historically contaminated 18:40:21	18	never been done before at that scale anywhere in the 18:41:23
sediment, et cetera. When 18:40:22	19	world. That it was a source of drinking water. And 18:41:25
asked about it, Ministry 18:40:24	20	when I asked my Deputy, "How do we know that these 18:41:29
officials couldn't assure 18:40:25	21	consequences won't happen?" She said, "Well, we 18:41:33
me." 18:40:26	22	don't." And I found that very, very disturbing, 18:41:34
You are talking about the Windstream 18:40:26	23	which is why I took the action I took. 18:41:38
project there, aren't you, clearly? 18:40:28	24	Q. And I'm not disagreeing with you 18:41:40
A. No. Because I also testified in 18:40:29	25	your statements as to what you recollect about being 18:41:41
Page 406		Page 407
concerned about drinking water, sir. I'm simply 18:41:44	1	that Windstream expressed 18:42:23
	2	interest in doing a pilot, 18:42:24
	3	but that its idea of a pilot 18:42:26
- ·	4	was to move forward with 18:42:27
A. Yes. 18:41:54	5	their original project plan 18:42:28
Q you say: 18:41:55	6	or project of that size was 18:42:29
"I was made aware that only 18:41:57	7	not acceptable to proceed as 18:42:32
one freshwater offshore wind 18:41:59	8	a pilot." 18:42:33
project existed anywhere in 18:42:01	9	And listen, as I say, I'm not 18:42:34
the world." 18:42:02	10	disagreeing what you are saying about the concerns 18:42:36
A. Yes, that's what I was told. 18:42:02	11	that you might have in approving the pilot and their 18:42:37
Q. (Reading): 18:42:03	12	effects on the Great Lakes. I'm just trying to help 18:42:39
"In contrast to the massive 18:42:03	13	you recollect that this was occurring as a result of 18:42:42
project proposed for Wolfe 18:42:05	14	your discussion about Windstream going ahead as a 18:42:47
Island Shoals, the project 18:42:05	15	pilot. 18:42:49
was a small-scale facility. 18:42:08	16	A. Mr. Terry, I want to be very, very 18:42:50
The development and 18:42:09	17	clear. You are talking about me having some say 18:42:52
construction of a pilot scale 18:42:10	18	about the regulatory approval of a pilot. The 18:42:57
project was simply 18:42:11	19	regulations themselves were still not finished. 18:43:00
insufficient to extrapolate 18:42:12	20	That was in front of my Ministry. The feedback that 18:43:03
answers to basic questions I 18:42:14	21	I got from my senior adviser and my Deputy Minister 18:43:07
	22	raised concerns with me about that regulatory 18:43:11
had." 18:42:16		
And then if we if continue on to 18:42:17	23	process. I agree it affected Windstream. But the 18:43:14
	23 24	
_	my Ministry officials about 18:39:50 it —" 18:39:51 So presumably there you are talking 18:39:51 about the Windstream project; right? 18:39:53 A. The Deputy, yes. No, no. This is 18:39:54 my recollection of having my meeting with the Deputy 18:39:58 Minister and asking her specific questions about 18:40:01 whether or not we were applying the precautionary 18:40:06 principle. 18:40:07 Q. Well, sir, just go up a little bit 18:40:09 in your witness statement. You are talking about: 18:40:11 "The construction of turbine 18:40:12 towers for the WWIS project 18:40:14 would stir up the lake bed at 18:40:16 over 100 sites in Lake 18:40:17 Ontario. I was concerned 18:40:19 about how this might displace 18:40:19 the historically contaminated 18:40:21 sediment, et cetera. When 18:40:22 asked about it, Ministry 18:40:24 officials couldn't assure 18:40:25 me." 18:40:26 You are talking about the Windstream 18:40:26 project there, aren't you, clearly? 18:40:28 A. No. Because I also testified in 18:40:29 Page 406 concerned about drinking water, sir. I'm simply 18:41:44 trying to remind you with the documents as to when 18:41:50 example, at paragraph 13 — 18:41:53 A. Yes. 18:41:55 "I was made aware that only 18:41:55 "I was made aware that only 18:41:59 project existed anywhere in 18:42:01 the world." 18:42:02 A. Yes, that's what I was told. 18:42:01 the world." 18:42:05 Island Shoals, the project 18:42:05 was a small-scale facility. 18:42:05 Island Shoals, the project 18:42:05 Island Shoals, the project 18:42:05 In contract to the massive 18:42:06 project was simply 18:42:11 insufficient to extrapolate 18:42:10	my Ministry officials about 18:39:50 it —" 18:39:51 So presumably there you are talking 18:39:51 about the Windstream project; right? 18:39:53 A. The Deputy, yes. No, no. This is 18:39:54 my recollection of having my meeting with the Deputy 18:39:58 Minister and asking her specific questions about 18:40:01 whether or not we were applying the precautionary 18:40:06 principle. 18:40:07 Q. Well, sir, just go up a little bit 18:40:09 in your witness statement. You are talking about: 18:40:11 "The construction of turbine 18:40:12 towers for the WWIS project 18:40:14 would stir up the lake bed at 18:40:16 over 100 sites in Lake 18:40:17 Ontario. I was concerned 18:40:19 about how this might displace 18:40:19 the historically contaminated 18:40:21 asked about it, Ministry 18:40:24 officials couldn't assure 18:40:25 me." 18:40:26 You are talking about the Windstream 18:40:26 project there, aren't you, clearly? 18:40:28 A. No. Because I also testified in 18:40:29 Page 406 concerned about drinking water, sir. I'm simply 18:41:44 trying to remind you with the documents as to when 18:41:47 this was taking place. And, sir, if you look, for 18:41:50 example, at paragraph 13 — 18:41:53 A. Yes. 18:41:54 Q. — you say: 18:41:55 "I'was made aware that only 18:41:57 one freshwater offshore wind 18:42:01 project existed anywhere in 18:42:01 Q. (Reading): 18:42:02 A. Yes, that's what I was told. 18:42:01 project existed anywhere in 18:42:05 is lahad Shoals, the project 18:42:05 was a small-scale facility. 18:42:05 is lahad Shoals, the project 18:42:05 was a small-scale facility. 18:42:08 The development and 18:42:10 insufficient to extrapolate 18:42:11 insufficient to extrapolate 18:42:12

2	Q. And, sir, maybe you are 18:43:24	2	recollect is it fair to say that these 18:44:25
3	misunderstanding me. I'm not saying you were 18:43:25	3	discussions occurred during that time period? 18:44:27
4	negotiating a pilot. I'm just saying your 18:43:28	4	A. It is fair to say that discussions 18:44:29
5	recollection of these discussions was in the latter 18:43:30	5	happened. It is also fair to say that the decision 18:44:32
6	part of January, when you were having these very 18:43:32	6	was made by me, about two weeks before that. All 18:44:35
7	heated discussions with your colleagues about 18:43:34	7	the government was doing and what these people were 18:44:39
8	whether to allow Windstream to go ahead as a pilot 18:43:36	8	doing was trying to figure out the consequence of 18:44:42
9	or whether to keep it whole. Isn't that that's 18:43:38	9	the decision made by the Minister of the 18:44:43
10	what I'm that's what I'm getting at. 18:43:41	10	Environment, who would not change his mind. 18:44:44
11	A. The question is my position was 18:43:43	11	Q. Okay. Well, let's go to that 18:44:47
12	that the only way to move forward was based on 18:43:44	12	decision, then. Before that, are there you said 18:44:49
13	science. So obviously, as long as you are taking 18:43:47	13	you reviewed, you know, 1,500 documents or whatever 18:44:52
14	into account the precautionary principle, you would 18:43:49	14	it was. Did you ever find 18:44:56
15	have to allow research and pilots 18:43:50	15	A. I didn't say that, Mr. Terry. 18:44:56
16	Q. But, sir, sir and I apologize 18:43:54	16	What I said is, I was given them, and that I did not 18:44:58
17	to interrupt. My question is is not, you know, 18:43:55	17	go and read 15,000 pages of documents. 18:45:01
18	what was in your concerns there. It's just a timing 18:44:00	18	Q. Listen, I can assure you that, for 18:45:04
19	question. 18:44:04	19	better or worse, we've read these documents, and I'm 18:45:06
20	I mean, do you agree with me that 18:44:04	20	sorry and, sir, I don't see any documents that 18:45:08
21	these were issues that were being discussed by you 18:44:05	21	show your discussions with your Deputy Minister. 18:45:11
22	in late January. I took you to the meeting at 18:44:08	22	MR. SPELLISCY: Is that testimony, or is that a 18:45:13
23	January 24. I took you through the process there, 18:44:11	23	question? 18:45:17
24	January 28, where the decision appears to have been 18:44:13	24	MR. TERRY: That's a question. 18:45:17
25	accepted because you didn't want to have the pilot. 18:44:19	25	MR. SPELLISCY: Okay. 18:45:18
	Page 410		Page 411

2	Q. Is the witness are you aware of 18:45:19		
3	any documents that show this discussion you are 18:45:21		18:46:25
4	referring to with your Deputy Minister? 18:45:23	4	And so that was a very, very big red 18:46:29
5	A. No. I'm not aware of any 18:45:27	5	flag for me, Mr. Terry. 18:46:32
6	documents. I haven't seen any. But I met with my 18:45:29	6	Q. Okay. 18:46:33
7	Deputy. I remember distinctly why I met with my 18:45:32	7	A. And what I did, just so we're 18:46:33
8	Deputy, what the meeting was about, why I called the 18:45:35	8	clear, is that I went to my Chief of Staff and said, 18:46:34
9	meeting, and what was the consequence of that 18:45:37	9	"I need to speak to my Deputy Minister." Something 18:46:37
10	meeting. 18:45:39	10	I didn't do very often, but I thought it was very 18:46:39
11	Q. And do you do you have any 18:45:39	11	important, given the consequence, sir, or the 18:46:40
12	documents you talked about also briefings with 18:45:42	12	or red flag that I saw from Mrs. Lucas, that I 18:46:42
13	your staff with respect to drinking water issues. 18:45:45	13	needed to talk to my deputy, who I had a great deal 18:46:42
14	Do you have any documents, or are you aware of any 18:45:47	14	of confidence in, a scientist and come from Ministry 18:46:45
15	documents, sir, that show that you were being 18:45:50	15	of Natural Resources. 18:46:45
16	briefed by your staff on drinking water related 18:45:53	16	18:46:47
17	issues? 18:45:56	17	18:46:49
18	A. Well, what I'm 18:45:57	18	18:46:51
19	Q. I'm simply asking about documents, 18:45:58	19	18:46:52
20	sir. 18:46:01	20	18:46:55
21	A. Okay. I received a briefing memo 18:46:01	21	18:46:55
22	from my senior policy adviser around January 6 that 18:46:04	22	And I had her in and at my side of the Ministry, 18:46:55
23	went into my daily book that I had to read that told 18:46:08	23	and I asked her a number of questions, and we went 18:47:00
24	me that there were discussions going on about 18:46:13	24	over them, and there was one set of questions around 18:47:02
25	18:46:18	25	drinking water, to which she said they did not know, 18:47:05

A. Yes. She was on this file.

Page 416 Minister's Office is identifying these concerns. 18:51:03 Now, she indicated, as you saw, that 18:51:06 she is going to discuss this -- make sure the 18:51:11 Ministry is fully engaged. And when she says that 18:51:14 -- this is going back to the first page. 18:51:16 A. Mm-hmm. 18:51:18 Q. She wants to make sure the 18:51:19 Ministry is fully engaged. If you turn to the next 18:51:21 tab, that's Tab 9, C-903, you see that this is a - 18:51:24 this is a comment -- this is Marcia Wallace. Do you 18:51:29 recall who she was? 18:51:32 A. Yes. She works for the Ministry. 18:51:33 Q. Right. And do you recall her 18:51:35 role? 18:51:37 A. Well, I know Doris was Renewable 18:51:38 Energy Approval, Doris Dumais, Marcia was with her. 18:51:40 Q. Right. 18:51:44 A. I can't remember who was on top, 18:51:44 but they were together. 18:51:45 Q. And she was essentially developing 18:51:46 policy for the Ministry on offshore wind. Do you 18:51:48

So these are the comments that -- that 18:53:20

Ms. Wallace makes on this proposal. I don't know if 18:53:22

you have seen these before.

18:53:26

Page 419 A. Okay. 18:53:28 MR. SPELLISCY: Since we moved very 18:53:28 quickly between documents and I don't think counsel 18:53:30 actually introduced this document, it might be 18:53:32 useful to note what this document is and who the 18:53:34 comments are and what time it is for the record. 18:53:36 THE WITNESS: Yeah. 18:53:41 MR. TERRY: This is January 5. 18:53:42 MR. SPELLISCY: 6th. 18:53:45 BY MR. TERRY: 18:53:46 Q. Sorry, 6th. 18:53:47 A. In the morning. 18:53:48 Q. Yes. This is January -- this is 18:53:50 January 6, in the morning. I have no issue with 18:53:51 that. But these are the comments -- again, I'm working with what we have in the record. These are 18:53:57 the only comments we have from the Ministry official 18:54:00 commenting on this proposal. 18.54.03 A. And I would have seen -- just for 18:54:05 clarity, on the January 6 memo, I would have seen it 18:54:06 that evening, not that morning. It would have gone 18:54:10 into my book that I get every day, signed off by my 18:54:12 Chief of Staff, the things that I needed to read 18:54:14

18:54:17

Q. Okay. Now, if we turn, then, to 18:54:17

22	you see that, if you look at the second paragraph? 18:55:10	22	
23	A. Okay. Sorry, can you just run 18:55:13		
24	that by me again? 18:55:15		18:55:53
25	Q. Look at the news release, please, 18:55:16	25	Now, continuing through the chronology 18:56:00

because I want to finish this chronology --18:56:01 MR. SPELLISCY: I really hate to 18:56:04 interrupt, and I apologize for this. I just have 18:56:06 one question. I'm not sure if it was a mistake. 18:56:08 The record says about "this document." I think the 18:56:10 question was, I assume it was produced to -- I 18:56:13 assume it was produced to us late, but I assume it 18:56:16 was shared by you with counsel. 18:56:19 MR. TERRY: It should -- if I 18:56:21 misspoke, I'm not sure if it was me or the 18:56:22

recording. 18:56:24 MR. SPELLISCY: The other way around? 18:56:24 MR. TERRY: It was shared with 18:56:24

Canada's counsel.

MR. SPELLISCY: Shared with counsel, 18:56:27 18:56:28

with you, by counsel. 17 MR. TERRY: Yes. 18:56:29

> MR. SPELLISCY: Yes. 18:56:30

Mr. Morley has waded in because the Minister of the 18:56:32

Environment for the Province of Ontario had decided 18:56:34

that what was going to happen was not going to

23 happen, and so the Premier's Office was backing up 18:56:40

THE WITNESS: And I believe

24 the Minister of the Environment. 18:56:43

BY MR. TERRY: 18:56:44 Q. All right. And I'll get back to 18:56:44

1 2 you on that, sir. I just want to continue with the 18:56:46 3 documents that we have. 18:56:49 4 If we move then to Tab 12, which is Document 915, 18:56:49 5 just to see this sequence through, we see here there 18:56:58 6 is an agenda. This is January 12, 12:42 p m., an 18:57:01 7 agenda for an energy issues meeting, an upcoming 18:57:09 8 energy issues meeting. 18:57:12 9

Do you have any idea, by the way, what 18:57:14 the energy issues meeting was? I don't -- I'm not 18:57:15 faulting you if you don't, but... 18:57:19

A. I knew at all times that any issue 18:57:21 would be dealt with by what we referred to as "four 18:57:24 corners"; that when you had ministries that -- where 18:57:27 they weren't on the same page, it was very important 18:57:31 to get them on the same page, so they were called 18:57:33 four-corner meetings because you could have up to 18:57:35 four ministries, I suppose, showing up, and they 18:57:38 would try to resolve that. That was something that 18:57:40 the staff would do. Those of us elected who had to 18:57:43 make the decision made the decisions. They had to 18:57:46 figure out how to implement it and communicate. So I'm not surprised, given the fact the Ministry of 18:57:50 Energy had, for example, promoted this policy and 18:57:53 had actually granted a FIT contract to one of the 18:57:56

8	What I see is an Energy issues meeting 19:04:50	8	A. I would be more than happy. First 19:06:02
9	that the Ministry of Environment wasn't even, to the 19:04:56	9	of all, you just showed me a document. This is 19:06:03
10	best of our knowledge, looking at the record, 19:05:00	10	January 14. And you are talking about a document 19:06:06
11	invited to. And then I see energy informing other 19:05:02	11	that said there were discussions amongst the 19:06:08
12	officials, including at the Environment, the results 19:05:07	12	Ministers on January 24. This is 10 days before 19:06:10
13	of that meeting and that meeting is you know, 19:05:09	13	that, sir. Like, that's is what you are putting in 19:06:12
14	this particular agenda item is led by Mr. Morley. 19:05:11	14	front of me, so I can read. 19:06:16
15	That's what I see from the documents. 19:05:15	15	What I see is the Premier's Chief of 19:06:18
16	Now, please, tell me what your 19:05:17	16	Staff telling everybody else, the Minister of the 19:06:19
17	recollection is of these events, because my, my 19:05:21	17	Environment who has the requirement, has the sole 19:06:21
18	again, working from the documents, I would have 19:05:24	18	authority in the government to make this decision, 19:06:30
19	thought that what you are recollecting is the later 19:05:28	19	has made a decision, and we're going with his 19:06:32
20	decision as to whether or not Windstream should go 19:05:32	20	decision. And he's telling everybody who doesn't 19:06:35
21	ahead, whether the pilot should go ahead, the one 19:05:34	21	like the decision, particularly at Energy, get on 19:06:38
22	where you are really knocking heads with your fellow 19:05:36	22	the page. 19:06:41
23	Ministers and that, in fact, you weren't involved in 19:05:38	23	We are not going to go back, override the Minister. 19:06:42
24	this earlier decision by Mr. Morley to choose the 19:05:41	24	He's not going to change his mind. He thinks that 19:06:46
25	deferral to allow the Kingston one. 19:05:46	25	the process we're down for regulating offshore wind 19:06:50
	Page 434		Page 435
1	is flawed. It's flawed because there is a lack of 19:06:53	1	deferral decision. I've shown you what I see in 19:07:49
2	science. It's flawed because it doesn't take into 19:06:55	2	terms of the Premier's Office making the decision. 19:07:54
3	account the precautionary principle. 19:06:58	3	Can you show me any documentary support for you 19:07:56
4	And so what Mr. Morley was doing 19:06:59	4	being the one who you say you said you made the 19:08:00
5	and I wasn't part of this. I'm not part of the 19:07:00	5	decision. 19:08:02
6	Ministry. The message is going out from the top, 19:07:02	6	I do see documentary support for your role in the 19:08:02
7	Shelly, Cabinet secretary, Premier's Chief of Staff, 19:07:06	7	pilot project. I don't see it for the first 19:08:05
8	their Minister, their Deputy Minister, saying. 19:07:10	8	decision. 19:08:07
9	"The policy is changing. So 19:07:12	9	A. Well, what I have is my word, sir. 19:08:08
10	all this rear-guard action to 19:07:14	10	That is what I have, and that is what I've 19:08:10
11	try to bump Minister 19:07:16	11	testified. I told my Chief of Staff to express to 19:08:11
12	Wilkinson off his position is 19:07:19	12	the Premier's office that I had made the decision. 19:08:14
13	not going to happen. We are 19:07:20	13	He did that. If he hadn't have done that, none of 19:08:18
14	changing policy." 19:07:21	14	this would have happened. The reason everybody is 19:08:20
15	I know that was difficult for the 19:07:22	15	dealing with this is because I made a decision. 19:08:23
16	Ministry of Energy. I understand that. But I had 19:07:24	16	Q. So, sir, just to understand your 19:08:26
17	to make a decision based on what was in front of me. 19:07:26	17	evidence and I am looking at your witness 19:08:27
18	I made that decision, and there are consequences to 19:07:29	18	statement you say: 19:08:30
19	that, and not everybody was happy, obviously. 19:07:31	19	"I did not discuss the issue 19:08:31
20	But what I see from this is that I 19:07:35	20	of offshore wind development 19:08:32
21	made the decision, and at the top level of 19:07:37	21	with the Premier or seek his 19:08:34
22	government, they backed my decision. 19:07:39	22	counsel before I made the 19:08:36
23	Q. And, sir, can I just take you 19:07:42	23	deferral decision, and he did 19:08:37
24	back. You said in your witness statement the 19:07:43	24	not attempt to influence mv 19:08:39
24 25	back. You said in your witness statement the 19:07:43 Premier's Office did not make, make or influence the 19:07:45	25	not attempt to influence my 19:08:39 decision in any way, nor do I 19:08:40

3	Premier's Office about the 19:08:45	3	to my Deputy Minister; that I was adamant we were 19:09:42
4	issue." 19:08:46	4	not going ahead, but I was willing to look at a 19:09:45
5	So what you are saying is and I 19:08:47	5	pilot project to get the science that was necessary. 19:09:49
6	guess you are being very careful with your words 19:08:50	6	If we had the science, then we could 19:09:52
7	there you didn't personally speak to anyone in 19:08:52	7	apply the precautionary principle. We couldn't do 19:09:54
8	the Premier's Office. You directed your staff to 19:08:54	8	that if we didn't know. And because the thing is 19:09:56
9	speak to people in the Premier's office? 19:08:56	9	this had never been done, really, at that scale 19:09:58
10	A. I told my staff that it was 19:08:58	10	anywhere in the world. So, again, it was important, 19:10:02
11	important that they tell the Premier's Office that I 19:09:00	11	for me, to actually when I have these red flags 19:10:04
12	had made a decision, which, given the fact that we 19:09:02	12	in front of me, to make a decision. I leave it to 19:10:07
13	had been promoting offshore wind, obviously had a 19:09:05	13	my staff. When I tell them to do something, they do 19:10:09
14	consequence. Obviously the Premier and the former 19:09:09	14	it. That's why they still were working for me. 19:10:12
15	Minister had promoted it. They needed he in 19:09:12	15	Q. And, sir, I mean, because I want 19:10:15
16	my opinion, Chief of Staff needed to tell the 19:09:15	16	to be totally fair with you, I've shown you the 19:10:17
17	Premier's office, ASAP, that the Minister of the 19:09:18	17	documents. The documents don't show any involvement 19:10:21
18	Environment had made the decision and that they 19:09:20	18	from you or your office in the decision that appears 19:10:27
19	needed to know about it. 19:09:23	19	to be made, as we have pointed out, at the auspices 19:10:32
20 21	What I can tell you is nobody from the 19:09:24	20 21	of Mr. Morley. 19:10:37
22	Premier's Office called me up and said, you know. 19:09:26	22	I have shown you a number of documents 19:10:38 that we have in the record that show your 19:10:40
23	"Wilkie, you have to change 19:09:27 your mind on this." 19:09:29	23	that we have in the record that show your 19:10:40 involvement in the pilot project, and that's 19:10:42
24	My Chief of Staff told them why I made 19:09:30	24	obviously something that is important to you. Isn't 19:10:44
25	the decision about science and the lack thereof, 19:09:33	25	it possible, sir, and it has been five years, and I 19:10:46

1	those are all of my questions. I appreciate you 19:17:36	1	the follow-up briefing with your ADM, who I don't 19:19:53
2	appearing this evening and look forward to further 19:17:40	2	think was named. Who was your ADM at the time? 19:19:56
3	potential questions, if necessary, but I'm really 19:17:50	3	A. Oh, sorry, my Deputy Minister? 19:19:59
4	done for as far as my cross-examination is 19:17:56	4	Q. Deputy Minister, sorry. 19:20:00
5	concerned. 19:17:59	5	A. That's Gail Beggs. 19:20:00
6	PRESIDENT: Thank you, Mr. Terry. 19:18:01	6	Q. Gail Beggs. And you said she was 19:20:02
7	Any questions on redirect? 19:18:02	7	a scientist. What sort of scientist, was she? 19:20:03
8	MR. SPELLISCY: Just give me one minute. Thank you. 19:18:04	8	A. Well, I remember that conversation 19:20:06
9	MR. PRESIDENT: Sure. 19:18:06	9	because it was the first time I heard the term 19:20:07
10	RE-EXAMINATION BY MR. SPELLISCY: 19:18:06	10	"benthic life forms." And I was surprised that she 19:20:08
11	Q. Just a few very brief questions 19:18:06	11	knew all about that. But she had been with the 19:20:11
12	given the hour. Mr. Wilkinson, at a couple of 19:19:11	12	Ministry of Natural Resources and I believe that she 19:20:13
13	points today, you said that the Ministry of Energy 19:19:17	13	was her undergraduate degree, maybe even her 19:20:14
14	had granted a FIT contract to Windstream. I wanted 19:19:20	14	master's, was in biology. 19:20:17
15	to get some clarity around that. Are you saying it 19:19:24	15	Q. Now, was this in what form was 19:20:19
16	was the Ministry of Energy that granted that 19:19:27	16	this? Was this on the phone? Was it an in-person 19:20:21
17	contract, or who granted that contract? 19:19:28	17	meeting? Could you explain a little bit more about 19:20:23
18	A. Yes. FIT contracts were well, 19:19:30	18	that? 19:20:25
19	actually, I think it was the Ontario Power 19:19:33	19	A. Oh it was face to face. It was in 19:20:26
20	Authority, which is now the IESO. So it's not 19:19:34	20	the Minister's Office of a my we had a joint, 19:20:28
21	really the it's not really the the Ministry; 19:19:37	21	a joint boardroom between the two sides. But 19:20:34
22	right? There was an arm's-length agency of the 19:19:39	22	actually Gail came over to my side, to the 19:20:37
23	government that dealt with that. 19:19:43	23	Minister's Office, and in my the Minister's 19:20:39
24	Q. Okay. I wanted to talk to you 19:19:45	24	Office, I had a table that sat, I think, eight 19:20:41
25	briefly about the briefing with Ms. Lucas and then 19:19:48	25	people. It was also where we met when I had to make 19:20:44
	Page 446		Page 447
1	decisions on bump-up requests, which is something 19:20:48	1	stir that up? Like, are you drilling into bedrock? 19:22:01
2	the Minister of the Environment has to do. So it 19:20:50	2	Like, I knew these things were like, 500 feet high, 19:22:04
3	was in my office and the meeting was at my behest, 19:20:54	3	and then you had to go through the water, and then 19:22:07
4	and I remember it because that was very exceptional. 19:20:57	4	they had to be secured. I had no doubt they could 19:22:09
5	Q. And when you say it was "very 19:21:02	5	be done, because they were in saltwater all around 19:22:11
6	exceptional," what do you mean by that? 19:21:05	6	the world, offshore wind, the North Sea 19:22:13
7	A. Well, I cannot recall any other 19:21:06	7	particularly. 19:22:15
8	time where I had been briefed by my by my 19:21:08	8	So I didn't have a concern about them 19:22:17
9	political staff, by my senior policy adviser, where 19:21:12	9	being constructed. My question was: So if you are 19:22:18
10	I saw something that looked like one great big red 19:21:14	10	building those things, what happens? What gets 19:22:20
11	flag. And I thought that the right thing to do was 19:21:18	11	released to the water? How do we know that it's not 19:22:23

and I remember it because that was very exceptional. 19:20:57

Q. And when you say it was "very 19:21:02
exceptional," what do you mean by that? 19:21:05

A. Well, I cannot recall any other 19:21:06
time where I had been briefed by my -- by my 19:21:08
political staff, by my senior policy adviser, where 19:21:12
I saw something that looked like one great big red 19:21:14
flag. And I thought that the right thing to do was 19:21:18
to call in my Deputy Minister, who was the top civil 19:21:21
servant and ask the questions that I had, one about 19:21:24
science. And then as she answered the questions, 19:21:27
she went through -- I remember she briefed me on -- 19:21:30
there was impact on birds, on bats, on noise, on 19:21:33
what if a wind turbine caught fire, what about the 19:21:38
ice in the Great Lakes, the construction, and all 19:21:41
that kind of stuff. And that they were -- they were 19:21:43
not on the literal shore, another term that I 19:21:46
learned that day from my -- from my Deputy. 19:21:51
that there is hundreds years' worth of industrial 19:21:54

pollution on the bottom of the lake. So if you are 19:21:57

going to construct this thing, what happens if you 19:21:59

going to contaminate the drinking water for people 19:22:25 that were drawing that water? 19:22:27 Then the other issue that I had was I 19:22:29 had dealt, as the Minister, that we had something 19:22:31 called drinking water advisories in regard to 19:22:35 blue-green algae. So that is an algae bloom, and 19:22:38 that particular strain of algae is called 19:22:43 blue-green, has a toxin in it. If it gets in the 19:22:45 water supply, then you can't -- you can't get rid of 19:22:48 it. You have to flush it out. 19:22:52 This happened just two years ago in 19:22:53 Toledo, which gets its water from Lake Erie. The 19:22:55 algae bloom was so big you could see it from space, 19:22:58 and 400,000 people in Toledo didn't have drinking 19:23:01

principles, the bedrock of environmental law, which 19:26:03

And in this case, I thought the draft 19:26:09

19:26:14

regulation failed on both counts, and so I made the 19:26:11

is, science and the precautionary principle.

Page 448 Page 449 1 1 water because the blue-green algae was in the water. 19:23:05 that comment, given the fact that, in Ontario, we 19:24:04 2 2 had had people killed through a water tragedy in a 19:24:07 And if you boiled the water, it released the toxin 19:23:07 3 3 and made it worse. place called Walkerton where, again, the 19:23:09 19:24:12 4 4 And so this was what was in my mind as 19:23:11 precautionary principle had just been thrown out. 19:24:14 5 5 I looked for a set of regulations for the entire 19:23:14 And so what Justice O'Connor had said was that what 19:24:18 6 6 Great Lakes: How were we to differentiate where the 19:23:17 you do is you keep your sources of drinking water 19:24:24 7 7 greatest risk was? How were we to determine that, 19:23:20 safe in the first place. You don't let them get 19:24:26 8 yes, it could be there, that safe. If it was over 19:23:23 8 polluted, the aquifer or the lake, and then try to 19:24:29 9 9 there, it wouldn't be safe. So what was that? 19:23:25 clean it up. What you should do is, as a policy, a 19:24:31 1.0 10 So obviously that should be informed 19:23:28 good public policy, you do everything you can to 19:24:34 11 by science. And then I hear that the comments from 19:23:29 11 keep the sources of drinking water safe in the first 19:24:36 12 12 the draft regulations were something like 1,400 19:23:31 place. 19:24:38 13 comments, where people are saying, "Well, what's the 19:23:34 13 And when I had been parliamentary 14 14 assistant, I brought in changes to the Ontario Water 19:24:43 science?" Obviously it had never been built in 19:23:37 15 15 freshwater. There wasn't science. I get that. But 19:23:40 Resources Act. I had gone around the province on a 19:24:45 16 16 what you would need to do is develop the science. 19:23:42 parliamentary committee, and I led that as the 17 17 You wouldn't start with a massive construction 19:23:44 parliamentary assistant to the Minister involved, 19:24:50 18 project and then figure it out. That would be 19:23:46 18 and I had -- we had gone to Walkerton, the site of 19:24:53 19 experimenting in the largest single source of 19:23:49 19 this tragedy. Seven people had been killed drinking 19:24:55 20 20 drinking water from their tap. drinking water in North America. That just didn't 19:23:51 19:24:57 21 21 seem like a good idea to me when this was brought to 19:23:53 And so I took to heart Justice 19:25:01 22 22 19:23:56 my attention. O'Connor's recommendations -- and I've said this in 19:25:02 23 23 And then when I asked my Deputy, who I 19:23:56 my witness statement -- that the great hallmark was 19:25:05 24 had great confidence in, she couldn't answer that 19:23:58 24 you keep your drinking water safe in the first 25 question. I found that -- I was very disturbed by 19:24:01 25 19:25:10 Page 450 Page 451 1 1 And now I look at Toledo and Flint and all of these 19:25:10 Q. And obviously you have a fairly 19:26:16 2 2 things that are going on and the tragedy in Ontario 19:25:13 clear recollection, as my colleague, Mr. Terry 19:26:17 3 3 about Walkerton. It always goes back that you are 19:25:15 pointed out. 19:26:20 4 just -- you are not paying attention to the 19:25:17 4 A. Mm-hmm. 19:26:21 5 fundamental thing. You keep your sources of 19:25:19 5 Q. Could you also explain the -- do 19:26:21 6 drinking water safe. 19:25:23 6 you have anything to add to the tenor of this 19:26:24 7 7 meeting and why your recollection is so clear about 19:26:26 And when I made this decision, I was 19:25:24 8 8 your meeting with your Deputy? the Minister responsible for the Clean Drinking 19:25:27 19:26:28 9 9 Water Act -- the Clean Water Act. That was a direct 19:25:29 A. Well, like I said, I had great 19:26:30 10 10 promise we had made to the people of Ontario that we 19:25:32 confidence in my deputy, and she was very, very 19:26:32 11 11 would implement Justice O'Connor's recommendation, 19:25:34 experienced. She had been -- and I -- you know, 19:26:34 12 12 given the tragedy. 19:25:37 when I asked her to come in, I told my chief, "I 19:26:39 13 13 need to see the Deputy on this." After I got the 19:26:41 So I knew that if I had to pick between the Clean 19:25:39 14 14 Drinking Water Act, the Ontario Water Resources Act, 19:25:42 memo from Mrs. Lucas, "I want that to happen," which 19:26:43 15 the Environmental Protection Act, all of the things 19:25:45 15 was rare, right, because we had a process on most 19:26:47 16 16 that I was responsible for, and it seemed to be in 19:25:47 things as we went through. So I said, "No, this is 19:26:50 17 17 conflict with the path we were going down with one 19:25:50 urgent." 19:26:53 18 18 particular set of renewable projects that were And I remember that I was -- I 19:26:54 19 19 couldn't believe, when I asked the Deputy, "How do 19:27:01 proposed in the Great Lakes, that the preponderance 19:25:56 20 20 for me was to decide, based on the fundamental 19:25:58 we know that if we do this, that it's not going to 19:27:03 21 21

1	"Well, we don't know, Minister." 19:27:14	1	on? 19:28:25
2	I remember saying, "What do you mean 19:27:17	2	PRESIDENT: try to stick to the 19:28:26
3	we don't know? We're down this path, and we don't 19:27:18	3	usual format of question and answer. 19:28:27
4	know what the consequences of regulating this is?" 19:27:22	4	[Laughter.] 19:28:29
5	I mean, I was that's why I remember it, because I 19:27:25	5	PRESIDENT: Any further questions? 19:28:29
6	I didn't think I was going to get that answer. I 19:27:30	6	MR. SPELLISCY: I have nothing 19:28:30
7	thought I would get the regular answer, "Well, you 19:27:33	7	further. Thank you. 19:28:31
8	know, we have this study. We have that study. 19:27:34	8	PRESIDENT: Thank you. I understand 19:28:32
9	Don't worry, Minister. All is well in hand. You 19:27:36	9	there's just one question from the Tribunal. 19:28:33
10	can count on us." And I didn't get that. And, 19:27:38	10	QUESTIONS FROM THE TRIBUNAL: 19:28:37
11	again, why? Because it had never been done before. 19:27:41	11	PRESIDENT: 19:28:37
12	And, therefore, the science wasn't there. 19:27:46	12	The meeting that you just described, 19:28:39
13	I knew the same case when it came to onshore wind. 19:27:49	13	that took place on the 6th of January of 2011? 19:28:41
14	Those rules were all based on 19:27:54	14	THE WITNESS: No. 19:28:45
15	available science because there were thousands of 19:27:57	15	PRESIDENT: That's your recollection? 19:28:45
16	onshore wind turbines around the world. So we had 19:28:00	16	THE WITNESS: No. I received a memo 19:28:46
17	scientific studies and data from public health and 19:28:03	17	that was in my briefing binder for the evening, 19:28:49
18	researchers to ground our regulations, which, by the 19:28:05	18	which I received every and it was dated January 19:28:52

20	through the Environmental Review Tribunal and to 19:28:13	20	that I read it that night, because that was the 19:28:57
21	Divisional Court. I think one part almost got maybe 19:28:16	21	process we had. And that memo was in my book 19:28:59
22	to the Supreme Court. 19:28:19	22	because my Chief of Staff had initialed it. 19:29:01
23	PRESIDENT: Mr. Wilkinson, it is 19:28:20	23	Anything coming from my staff had to be initialed, 19:29:03
24	getting a bit late now, so let's 19:28:22	24	and I had to deal with it. I came back every 19:29:05
25	THE WITNESS: You don't want me to go 19:28:24	25	morning, and I said, "Okay. I signed these letters. 19:29:08

But it happened quite quickly because it's 19:29:34 quite rare for a Deputy or, sorry, for a Minister 19:29:37 to request a meeting with the Deputy. 19:29:40 PRESIDENT: So it was either on the 19:29:42 7th or the 8th of January? 19:29:44 THE WITNESS: Yes. It happened it 19:29:47 was quite it wasn't under the normal process. 19:29:49 PRESIDENT: Again, after that meeting 19:29:54 with your Deputy is when you decided that moratorium 19:29:55 is the solution to the issue you faced? 19:29:59	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	she felt I didn't have the legal authority to make, 19:30:12 then her job would have been to tell me well 19:30:15 PRESIDENT: I'm just trying to get 19:30:18 the facts. 19:30:19 THE WITNESS: Yes. 19:30:19 PRESIDENT: So the meeting took place 19:30:19 either on the 7th or 8th. 19:30:20 THE WITNESS: Yes. 19:30:22 PRESIDENT: And you then instructed 19:30:23 him or her her? 19:30:27 THE WITNESS: I did two things. I 19:30:28 gave a heads-up to my deputy that that was my 19:30:29 decision, and I told my Chief of Staff, given the 19:30:33 nature of this file, it was very important that they 19:30:35 informed the Premier's Office that the Minister of 19:30:39 the Environment had made as I said, it was going 19:30:40 to be a decision that would make some people happy 19:30:43 and some people very unhappy. 19:30:45 PRESIDENT: And as far as you are 19:30:47 concerned, your testimony is that the decision was 19:30:48 taken on that day on the spot, after your briefing, 19:30:53 after your meeting with your Deputy? 19:30:54

2	MR. TERRY: Nothing from us. 19:31:01	2	It's in relation to the transcript distribution. 19:32:41
3	MR. SPELLISCY: No, nothing from us. 19:31:02	3	Specifically we will need to have three types of 19:32:46
4	PRESIDENT: Okay. Thank you very 19:31:04	4	transcripts this time, the public version, the 19:32:48
5	much. Thank you, Mr. Wilkinson. That concludes 19:31:05	5	confidential version, and then the restricted 19:32:50
6	your examination, and I thank you for coming. 19:31:08	6	confidential version. 19:32:53
7	THE WITNESS: Thank you, sir. 19:31:10	7	The restricted confidential we will 19:32:54
8	Confidential transcript ends 19:31:11	8	send all three versions only to the counsel on 19:32:56
9	PRESIDENT: We are about to finish 19:31:11	9	record. However, when comparing what the PCA has 19:32:59
10	now, so are there any housekeeping issues? It's a 19:31:23	10	and the revised Procedural Order No. 1, counsel of 19:33:02
11	late hour. Does this impact in any way the program 19:31:26	11	record are quite different on that, when I compare 19:33:05
12	for tomorrow? I trust not, except there will be 19:31:29	12	it to the distribution list for the transcript. 19:33:08
13	less sleep. 19:31:35	13	So I would just like to read through 19:33:12
14	MR. TERRY: I think the only 19:31:37	14	the names that I have for Claimant and for the 19:33:13
15	consequence will be less sleep, and hopefully mental 19:31:38	15	Respondent for distribution, and you can confirm 19:33:15
16	competence will still stay more or less where it is. 19:31:42	16	whether they are all counsel of record just so that 19:33:17
17 18	Looking forward to seeing you tomorrow morning at 19:31:46	17 18	we are clear with that. Is that fine? 19:33:20
19	9:00. 19:31:47	19	MR. TERRY: Yes. 19:33:24
20	PRESIDENT: Just a second, before you 19:31:51	20	MS. NETTLETON: So for Claimant 19:33:25
21	go, a couple of housekeeping issues before you go. 19:31:53 Excuse me. We are not done yet, please. 19:32:24	21	and forgive me; I only have addresses here. So I 19:33:26
22	There are a couple of housekeeping issues on the 19:32:25	22	have J. Terry, M. Seers, N. Kennedy, E. Sherkey, C. 19:33:28
23	part of the secretary of the Tribunal. On our part, 19:32:30	23	Walker, L. Tavares, N. Williams, C. Patten, and R. 19:33:32 Romero. 19:33:37
24	simply we continue tomorrow, but let's do this 19:32:34	24	MR. TERRY: It would just be the 19:33:39
25	first, Jennifer. 19:32:36	25	first four. 19:33:40

TERRY: That's fine with us. 19:34:14 clarification: Mr. President you had asked for an 19:34:14 indication of where the rule is for treating such 19:34:16 information, the restricted access information, 19:34:21 which is in the confidentiality order. Are you 19:34:24	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	So that brings today's hearing to an end. So we 19:34:31 will continue morning at 9:00. 19:34:35 MR. TERRY: Thank you very much. 19:34:39
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	MS. NETTLETON: Just the first four? 19:33:41 MR. TERRY: Yes. 19:33:43 MS. NETTLETON: Up to E. Sherkey? 19:33:43 MR. TERRY: Yes. 19:33:46 MS. NETTLETON: Great. 19:33:49 And then for the Respondent I have Ms. Perrault. 19:33:50 MR. NEUFELD: Sorry to interrupt. 19:33:54 You can just send it to Ms. Perrault, and we'll get 19:33:56 it from her. I think that's probably the 19:33:58 MR. NEUFELD: Is that the easiest? 19:33:58 MR. SPELLISCY: Our inboxes would 19:34:02 appreciate that. 19:34:04 MS. NETTLETON: Should we adopt this 19:34:07 procedure going forward for the remaining of the 19:34:08 proceedings? 19:34:10 MR. TERRY: That's fine with us. 19:34:12 MR.
